found themselves taking opposite sides in several important debates and their relationship was marked by acute strain and mutual dislike By comparing and contrasting the parallel careers of these two men this book not only distils the essence of their differing theology it also offers a broader understanding of the formation of English nonconformity Placing these two figures in the context of earlier events experience and differences it argues that Restoration nonconformity was hampered by their strained personal relationship which had its roots in their contrasting experiences of the English Civil War This study thus contributes to historiography that explores the continuities across seventeenth century England rather than seeing a divide at 1660 It illustrates the way in which personality and experience shaped the development of wider movements

scientific method to understand what the mind is and how it works and to learn how to create a healthy distance from what is in many ways a programmed and robot like mechanism that seems to be dominating our lives and decisions and activities more and more and not always in a positive way As Osho has said so often beginning many decades ago that humanity is afflicted by a deep and fundamental insanity and that we initiate each new generation of children into that madness is now becoming more and more obvious The children who refuse to be initiated into that madness will appear rebellious or mad to their elders who persist with the best intentions to force them onto the same path to participate in the same madness It is utterly dangerous to be sane in this world Osho says A sane person has to pay a heavy price for his sanity Osho pleads in this book for what he calls an independent mind independent thinking and challenges us to question our belief that we are already great independent minds a belief based on the lack of understanding that our thoughts mostly come from others like a computer program full of malware downloaded into our brains What I mean by the thinking state is that you should have eyes what I mean is the ability to think on your own But I don t mean a crowd of thoughts We all have a crowd of thoughts within us but we don t have thinking within us So many thoughts go on moving within us but the power of thinking has not been awakened In his early days of teaching Osho ran meditation camps in which he introduced people into meditation and his morning and evening talks created the framework of understanding for this work This book is a fascinating record of one of these camps in a short period of three days Osho introduces his participants to an understanding that our minds are running on malware programs and he introduces meditation as an antivirus to clean our minds of the conditionings and indoctrinations that are preventing us from realizing our full potential and to be happy In the coming three days I will talk to you about the search for life I must first say that life is not what we understand it to be Until this is clear to us and we recognize in our hearts that what we think of as life is not life at all the search for the true life cannot begin When you have something authentically your own in your mind you start moving toward the soul Then you become worthy then you are able to know the soul Until you have an independent mind it is simply impossible for individuality to be born **Exposed**
