Hunt For The Golden Langur:

Hunt for the Golden Langur A. K. Shrikumar, 1990-01-01 **The Swamp** A. K. Shrikumar, 2008 **Ethnoprimateology** Kerry M. Dore, Erin P. Riley, Agustín Fuentes, 2017-02-23 A how to guide for ethnoprimateological research in the Anthropocene offering an inside look at the latest research in the field *The Colobines* Ikki Matsuda, Cyril C. Grueter, Julie A. Teichroeb, 2022-02-24 Covering colobine biology behaviour ecology and conservation this book summarises current knowledge of this fascinating group of primates *Primates* Kurt Benirschke, 2012-12-06 This conference represents the first time in my life when I felt it was a misfortune rather than a major cause of my happiness that I do conservation work in New Guinea Yes it is true that New Guinea is a fascinating microcosm it has fascinating birds and people and it has large expanses of undisturbed rainforest In the course of my work there helping the Indonesian government and World Wildlife Fund set up a comprehensive national park system I have been able to study animals in areas without any human population But New Guinea has one serious drawback it has no primates except for humans Thus I come to this conference on primate conservation as an underprivileged and emotionally deprived observer rather than as an involved participant Nevertheless it is easy for anyone to become interested in primate conservation The public cares about primates More specifically to state things more realistically many people care some of the time about some primates Primates are rivaled only by birds pandas and the big cats in their public appeal For some other groups of animals the best we can say is that few people care about them infrequently For most groups of animals no one cares about them ever *The Book Review*, 1996 **China Geographer** Clifton W. Pannell, 2019-04-08 This book seeks to promote better understanding of China through improved knowledge of its geography It presents papers on a variety of environmental topics in China ranging from earthquake hazards to nature preserves New research techniques and analytical methodologies are also presented **Indian Hotspots** Chandrakasan Sivaperuman, Krishnamoorthy Venkataraman, 2018-02-01 This book offers a comprehensive account of India's four biodiversity hotspots the Himalaya Indo Burma Western Ghats and Sri Lanka and Andaman and Nicobar Islands With a focus on tropical rainforests it includes more than 30 chapters covering different vertebrate fauna e.g. fishes amphibians reptiles birds and mammals as well as topics such as conservation and management aspects Written by experts in the field of biodiversity conservation and management it offers ample new insights into a number of subjects related to the faunal communities of tropical forest ecosystems providing a valuable resource for conservationists and researchers in the field of flora and fauna diversity *Stories from Ithihamala* A. K. Shrikumar, 2001 Ithihamala Is A Collection Of Legends In Malayalam Numbering Over A Hundred Written By Kottarathil Sankunni A Versatile Scholar The Stories Cover A Vast Spectrum Of Life Personalities Events And Skills Including Magic Medicine Illusion And So On The Stories Are Remarkable For Their Simplicity Lucid Style Richness Of Humour And Charm The Stories Give A Deep Insight Into The Customs And Traditions Of Kerala This Volume Contains Select Stories From The Original Classic Highly Recommended For Children Of

