Fatal Odds:

Deadly Depths John F. Dobbyn, 2023-08-01 A notable archaeologist close to finding a priceless artifact meets his untimely demise Matthew Shane vows to find his murderer Matthew Shane is a law professor in Salem Massachusetts where he enjoys a rewarding mentorship with Professor Barrington Holmes a well known archaeologist So when Professor Holmes is found dead in his office and the police rule it a suicide something doesn't sit right with Matthew He becomes determined to find the true cause of Holmes death and bring closure to his widow Matthew soon learns that Professor Holmes belonged to a group of notable archaeologists dubbed The Monkey's Paw who were all entangled in an expedition to find an unknown object of unprecedented historical and financial value Each member had been given one piece of the instructions to find the object but some of the men had encountered horrific twists of fate before the group could reunite to continue in their search Joining forces with the remaining members Matthew's quest for the cause of the apparent curse of The Monkey's Paw leads him on a global wild goose chase that culminates in a turn of events not even Professor Holmes could have predicted Perfect for fans of Michael Crichton and Dan Brown **Report**, 1987 Categorical Data Analysis for the Behavioral and Social Sciences

Razia Azen, Cindy M. Walker, 2021-05-26 Featuring a practical approach with numerous examples the second edition of *Categorical Data Analysis for the Behavioral and Social Sciences* focuses on helping the reader develop a conceptual understanding of categorical methods making it a much more accessible text than others on the market The authors cover common categorical analysis methods and emphasize specific research questions that can be addressed by each analytic procedure including how to obtain results using SPSS SAS and R so that readers are able to address the research questions they wish to answer Each chapter begins with a Look Ahead section to highlight key content This is followed by an in depth focus and explanation of the relationship between the initial research question the use of software to perform the analyses and how to interpret the output substantively Included at the end of each chapter are a range of software examples and questions to test knowledge New to the second edition The addition of R syntax for all analyses and an update of SPSS and SAS syntax The addition of a new chapter on GLMMs Clarification of concepts and ideas that graduate students found confusing including revised problems at the end of the chapters Written for those without an extensive mathematical background this book is ideal for a graduate course in categorical data analysis taught in departments of psychology educational psychology human development and family studies sociology public health and business Researchers in these disciplines interested in applying these procedures will also appreciate this book's accessible approach **A Million**
