Gravity And Grace Reflections And Provocations:

Gravity and grace : reflections and provocations Joseph ; Deloff Sittler (Linda-Marie, eds),1986 Gravity and Grace Joseph Sittler,2004-11-15 This newly revised edition provides insights from one of the leading Lutheran theologians of the twentieth century The essays and reflections gathered in this volume provoke readers to think about and discuss topics such as risk and faith nature and grace the Word of God and genuine theology real education the beauty and meaning of language necessary personal choices aging and social issues Study questions are provided to encourage group discussion **Creation and Salvation** E. M. Conradie,2012 Christians trying to save the planet have to relate creation with salvation This volume explores the ways in which this task is approached by a wide range of recent theological movements **Doctrine in Shades of Green** Andrew J. Spencer,2022-01-13 How we come to our conclusions about ethical issues matters as much as the specific policies or practices we commend This book argues that four key doctrines form a theological perspective for environmental ethics They are the key ideas upon which people build their ethics of the environment By looking at the doctrines of revelation creation anthropology and eschatology we can find points of contact to work together more effectively for the common good and have more meaningful debates when our positions differ This book uses examples from four different theological positions ecotheology theological liberalism fundamentalism and evangelicalism to show that a creation positive ethic is possible from all of these positions and it explores why people who stand within various theological streams may engage in environmental issues in diverse ways **Before God** George W. Stroup,2004 Many Christians today have experienced a loss of enormous significance they no longer understand their daily lives to be lived before God This timely work traces the development and implications of this loss and argues for its recovery In comparing contemporary Christians with believers of previous eras author George Stroup sees an eclipse of life lived before God This eclipse is tragic because the Bible presupposes human life as a daily personal relationship with God Stroup here offers help by exploring anew the biblical view that Jesus Christ models most clearly what life lived before God and neighbor looks like He then suggests that describing Christian life as gratitude naturally evokes a sense of life lived before God The book concludes by examining whether life before God requires a sense of God's presence and whether it is possible to live before God even in those times when he seems to be absent Offering thought provoking analysis of modern faith and sound direction for spiritual renewal Before God is perfect for churches study groups pastors and individuals pursuing genuine discipleship **Manifestations of Grace** Elizabeth Dreyer,1990 This lively and wonderful book probes the presence of grace Grace is everywhere garners the timeless teachings of the New Testament and theologians and discusses grace in the light of contemporary beliefs and needs **The Eloquence of Grace** James M. Childs Jr.,Richard Lischer,2012-10-12 Joseph A Sittler 1904 1987 was one of the most influential theologians of the twentieth century distinguished for his pioneering work in ecology and for his preeminence as a preacher He gave both the Beecher Lectures at Yale and the Noble Lectures at Harvard As the preacher s

theologian Sittler approached the interpretation of Scripture with a clear understanding of current critical scholarship but also in the freedom of the gospel at the center of Scripture and with the humility of a theologian of the cross In following the trajectory of the text into the preaching situation he gave a lively timeless and eloquent expression to the fact that the interpretation of texts is in the service of proclamation This collection of readings from Sittler s rich legacy contains a great many presentations and sermons that have never before appeared in print Theologically serious preaching close attention to language engagement with the best of sacred and secular culture and a deep respect for the text all characteristics of Sittler s work are the sort of features that continue to edify They remain as benchmarks for good preaching even as styles and contexts evolve

Evocations of Grace Joseph Sittler, 2000 Foreword by Martin E Marty As early as 1954 well before such popular books as Rachel Carson s *Silent Spring* the influential Lutheran theologian Joseph Sittler wrote on the need to think about a theology for earth Perhaps most famous for his eloquent and provocative address *Called to Unity* given at the 1961 World Council of Churches in New Delhi Sittler prophetically and insistently gave voice to what he called ecological commitment as theological responsibility *Evocations of Grace* introduces a new generation of readers to the thought of Joseph Sittler Gathering ten of Sittler s seminal works works foundational to the field yet unavailable until now the volume conveys Sittler s powerfully argument for the vital connection between Christian theology ethics and the natural world In an area where so much writing tends to be drearily repetitious Sittler even forty years later remains a fresh voice His proposal for a cosmic christology and his clarion call for the care of the earth continue to shape current eco theological reflection The book also includes a comprehensive Sittler bibliography and original essays by editors Steven Bouma Prediger and Peter Bakken that assess Sittler s pioneering contribution to environmental ethics Intended for anyone interested in the relationship between Christian faith and the environment *Evocations of Grace* provides the necessary perspective for thinking seriously about the earth and our responsibility to it

Development and Justice Rajula Annie Watson, 2004 Restoring the health of the land is indispensable not only because it is the ground of our sustenance and survival but also land has in itself the inherent worth This book challenges humanity s indulgence and activities of development science and technology and insists for human responsibility and moral duties towards the land the sustaining mother earth which is abused ransacked of its wealth and ignored of its intrinsic value The study attempts to bring together perspectives and values that are important for preserving the rights of the land and proposes the contour of a land ethic

Middleton, Peter Bien, 1996 Argues that while Nikos Kazantzakis may have occupied the so called borderlands between belief and unbelief throughout much of his career he nonetheless possessed or was possessed by an intense awareness of the sacred These 11 essays analyze in detail Kazantzakis s lifelong struggle to give voice
