**Grangemouth** Margaret Robertson,1986      Railway Towns David Brandon,2024-05-02 The railways changed the world They initiated a revolution in communications which continues to this day ever more profoundly influencing our lives They had an enormous economic and social impact in Britain not least with its demography Before 1914 places on the railway system felt they were connected to the wider world Those left off the system often feared for their future It was never actually as simple as that Some places well served by railways prospered other did not Some with minimal or no railway connections managed to sustain themselves successfully Others became complex railway hubs perhaps with railway based engineering works extensive shunting yards and warehouses and a large requirement for labour Some companies built large numbers of dwellings for their workers and their families Sometimes they even built churches and parks for example Places of this character have often been described as railway towns but what is actually meant by this term In a pioneering attempt in book form to move towards an understanding of what constitutes a railway town the author considers a wide range of cities towns villages and other settlements and asks to what extent they owed their nineteenth and early twentieth century development to the railways This book should appeal to students of railway history British topography and the economic social and cultural impact of railways      **Future as Fairness** Anne K. Haugestad,J. D. Wulfhorst,2004 Twenty years after the establishment of the World Commission on Environment and Development the 13 contributions in this interdisciplinary volume offer a broad spectrum of perspectives and research based recommendations on environmental sustainability social justice and the human enterprise The cases explored cover global citizenly rights and obligations environmental health ecological building practices tradable fuel permits forestry and illegal logging local waste management employment and risk assessments the genetic modification debate nuclear and toxic waste global environmental governance and 500 years of globalization      The Municipal Year Book and Public Services Directory ,1908      The Municipal Year Book and Public Utilities Directory ,1909      **The Municipal Year Book and Public Utilities Directory** Sir Robert Donald,1909      Census of Great Britain, 1851 Great Britain. Census Office,1852      Environment and Planning ,2007      Life and Death Matters Barbara Rose Johnston,2016-06-03 The first edition of Life and Death Matters was a breakthrough text centralizing the experiences of those on the front lines of environmental crises and forging new paradigms for understanding how crises emerge and how different groups of actors respond to them This second edition fully updated with both expanded and new chapters once again provides a benchmark for the field and opens important pathways for further research Authors reassess the state of scholarship and grassroots activism in a new century when social and environmental systems are being reconceptualised within post 9 11 security and biosecurity frameworks when global warming and resource scarcity are not fears but realities when global power and politics are being realigned and when ecocide ethnocide and genocide are daily tragedies This bold new edition of Life and Death Matters will be a widely used textbook and essential reading for students
