Death-Drive Robert Rowland Smith, 2010-04-30 Robert Rowland Smith takes Freud s work on the death drive and compares it with other philosophies of death Pascal Heidegger and Derrida in particular He also applies it in a new way to literature and art to Shakespeare Rothko and Katharina Fritsch among others He asks whether artworks are dead or alive if artistic creativity isn t actually a form of destruction and whether our ability to be seduced by fine words means we don t put our selves at risk of death In doing so he proposes a new theory of aesthetics in which artworks and literary texts have a death drive of their own not least by their defining ability to turn away from all that is real and where the effects of the death

drive mean that we are constantly living in imaginary rhetorical or artistic worlds The book also provides a valuable introduction to the rich tradition of work on the death drive since Freud Key Features Includes a general introduction to the death drive Presents an original theory of aesthetics Analyses both theoretical and clinical psychoanalysis Offers in depth treatment of Freud Provides an overview of philosophies of death

Understanding Derrida Jack Reynolds, Jonathan Roffe, 2004-06-01
Jacques Derrida continues to be the world's single most influential philosophical and literary theorist. He is also one of the most controversial and most complex. His own works and critical studies of his work proliferate, but where can a student utterly new to the work of Derrida start? *Understanding Derrida* is written as an introduction to the full range of Derrida's key ideas and influences. It brings together the world's leading authorities on Derrida, each writing a short, accessible essay on one central aspect of his work. Framed by a clear introduction and a complete bibliography of Derrida's publications in English, the essays systematically analyze one aspect of Derrida's work, each essay including a quick summary of Derrida's books which have addressed this theme, guiding the student towards a direct engagement with Derrida's texts. The essays cover language, metaphysics, the subject, politics, ethics, the decision, translation, religion, psychoanalysis, literature, art, and Derrida's seminal relationship to other philosophers, namely Husserl, Heidegger, Levinas, Hegel, and Nietzsche.
