Handbook of Targeted Delivery of Imaging Agents Vladimir P. Torchilin, 1995-08-23 This is the first time detailed and updated information on the targeted delivery of imaging agents has been collected into a single handbook This comprehensive volume presents the scientific background together with the latest experimental and clinical data in this fast growing area The Handbook of Targeted Delivery of Imaging Agents meets the requirements of the broadest audience including researchers practitioners and students The basic principles of targeted delivery of imaging are presented and discussed together with various imaging agents and different imaging modalities such as gamma imaging MR imaging and CT PET and SPECT imaging The book consists of eight parts and 39 chapters covering all aspects of targeted drug delivery from the imaging theory and chemistry of imaging agents to their experimental and clinical use for targeted visualization of cancer including ovarian prostate colorectal and thyroid cancer cardiovascular atherosclerosis myocardial infarction and thromboses and neurological diseases infection and inflammation sites A special section discusses the targeted delivery of imaging agents into lymph nodes which are often sites of metastases during

different malignant diseases Monoclonal antibody based targeted imaging agents are considered together with new approaches involving the use of labeled micelles liposomes and polymer coated particles The book describes the possible application of designer antibodies for the delivery of diagnostic agents including the preparation properties labeling and experimental use of multifunctional antibodies The alternative improvement of antibody directed targeting describes the application of avidin biotin system for the delivery of imaging agents Long circulating blood pool imaging agents are considered as a special group of organ specific pharmaceuticals The latest trends in the synthesis of immunoscintigraphic MR and CT agents are presented This Handbook of Targeted Delivery of Imaging Agents is a must have reference for all those who need to stay abreast of the latest developments in this hot field Neuropeptides and Immunoregulation Berta Scharrer, Eric M. Smith, George B. Stefano, 2012-12-06 This book provides an updated overview of a rapidly developing and exciting area of investigation dealing with the role of neuropeptides in immunoregulatory processes Existing texts focus on the bidirectional exchange of signals among the nervous endocrine and immune systems in mammals carried out primarily by the enkephalin and proopiomelanocortin families of neuropeptides and lymphokines This collection of material is the first one to include pertinent information obtained in invertebrates which has considerably advanced our knowledge of the role of opioid neuropeptides especially in another activity of the immune system that of autoregulation The study and interpretation of the remarkable parallelisms between these phenomena observed in invertebrates and vertebrates bring new insight into the mechanisms of neuroimmunobiological integration with both general biological and clinical implications

Lad, John S. Kaptein, Ching-Kow Lin, 1995-11-27 Signal Transduction in Leukocytes presents important principles and various aspects of cellular regulation in leukocytes The book discusses receptor structure and signaling emphasizing cytokine receptors and the T cell and B cell antigen receptors It investigates the role of the heterotrimeric G proteins and small G proteins as transducers Authorities in each field cover a

wide range of topics They explore propagation of signaling cascades through second messengers and serine threonine kinases the initiation of signaling from the B and T cell antigen receptors by tyrosine phosphorylation and protein recruitment and the role of signaling in cell cell interactions and the regulation of the cell cycle The book outlines the relationship of receptor signaling to inflammatory reactions of neutrophils eosinophils and macrophages **Immunological Investigations** ,1995 **Human Basophils and Mast Cells: Biological Aspects** G.
