**The Worldwide List of Alternative Theories and Critics** Jean de Climont,2020-11-01 This Worldwide List of Alternative Theories and Critics only available in english language includes scientists involved in scientific fields The 2023 issue of this directory includes the scientists found in the Internet The scientists of the directory are only those involved in physics natural philosophy The list includes 9700 names of scientists doctors or diploma engineers for more than 70% Their position is shortly presented together with their proposed alternative theory when applicable There are nearly 3500 authors of such theories all amazingly very different from one another The main categories of theories are presented in an other book of Jean de Climont THE ALTERNATIVE THEORIES

**The Origin of Natural Structure** He And XL Yang Jin He and XL Yang,Dr. Jin He,2009 A non mathematical book based on the authors academic papers which pioneered the study on the structures of galaxies the solar system and the universe and can be understood by any middle school student The authors findings are simple everything originates from the proportion order and its harmonic deviation For a system of two bodies like the Earth Moon or the Sun Earth the proportion order reduces to Newton's gravity Can life exist without gravity For example International Space Station and its on board astronauts fall freely around the Earth and suffer no gravity Can astronauts stay for a long time in the Station The question is resolved on Yahoo Answers The longest stay is 430 days in space As soon as a person leaves the earth's gravitational field several things start to occur in the body Circulatory problems within 2 to 3 days there is a 22% blood volume decrease or loss Muscle atrophy occurs in space at 5% per week Bone atrophy occurs in space at 1% per month Remember our bodies were developed within the earth's gravity field our muscles are needed to counter gravity In space we no longer need our muscles so the brain starts to optimize the body by getting rid of what it doesn't need

Handbook of the History of Philosophy Albert Schweigler, 2023-12-18 Reprint of the original first published in 1877

The Rise and Fall of Soul and Self Raymond Martin, John Barresi, 2006 Raymond Martin and John Barresi trace the development of Western ideas about personal identity and reveal the larger intellectual trends controversies and ideas that have revolutionized the way we think about ourselves They begin with ancient Greece where the ideas of Plato Aristotle and the materialistic atomists laid the groundwork for future theories They then discuss the ideas of the church fathers and medieval and Renaissance philosophers including St Paul Origen Augustine Aquinas and Montaigne In their coverage of the emergence of a new mechanistic conception of nature in the seventeenth century Martin and Barresi note a shift away from religious and purely philosophical notions of self and personal identity to more scientific and social conceptions a trend that has continued to the present day They explore modern philosophy and psychology including the origins of different traditions within each discipline and explain the theoretical relevance of both feminism and gender and ethnic studies and also the ways that Derrida and other recent thinkers have challenged the very idea that a unified self or personal identity even exists

Origin and Early Evolution of Comet Nuclei Hans Balsiger, Kathrin Altwegg, Walter Huebner, T. Owen, Rita Schulz, 2008-09-27 Comet nuclei are the most primitive bodies in the solar system They have been created far away from the early Sun and it is supposed that their material has been altered the least since their formation The workshop was bringing together representatives of several scientific communities in the fields of interstellar clouds star forming regions the solar nebula and comets The intent was to formulate the current understanding and interconnectivity of the various source regions of comet nuclei and their associated compositions and orbital characteristics The goal was to

better understand the survival of cometary materials grains molecules free radicals and atoms from extrasolar sources circumstellar shells and molecular clouds their modifications in the solar nebula and the effects of their properties on the formation and early physical and thermal evolution of the macroscopic bodies the comet nuclei in the various subnebulae Closely associated is their transport into the outer solar system the Kuiper belt and Oort cloud The distinction between direct measurements in situ or by remote sensing of cometary material properties and properties derived from indirect means deduced from laboratory studies and theoretical deductions was emphasized with the aim to guide future investigations The book is intended to serve as guide for researchers and graduate students working in the field of planetology and solar system exploration It should also help to influence the planning of scientific strategies for the encounter of the Rosetta spacecraft with Comet Churyumov Gerasimenko

