Lopez,

Sr.,2001-03-17 *Fighter Pilot's Heaven* presents the dramatic inside story of the American military's transition into the jet age as told by a flyer whose life depended on its success. With colorful anecdotes about fellow pilots as well as precise technical information, Donald S. Lopez describes how it was to be behind the stick as a test pilot from 1945 to 1950 when the U.S. military was shifting from war to peacetime operations and from propeller to jet aircraft. An ace pilot who had served with Gen. Claire Chennault's Flying Tiger Fighter Group, Lopez was assigned at the close of World War II to the elite Proof Test Group of the Air Proving Ground Command, located at Eglin Field, later Eglin Air Force Base, in Florida. The group determined the operational suitability of Air Force weapons systems and aircraft and tested the first operational jet, the P-80 Shooting Star. Jet fighters required new techniques, tactics, and weaponry. Lopez recounts historic test flights in the P-59, P-80, and P-84, among other planes, describing complex combat maneuvers, hair-raising landings in unusual positions, and disastrous crashes and near-crashes. This memoir is peppered with lively accounts of many pilots and their colleagues, revealing how airmen coped with both exhilarating successes and sometimes tragic failures. **The U.S. Combat Aircraft Industry, 1909-2000**

Mark A. Lorell,2003-10-29 Drawing on primary and secondary sources on the aircraft industry, this report provides a brief survey of industry structure, innovation, and competition in the U.S. fixed-wing combat aircraft industry from its earliest days to the present. It supports a much larger research effort examining the future of the structure, innovation, and competition of the U.S. military aircraft industrial base that responds to congressional concerns about that future. **Lost Fighters** William Holder,2006-12-06 This book by Bill Holder discusses the Lost Fighter turbojet and turboprop propulsion systems of the exciting jet fighter era in the United States since the mid-1940s. Until now, very little has been published about these fascinating fighter activities that for a variety of reasons did not reach fruition. Covering fighters that did not reach beyond an artist's concept stage to those that were cancelled after an evaluation of flight capabilities to others that were cast aside after losing a fly-off competition, this book makes use of previously unpublished primary source material. It provides a coherent picture of U.S. jet fighter development and evolution. This book also includes hundreds of photos, drawings, and illustrations of the many Lost Fighters. The Oil Campaign 1944-45 Steven J. Zaloga, 2022-06-23 A new illustrated history of one of the key air campaigns of late World War II the American effort to cripple Germany's oil production and grind its armed forces to a halt With retreating German forces losing their oilfields on the Eastern Front Germany was reliant on its own facilities particularly for producing synthetic oil from coal However these were within range of the increasingly mighty Allied air forces In 1944 the head of the US Strategic Air Forces General Carl Spaatz was intent on a new campaign that aimed to cripple the German war machine by depriving it of fuel The USAAF's Oil Campaign built up momentum during the summer of 1944 and targeted these refineries and plants with its daylight heavy bombers Decrypted German communications made it clear that the Oil Campaign was having an effect against the Wehrmacht Fuel shortages in the autumn of 1944 forced the Luftwaffe to ground most of its combat units except for fighters involved in the defense of the Reich Fuel shortages also forced the Kriegsmarine to place most of its warships in harbor except for the U boats and greatly hampered German army campaigns such as the Battle of the Bulge in December 1944 45 This fascinating book packed with key photos and illustrations examines the controversies and debates over the focus of the US bombing campaign in the final year of the war and the impact it had on the war effort overall *Essex-Class Aircraft Carriers 1945-91* Mark Stille, 2022-09-15 A history of the enduring Essex class ships the US Navy's finest and most numerous fleet carrier during World War II which were modernized repeatedly and served with

distinction The Essex class was the USN's war winning ship class of the Pacific War Of the 24 ships completed 14 saw action making the Essex class the largest class of fleet aircraft carriers ever built These ships had a fine balance of striking power protection and speed and were modernized during and after the war There were five distinct programs carried out adding not only angled flight decks for jet operations but repeated upgrades to sensors weapons and equipment Essex class carriers were used in a number of roles and provided the vast majority of US Navy air power in the Korean War and a sizeable proportion of air power in the Vietnam conflict However as the super carriers began to enter service in the early 1960s the Essex class was relegated to secondary roles a single Essex carrier served until 1991 as the US Navy's training carrier Using detailed artwork and photos this book provides an in depth portrait of this important and enduring class of ship and looks at its development and modifications while considering the many and varied actions it took part in **ASTIA Subject**
