Hunted Children:

Children's Attitudes, Knowledge and Behaviors Toward Animals Stephen R. Kellert, 1983 The basic objectives of this research which involved children in the 2nd 5th 8th and 11th grades were to describe children's uses and perceptions of animals and to discern possible developmental stages in the evolution of attitudes toward animals Personal interviews were conducted with 267 children from 16 public schools randomly selected from urban small city suburban and rural areas of the state of Connecticut Three major developmental stages in the evolution of children's perceptions of animals were found The first stage occurring from the 2nd to 5th grade was characterized by a dramatic increase in emotional concern and general affection for animals Since very young children were the most exploitative harsh and unfeeling of all children in their attitudes toward animals environmental programs should focus on the affective realm The transition from fifth to eighth grades witnessed the second major developmental stage a major expansion in children's intellectual and cognitive understandings of animals Therefore factual learning should be emphasized at this stage The third developmental stage occurred between 8th and 11th grades during which time children's ethical concern for the welfare and kind treatment of animals increased dramatically This stage offers the best opportunity for teaching about ethical relationships to animals and the concepts of ecology and wildlife management RM

Haunted Children Arthur F. Roemmelt, 1998-08-27 Relating stories of his years as a child psychiatrist the author argues that what essentially is troubling many children is better confronted in therapy rather than treated with medications

The Lifeways of Hunter-Gatherers Robert L. Kelly, 2013-04-15 In this book Robert L. Kelly challenges the preconceptions that hunter gatherers were Paleolithic relics living in a raw state of nature instead crafting a position that emphasizes their diversity and downplays attempts to model the original foraging lifeway or to use foragers to depict human nature stripped to its core Kelly reviews the anthropological literature for variation among living foragers in terms of diet mobility sharing land tenure technology exchange male female relations division of labor marriage descent and political organization Using the paradigm of human behavioral ecology he analyzes the diversity in these areas and seeks to explain rather than explain away variability and argues for an approach to prehistory that uses archaeological data to test theory rather than one that uses ethnographic analogy to reconstruct the past

Cruel World Lynn H. Nicholas, 2009-12-08 In this riveting powerful narrative Lynn Nicholas shows how children under the Nazis became mere objects available for use in the service of the totalitarian state Nicholas recounts the euthanasia and eugenic selection racist indoctrination kidnapping and Germanization mass executions and slave labor to which the Nazis subjected Europe's children She also captures the uprooted children's search for their families in the aftermath of the war A disturbing and absolutely necessary work *Cruel World* opens a new chapter in World War II studies From the Trade Paperback edition

Children's Literature M.O. Grenby, 2014-04-14 Provides a thorough history of British and North American children's literature from the 17th century to the present day Now fully revised and updated this new edition includes a new

chapter on illustrated and picture books and includes 8 illustrations nbsp an expanded glossary an updated further reading section Children s Literature traces the development of the main genres of children s books one by one including fables fantasy adventure stories moral tales family stories school stories children s poetry and illustrated and picture books Grenby shows how these forms have evolved over 300 years and asks why most children s books even today continue to fall into one or other of these generic categories Combining detailed analysis of particular key texts and a broad survey of hundreds of books written and illustrated for children this volume considers both long forgotten and still famous titles as well as the new classics of the genre all of them loved by children and adults alike but also fascinating and challenging for the critic and cultural historian Key Featuresnbsp Broad historical rangenbsp Coverage of neglected as well as well known textsnbsp Focus on the main genres of children s literaturenbsp Thoroughly up to date in terms of primary texts and critical material