**Gravity's Rainbow, Domination, and Freedom** Luc Herman, Steven C. Weisenburger, 2013 When published in 1973 Gravity's Rainbow expanded our sense of what the novel could be Pynchon's extensive references to modern science history and culture challenged any reader while his prose bent the rules for narrative art and his satirical practices taunted U S obscenity and pornography statutes His writing thus enacts freedom even as the book's great theme is domination humanity's diminished chances for freedom in a global military industrial system birthed and set on its feet in

World War II Its symbol the V 2 rocket Gravity's Rainbow Domination and Freedom broadly situates Pynchon's novel in long sixties history revealing a fiction deeply of and about its time Herman and Weisenburger put the novel's abiding questions about freedom in context with sixties struggles against war restricted speech rights ethno racial oppression environmental degradation and subtle new means of social and psychological control They show the text's close indebtedness to critiques of domination by key postwar thinkers such as Erich Fromm Herbert Marcuse and Hannah Arendt They detail equally powerful ways that sixties countercultural practices free speech resistance played out in courts campuses city streets and raucously satirical underground presswork provide a clearer bearing on Pynchon's own satirical practices and their implicit criticisms If the System has jacketed humanity in a total domination may not a solitary individual still assert freedom Or has the System captured all even supposedly immune elites in an irremediable dominion Reading Pynchon's main characters and storylines this study realizes a darker Gravity's Rainbow than critics have been willing to see The Ecological Self Freya

Matthews, 2006-05-23 This is the first book length treatment of the metaphysical foundations of ecological ethics The author seeks to provide a metaphysical illumination of the fundamental ecological intuitions that we are in some sense one with nature and that everything is connected with everything else Drawing on contemporary cosmology systems theory and the history of philosophy Freya Mathews elaborates a new metaphysics of interconnectedness She offers an inspiring vision of the spiritual implications of ecology which leads to a deepening of our conception of conservation *Yesterday's Self*

Andreea Deciu Ritivoi, 2002-08-15 The state of being called nostalgia has a history fraught with ambiguity and poetical connotation In the late 17th century nostalgic reminiscences were thought to be the symptoms of a deadly disease that shook one's mind and body Today we view nostalgia not as a medical condition but as a bittersweet recollection of one's past joys and sorrows the memories and treasures of an earlier self And yet there remains a category of individuals for whom such recollection can be seriously problematic immigrants In *Yesterday's Self* Andreea Ritivoi explores the philosophical and historical dimensions of nostalgia in the lives of immigrants forging a connection between current trends in the philosophy of identity and intercultural studies The book considers such questions as Does attachment to one's native culture preclude or merely influence adaptation into a new culture Do we fashion our identity in interdependence with others or do we shape it in a non contingent frame Is it possible to assimilate in an unfamiliar world without risking self alienation Ritivoi's response nostalgia is both the poison and the cure in such situations Documenting the tribulations of sojourners and immigrants *Yesterday's Self* illustrates how and why the cultural adjustment of immigrants can only happen when personal identity is understood as a quest for continuity in one's life story even alongside the most radical cultural rupture Ultimately reflection on the nostalgic experience reveals insights into the nature of the self and its dynamic engagement with otherness and difference *The industrial self-instructor and technical journal* Ward, Lock and co, Ltd, 1884 Toward a Socially

Responsible Psychology for a Global Era Elena Mustakova-Possardt, Mikhail Lyubansky, Michael Basseches, Julie

Oxenberger, 2013-08-13 This book explores the concept of socially responsible psychology in a global age and how it might be used to organize, integrate, and bring enhanced focus to a field that has the potential to contribute to solutions to the world's most pressing problems. In this volume, the editors explore the central and defining features of socially responsible psychology, challenges that this work would face, and the mechanisms and processes by which psychological work could be synergistically integrated with the work of other disciplines. For this purpose, the volume also examines a variety of factors currently that limit psychology in carrying out this goal.
