Sabina Baraković, Zahid Akhtar, Jasmina Barakovic Husic, 2024-03-19 Quality of life QoL is a broad concept that has many definitions and meanings depending on the context under consideration. It can be perceived as the overall enjoyment of life and a multidimensional concept which emphasizes the self-perceptions of an individual's current state of mind which is affected in a complex way by the person's physical health psychological state personal beliefs social relationships and their relationship to salient features of their environment. On the other hand demographic data suggests an increased need for workers worldwide and a rapid aging trend in the active workforce as well as in general. This trend of workforce deficit and population aging will be even more prominent in the future. Therefore in order to have and sustain a healthy motivated and productive workforce but also healthy independent and active elderly adults one must improve their QoL and vice versa. Improving QoL will improve general public health and in turn create communities who can contribute in diverse and positive ways to both promote and sustain health for future generations. **It's Your World** United States. zhicheng,2021-12-15 The election process reflects the essence of the electoral system The justice of the electoral process can best reflect whether the electoral system is legitimate and democratic The democratic and legal shortcomings of China s electoral system can be solved by rationalizing and democratizing the electoral process which is consistent with the realization of justice under the electoral process In this book procedural justice is combined with the electoral process to find the conditions and elements needed to achieve more justice in elections The electoral system is still based on the political will of the political party to rule and the electoral system itself has serious legislative problems which shows that the foundation of China s electoral system has problems Then China s electoral system cannot truly represent the political voices and political interests of the people in the implementation and at the same time cannot reflect the fairness of the election in the electoral procedure and the determination of the election results The People s Congress system and the Political Consultation system simply cannot elect the right representatives who truly represent the interests of the people The elected government and state power organs are separated from the people s political status political interests and development interests in the operation of their duties and the exercise of power By analyzing the problems in China s electoral system and election procedures the book concludes the conditions for the realization of more justice rationalization and democratization of China s electoral system and election procedures through procedural justice The spiritual connotation of procedural justice under the electoral system and election procedures are combined with the traditional Chinese democratic political culture to construct an electoral political culture adapted to the contemporary Chinese political environment advancing the development of procedural justice in China s electoral system to realize the rationality legitimacy and democracy of elections
