Fatal Addiction:

The Artist-Philosopher in the Age of Addiction George Smith, 2025-03-17 George Smith argues that modern humanity suffers from a late stage pre fatal addiction to scientific technological thinking Like most pre fatal addictions this one will most likely result in one of three ways misery extinction or human transformation The question remains wherein lies the third way According to Smith mankind s chronic and as yet undiagnosed sickness originates in early Western metaphysics and has long been thoroughly globalized It explains unstoppable extractionism and its relentlessly increasing by product carbon dioxide It also explains today s ever increasing rate of species extinction and the increasingly likely collapse of the biosphere Citing climate change tolerance and denial as symptomatic of pre fatal addiction Smith turns his analysis to Heidegger s question concerning technology and shows that even Heidegger had become hooked on scientific technological thinking Surrendering to his disease Heidegger steps back into meditative thought This in turn opens Heidegger to an East West mode of scientific poetic consciousness the thinking of artist philosophers such as Laozi Hlderlin and Rachel Carson For Heidegger this way of thinking lays the path to mankind s transformative emancipation from an otherwise inescapable catastrophe The book will be of interest to scholars of the arts and culture histories of consciousness and climate studies
