Federal Budget And Financial Management Reform:

Federal Budget and Financial Management Reform Thomas Dexter Lynch, 1991-08-30 A collection of original essays by specialists in the field this book examines the crucial budgetary and financial management problems that face the United States government and makes concrete recommendations on how current processes can be improved The authors make it clear that although the present federal budgetary and financial management systems are not working the case is far from hopeless Several chapters analyze the flaws in the federal budget making process that lead to deadlock between the president and Congress and ultimately to higher deficits To remove the checks and balances system from its present political stalemate a workable two stage budgetary process is suggested and bipartisan action at the highest level is strongly urged Another chapter explains the context in which forecasting is used in federal government budget making and addresses the problem of the failure to predict the yearly budget deficit with reasonable accuracy Proposals for improving public financial management include centralizing financial management functions improving debt collection practices eliminating deficiencies in the application of information technology and privatizing entities such as the postal service AMTRAK and Social Security Providing clarification of complex issues together with constructive approaches to reform this book will be of interest to both general readers and scholars students and professionals concerned with government public policy and financial management

national defense is a complex endeavor particularly for a nation like the U S that assumes global responsibility and strives to have the most advanced and lethal force on earth It is necessary and challenging to balance the myriad requirements between current and future readiness across warfare areas and military services between having state of the art capability with sufficient capacity and among people hardware and the activities people do with that hardware As analytically difficult as that problem is it is embedded in the political budgeting processes and national security must be balanced with every other function of government and there must also be cooperation across branches of government This text explores that complex endeavor It takes the position that budgeting for defense is a particular instance of public budgeting which is a particular instance of public policy Thus this text starts with a conceptual empirical and process foundation before discussing the participants and processes that build the annual defense budget It then covers the execution of that budget and the ultimate accounting Compared to the first edition this text is updated with current figures and examples There is a new chapter on determinants of military spending in society and burden sharing within alliances The chapter on budget execution

has been disaggregated and a new chapter is devoted to fiscal law The final chapter seeks to integrate all that came before it by discussing matters that integrate the stages of budgeting and which cross branches of government Following in the tradition of the first edition this is intended to be both a textbook for a course in budgeting but also a desktop reference for defense budgeting practitioners
