Grave Choices:

Grave Goods Anwen Cooper, Duncan Garrow, Catriona Gibson, Melanie Giles, Neil Wilkin, 2021-12-22 Britain is internationally renowned for the high quality and exquisite crafting of its later prehistoric grave goods c 4000 BC to AD 43. Many of prehistoric Britain's most impressive artefacts have come from graves. Interred with both inhumations and cremations, they provide some of the most durable and well preserved insights into personal identity and the prehistoric life course yet they also speak of the care shown to the dead by the living and of people's relationships with things. Objects matter. This book's title is an intentional play on words. These are objects in burials but they are also goods, material culture that must be taken seriously. Within it we outline the results of the first long term large scale investigation into grave goods during this period which enables a new level of understanding of mortuary practice and material culture throughout this major period of technological innovation and social transformation. Analysis is structured at a series of different scales ranging from macro scale patterning across Britain to regional explorations of continuity and change to site specific histories of practice to micro scale analysis of specific graves and the individual objects and people within them. We bring these different scales of analysis together in the first ever book focusing specifically on objects and death in later prehistoric Britain. Focusing on six key case study regions the book innovatively synthesises antiquarian reports, research projects and developer funded excavations. At the same time it also engages with and develops a number of recent theoretical trends within archaeology including personhood, object biography and materiality ensuring that it will be of relevance right across the discipline. Its subject matter will also resonate with those working in anthropology, sociology, museology and other areas where death, burial and the role of material culture in people's lives are key contemporary issues.

The Burial Record of Prehistoric Liangshan in Southwest China Anke Hein, 2016-12-13 This book proposes a new model and scheme of analysis for complex burial material and applies it to the prehistoric archaeological record of the Liangshan region in Southwest China that other archaeologists have commonly given a wide berth regarding it as too patchy, too inhomogeneous and overall too unwieldy to work with. The model treats burials as composite objects considering the various elements separately in their respective life histories. The application of this approach to the rich and diverse archaeological record of the Liangshan region serves as a test of this new form of analysis. This volume thus pursues two main aims: to advance the understanding of the archaeology of the immediate study area which has been little examined and to present and test a new scheme of analysis that can be applied to other bodies of material.

The Quadrant Puzzles Shankar Menon, This piece of fiction may at first disturb those singularly pursuing success for it lays bare their identities and the nature of their personal relationships However by the end of the book there would clearly appear comfort and redemption A novel that defies genres it is about how unabashed opportunity creations lead to Orwellian outcomes This is a must read for a beleaguered market civilization This book has its share of heroes and villains But in the end there is a universal triumph for every human being A novel of immense reconciliation It has the power to heal the earth and the human heart Here is a bold attempt to synthesize philosophy and everyday living the east and the west reason and harmony and finally truth and beauty A few excerpts from the book My heart raced as she sat beside me Her soft reassuring ancient hands Picked me up cradled me in her lap Pressed me to her breast And kissed me on the forehead She then bent down to my ear And spoke the kind motherly words Grossness was my creed Sensory entitlement my greed What heavenly intervention Would refine me human I sat beside his imposing presence Hope blossomed in my heart

His message direct and unmistakable Gave me a new vision **Burial and Memorial in Late Antiquity** ,2024-10-02 Burial and Memorial explores funerary and commemorative archaeology A D 284 650 across the late antique world This first volume includes an overview of research and papers exploring bioarchaeology mortuary rituals mausolea and funerary landscapes It considers the sacralisation of tombs the movements of relics and the political significance of cemeteries The nature and fate of statue monuments is explored as memorials to individuals Authors also compare the destruction or preservation of tombs in relation to other buildings Finally the city itself is considered as a place of collective memory where meanings were long maintained via a study of spoliation The Secret Cemetery Doris Francis, Leonie Kellaher, Georgina Neophytou, 2020-07-12 Burial sites have long been recognized as a way to understand past civilizations Yet the meanings of our present day cemeteries have been virtually ignored even though they reveal much about our cultures Exploring an extraordinarily diverse range of memorial practice Greek Orthodox Muslim Jewish Roman Catholic and Anglican as well as the unchurched The Secret Cemetery is an intriguing study of what these places of death mean to the living Most of us experience cemeteries at a ritualized moment of loss What we forget is that these are often places to which we return either as a general space in which to contemplate or as a specific site to be tended These are also places where different communities can reinforce boundaries and even recreate a sense of homeland Over time ritual artefact and place shape an intensely personal landscape of memory and mourning a landscape more alive more actively engaged with than many of the other places we inhabit *Grave Disturbances* Edeltraud Aspöck, Alison Klevnäs, Nils Müller-Scheeßel, 2020-07-31 Archaeologists excavating burials often find that they are not the first to disturb the remains of the dead Graves from many periods frequently show signs that others have been digging and have moved or taken away parts of the original funerary assemblage Displaced bones and artefacts traces of pits and damage to tombs or coffins can all provide clues about post burial activities The last two decades have seen a rapid rise in interest in the study of post depositional practices in graves which has now developed into a new subfield within mortuary archaeology This follows a long tradition of neglect with disturbed graves previously regarded as interesting only to the degree they revealed evidence of the original funerary deposit This book explores past human interactions with mortuary deposits delving into the different ways graves and human remains were approached by people in the past and the reasons that led to such encounters The primary focus of the volume is on cases of unexpected interference with individual graves soon after burial re encounters with human remains not anticipated by those who performed the funerary rites and constructed the tombs However a first step is always to distinguish these from natural and accidental processes and methodological approaches are a major theme of discussion Interactions with the remains of the dead are explored in eleven chapters ranging from the New Kingdom of Egypt to Viking Age Norway and from Bronze Age Slovakia to the ancient Maya Each discusses cases of re entries into graves including desecration tomb re use destruction of grave contents as well as the removal of artefacts and human remains for reasons from material gain to commemoration symbolic appropriation ancestral

rites political chicanery and retrieval of relics The introduction presents many of the methodological issues which recur throughout the contributions as this is a developing area with new approaches being applied to analyze post depositional processes in graves

Bonds of the Dead Mark Michael Rowe, 2011-09-30 Despite popular images of priests seeking enlightenment in snow covered mountain temples the central concern of Japanese Buddhism is death For that reason Japanese Buddhism's social and economic base has long been in mortuary services a base now threatened by public debate over the status treatment and location of the dead *Bonds of the Dead* explores the crisis brought on by this debate and investigates what changing burial forms reveal about the ways temple Buddhism is perceived and propagated in contemporary Japan Mark Rowe offers a crucial account of how religious political social and economic forces in the twentieth century led to the emergence of new funerary practices in Japan and how as a result the care of the dead has become the most fundamental challenge to the continued existence of Japanese temple Buddhism Far from marking the death of Buddhism in Japan Rowe argues funerary Buddhism reveals the tradition at its most vibrant Combining ethnographic research with doctrinal considerations this is a fascinating book for anyone interested in Japanese society and religion