All Ages **Beacham's Guide to International Endangered Species** Walton Beacham, Kirk H. Beetz, 1998 This new set is another entry in the growing collection of Beacham's guides to endangered threatened and extinct species Previous volumes include the one volume World Wildlife Fund Guide to Extinct Species of Modern Times RBB S 1 97 and the four volume Official World Wildlife Fund Guide to Endangered Species of North America 1994 The current set treats 351 species mammals only and appears to be derived from the same database of information presented in Beacham's International Threatened Endangered and Extinct Species on CD ROM RBB My 15 97 which covers 1 400 species Data are provided on mammalian species listed as threatened or endangered by the USFWS U S Fish and Wildlife Service A third volume will cover all other foreign species listed by this agency A master list of protected species is available at FWS Web site at risk by the IUCN The World Conservation Union or by CITES Convention on International Trade in Endangered Species of Wild Fauna and Flora There is an entry for the previously endangered eastern gray kangaroo to show the process by which one species has been successfully recovered The authors use the above mentioned organizations as the authorities for their work For example in the introductory section on Gorillas and Orangutans they have chosen to follow the USFWS designation for endangered species and the IUCN's placement of apes in the Pongidae family rather than Hominidae Each set of species accounts includes a general introductory section giving the popular name the family and subfamily scientific names and a general description of the characteristics of the species These sections often include information on threats and are especially revealing telling us for example that mountain gorillas are killed occasionally by carnivores but their main predator is man The specific accounts follow in typical Beacham format with scientific and familiar names a color photo and an accompanying list giving status date listed family description habitat food reproduction threats and range Short paragraphs expand on these themes and add information on conservation and recovery efforts Several pages of references a glossary and a useful country index complete volume two Sponsored by the IUCN Encyclopedia of Endangered Species RBB F 1 95 is handy because it includes mammals birds reptiles amphibians fish invertebrates and plants in one volume However the black and white photographs do not compare to those in the Beacham volumes or in the ten volumes of Marshall Cavendish's Endangered Wildlife of the World RBB My 1 93 The latter is best suited for young readers whereas Beacham guides are suitable for any age level in any library collecting material on endangered species The photographs on the Beacham CD ROM are the ones used in the print volumes but are much less clear The CD ROM enables users to move around in the database via hyperlinks However at this time the books are easier to use because of the confusing structure of the user interface on the disk 1 085p *The Langurs of Abu* Sarah Blaffer Hrdy, 1980 The Langurs of Abu will for many years remain one of the major studies of wild primates both for its observational and theoretical content Alison Jolly Sexual combat is not a monopoly of the human species As Sarah Blaffer Hrdy argues in this spellbinding book war between male and female animals has deep roots in evolutionary history Her account of family life among hanuman langurs the black faced gray monkeys

inhabiting much of the Indian subcontinent is written with force wit and at times sorrow Male hanumans in pursuit of genetic success routinely kill babies sired by their competitors The mothers of endangered infants counter with various stratagems to deceive the males and prevent destruction of their own offspring Competition and selfishness are dominant themes of langur society Competition among males for access to females competition among females for access to food resources and disregard by one female for the well being of another's infant these are some very common examples Yet there are also moments of heroic self sacrifice as when an elderly female rushes to defend her troop and its babies from an invading infanticidal male The Langurs of Abu is the first book to analyze behavior of wild primates from the standpoint of both sexes It is also a poignant and sophisticated exploration of primate behavior patterns from a feminist point of view This book may inspire controversy it will certainly be read with pleasure by anyone interested in animal behavior Richly illustrated with photographs seven in full color Threatened and Recently Extinct Vertebrates of the World Matthew

Richardson,2023-03-09 Habitat loss and degradation are currently the main anthropogenic causes of species extinctions The root cause is human overpopulation This unique volume provides for the very first time a comprehensive overview of all threatened and recently extinct mammals birds reptiles amphibians and fishes within the context of their locations and habitats The approach takes a systematic examination of each biogeographic realm and region of the world both terrestrial and marine but with a particular emphasis on geographic features such as mountains islands and coral reefs It reveals patterns useful in biodiversity conservation helps to put it all into perspective and ultimately serves as both a baseline from which to compare subsequent developments as well as a standardization of the way threatened species are studied **An**

Introduction to Primate Conservation Serge A. Wich,Andrew J. Marshall,2016 This book provides a comprehensive and state of the art synthesis of research principles and applied management practices for primate conservation **5,000**

Awesome Facts About Animals National Geographic,2022-09-06 Bursting with fascinating fun tastic facts this treasure trove of all things animals leaves no habitat unexplored or unusual animal ability unmentioned Ever wonder how smart a chicken is Why a tiny island is home to thousands of venomous snakes What sound a rhino makes when it's happy Find these answers and 4 997 more in this captivating and colorful collection Featuring vibrant photography and a bold eye catching design this treasure trove is perfect for both the casual browser and the truly fact obsessed **Indian Art & Culture Book**
