practice This is the main question addressed in this book as Consensus on Hyperthermia for the 1990s The book includes 28 presented papers and 25 invited chapters from some of the leading experts in the field Their basic mechanisms of action were physics principles treatment quality assurance and especially clinical indications **Hyperthermia and Cancer**

Hornback,Robert E. Shupe,1984 Vol 2 Author Ned Hornback with assistance from Robert E Shupe **Hyperthermia and the Therapy of Malignant Tumors** Christian Streffer,2012-12-06 Tumour therapy depends essentially on being able to destroy the clonogenic activity of tumour cells while keeping the damage to the normal tissue low Clinical experience shows that tumour response varies greatly even if tumours with the same localisation clinical and histopathological staging are compared Some tumours appear to be resistant to conventional radiotherapy X rays y rays or fast electrons or chemotherapy In these cases new therapy modalities are necessary Combined therapy modalities seem to have advantages for some resistant tumours one possibility of such a treatment is to combine radiotherapy or chemotherapy with hyperthermia This means that the local tumour the tumour region or even the whole body of the patient has to be heated to temperatures between 40 to 45 C in case of whole body hyperthermia to 42 C maximal for a certain time usually 30 60 min are adequate Hyperthermia has a long tradition in medicine as a treatment modality for various diseases Inscriptions of the old Egyptians and texts of the Greeks have pointed out its importance Usually whole body hyperthermia has been used by the induction of fever Local hyperthermia began around 1900 when Westermarck treated unresectable cervix carcinomas with hot water in a metallic coil By the beginning of this century an increase of radiation effects was hypothesised with hypothermia and later observed However only in the 1960s and 1970s were systematic investigations started which showed radiosensitisation and chemosensitisation by hyperthermia in cells and tissues including tumours HYPERTHERMIA IN CANCER TREATMENT,2020 *Hyperthermia in Cancer Treatment* ,2004