Rescue and Flight Susan Elisabeth Subak,2010-05-01 When Susan Elisabeth Subak discovered that members of the Unitarian Church had helped her Jewish father immigrate to the United States she was unaware of the impact the organization had made during World War II After years of research Subak uncovers the little known story of the Unitarian Service Committee which rescued European refugees during World War II and the remarkable individuals who made it happen The Unitarian Service Committee was among the few American organizations committed to helping refugees during World War II The staff who ran the committee assisted those endangered by the Nazi regime from famous writers and artists to the average citizen Part of a larger network of American relief workers the Unitarian Committee helped refugees negotiate the official and legal channels of escape and when those methods failed the more complex underground channels From their offices in Portugal and southern France they created escape routes through Europe to the United States South America and England and rescued thousands often at great personal risk *Ages and Abilities: The Stages of Childhood and their Social Recognition in Prehistoric Europe and Beyond* Katharina Rebay-Salisbury,Doris Pany-Kucera,2020-10-08 This volume explores social responses to stages of childhood from the late Neolithic to Classical Antiquity in Central Europe and the Mediterranean Comparing osteological and archaeological evidence as well as integrating images and texts authors consider whether childhood age classes are archaeologically recognizable Negotiating the Livelihoods of Children and Youth in Africa's Urban Spaces Michael Bourdillon,2012-09-28 This book deals with problems facing children and youth in African cities today African populations have high growth rates and consequently relatively high proportions of young people Population growth in rural areas has stretched resources leading to urban migration and a rapid growth of cities Economies have not grown apace with the population and in some countries economies have even shrunk The result is a severe lack of resources in cities to meet the needs of the growing populations shown in high unemployment inadequate housing poor services and often extreme poverty All the essays in this book draw attention to such urban environments in which children and youth have to live and survive The title of this book speaks of negotiating livelihoods The concept of livelihood has been

adopted to incorporate the social and physical environment together with people's responses to it. It considers not only material but also human and social resources including local knowledge and understanding. It thus considers the material means for living in a broader context of social and cultural interpretation. It therefore does not deal only with material and economic existence but also with leisure activities, entertainments and other social forms of life developed by young people in response to the dictates of the environment. The book contains country-specific case studies of the problems faced by youths in many African cities, how they develop means to solve them and the various creative ways through which they improve their status both economically and socially in the different urban spaces. It recognizes the potentials of young people in taking control of their lives within the constraints imposed upon them by the society. This book is a valuable contribution to the field of child and youth development and a useful tool for parents, teachers, academics, researchers as well as government and non-government development agencies.

The Sister Who Ate Her Brothers: And Other Gruesome Tales Jen Campbell, Adam de Souza, 2021-11-23 Jen Campbell's collection of terrifyingly gruesome tales lends a modern edge to fairy tale collections for young readers. Drawing on her extensive knowledge of fairy tale history, Campbell's stories undo the censoring, gender stereotyping and twee endings of more modern children's fairy tales to return both classic and little-known stories to their grim versions whilst celebrating a diverse range of characters. Featuring 14 short stories from around the globe, *The Sister Who Ate Her Brothers* is illustrated in a contemporary style by Canadian comic artist Adam de Souza. De Souza's brooding illustrations are a highly original blend of 19th-century Gothic engravings and moody film noir graphic novels. Beautifully produced in a hardback format with a rose gold ribbon marker, *The Sister Who Ate Her Brothers* is a truly thrilling gift.

Children's Literature Kimberley Reynolds, 2011-10-06 Children's literature takes many forms: works adapted for children in antiquity, picture books and pop-ups, and now includes the latest online games and eBooks. This vast and amorphous subject is both intimately related to other areas of literary and cultural investigation but also has its own set of concerns, issues and challenges. From familiar authors including Beatrix Potter and Roald Dahl, classic books such as *Pooh*, *Alice in Wonderland* and *The Secret Garden* to modern works including *Harry Potter* and the *Twilight* series, this Very Short Introduction provides an overview of the history of children's literature as it has developed in English whilst at the same time introducing key debates, developments and figures in the field. Raising questions about what shape the future of literature for children should take and exploring the crossover with adult fiction, Reynolds shows that writing for children, whether on page or screen, has participated in shaping and directing ideas about culture, society and childhood.

ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas and enthusiasm to make interesting and challenging topics highly readable.

Demonology and Witch-Hunting in Early Modern Europe Julian Goodare, Rita Voltmer, Liv Helene Willumsen, 2020-08-11 Demonology the intellectual study of demons and their powers contributed to the prosecution of thousands of witches But how exactly did intellectual ideas relate to prosecutions Recent scholarship has shown that some of the demonologists concerns remained at an abstract intellectual level while some of the judges concerns reflected popular culture This book brings demonology and witch hunting back together while placing both topics in their specific regional cultures The book's chapters each written by a leading scholar cover most regions of Europe from Scandinavia and Britain through to Germany France and Switzerland and Italy and Spain By focusing on various intellectual levels of demonology from sophisticated demonological thought to the development of specific demonological ideas and ideas within the witch trial environment the book offers a thorough examination of the relationship between demonology and witch hunting *Demonology and Witch Hunting in Early Modern Europe* is essential reading for all students and researchers of the history of demonology witch hunting and early modern Europe

Roman Children's Sarcophagi Janet Huskinson, 1996 This book is the first major study of the themes which were used in the decoration of sarcophagi made for children in Rome and Ostia from the late first to early fourth century AD It provides a selective catalogue of examples of each type followed by discussion of how these fit into the general pattern This allows certain themes to be identified which are virtually exclusive to children's sarcophagi The second part of the book discusses the choice of subjects and how these reflect the standing of children in Roman society to what extent for instance was childhood shown as a differentiated stage of life or was it dominated by aspirations of the adult world How is the death of a child treated in art There are separate sections on the role of workshops and customers in the development of child specific imagery and on material from the early Christian era providing some interesting differences resulting from differing attitudes towards children and beliefs about life and death

Pagan Themes in Modern Children's Fiction P. Bramwell, 2009-03-31 Applying a range of critical approaches to works by authors including Susan Cooper Catherine Fisher Geraldine McCaughrean Anthony Horowitz and Philip Pullman this book looks at the formative and interrogative relationship between recent children's literature and fashionable but controversial aspects of modern Paganism

From Hunting to Drinking David McKnight, 2003-09-02 Based on extensive ethnographic fieldwork this is a vital addition to the literature on alcohol use and problem drinking social change and postcolonialism From

Hunting to Drinking reveals the social change witnessed over a period of 30 years by an anthropologist on Mornington Island off the North Queensland Coast Australia most notably the devastating effects that alcohol has had on this community

The Fox-Hunting Controversy, 1781-2004 Allyson N. May, 2016-03-16 August 1781 saw the publication of a manual on fox hunting that would become a classic of its genre Hugely popular in its own day Peter Beckford's *Thoughts on Hunting* is often cited as marking the birth of modern hunting and continues to be quoted from affectionately today by the hunting fraternity Less stressed is the fact that its subject was immediately controversial and that a hostile review which appeared on the heels of the manual's publication raised two criticisms of fox hunting that would be repeated over the next two centuries fox hunting was a cruel sport and a feudal anachronistic one at that This study explores the attacks made on fox hunting from 1781 to the legal ban achieved in 2004 as well as assessing the reasons for its continued appeal and post ban survival Chapters cover debates in the areas of class and hunting concerns over cruelty and animal welfare party politics the hunt in literature and nostalgia By adopting a thematic approach the author is able to draw out the wider social and cultural implications of the debates and to explore what they tell us about national identity social mores and social relations in modern Britain *Publications of the Children's Bureau* United States. Children's Bureau, 1922 *A Rescuer's Story* Tela Zasloff, 2003-10-15 In telling Pierre Charles Toureille's story Tela Zasloff also describes the wide ranging network of Protestant pastors and lay people in southern French villages who participated in an aggressive rescue effort She delves into their motivations including their Huguenot heritage as members of a religious minority
