Resources in Education, 1997 Science Fiction for Young Readers Charles William Sullivan, 1993-03-24 In this collection of essays authorities on a wide range of topics related to science fiction discuss themes and works of special interest to young readers The first section includes chapters on the origins of science fiction as a genre for young people and contains essays on Victor Appleton's Tom Swift series and the contributions of Isaac Asimov Robert A Heinlein and Madeleine L Engle The second section looks beyond the origins of science fiction to particular works and authors The chapters in this section approach authors and their works from particular thematic perspectives and thus show how particular themes bind together and define the body of an author's writings The third section on science fiction as a vehicle for ideas looks beyond the literary features of the genre Chapters in this section discuss science fiction as a means for conveying religious philosophical and social messages

Time And Science (In 3 Volumes) Remy Lestienne, Paul Harris, 2023-06-21 Prominent scientists and philosophers of science address contemporary debates on the nature of Time Their contributions freely discuss its unity and reality its compatibility with the orders of classical philosophy present past and future and with the disputed idea of free will Volume 1 They also present a detailed and updated state of the role of Time in the so called exact sciences biology or more precisely genetics evolution neurosciences natural and artificial intelligence Volume 2 and physics relativity quantum mechanics and quantum gravity and cosmology Volume 3

Time And Science - Volume 3: Physical Sciences And Cosmology Remy Lestienne, Paul Harris, 2023-06-22 The present volume of Time and Science series is devoted to Physical Sciences and Cosmology Today more than ever the question is Time an ontological property a necessary ingredient for the physical description of the world or a purely epistemological element relative to our situation in the world worry physicists and cosmologists alike For many of them Relativity and particularly General Relativity

as well as its reconciliation with quantum mechanics in the elaboration of a quantum theory of gravitation points to a negative answer to the first alternative and leads them to deny the objective reality of time For others the answer is nuanced by the evidence of an emerging temporal property when one climbs the scales of the complexity of systems and or the applicability of the statistical laws of thermodynamics But for some the illusion of the unreality of time comes from certain confusions that they denounce and plead for the re establishment of time at the heart of physical theories

At the Crossroads: Lessons and Challenges in Computational Social Science Javier Borge-Holthoefer, Yamil Moreno, Taha Yasserli, 2016-11-29 The interest of physicists in economic and social questions is not new for over four decades we have witnessed the emergence of what is called nowadays sociophysics and econophysics vigorous and challenging areas within the wider Interdisciplinary Physics With tools borrowed from Statistical Physics and Complexity this new area of study have already made important contributions which in turn have fostered the development of novel theoretical foundations in Social Science and Economics via mathematical approaches agent based modelling and numerical simulations From these foundations Computational Social Science has grown to incorporate as well the empirical component aided by the recent data deluge from the Web 2.0 and 3.0 closing in this way the experiment theory cycle in the best tradition of Physics
