American Journal of Islam and Society (AJIS) - 40th Anniversary Special Issue - Volume 41 Issues 1

Asyraf Wajdi Dusuki, Nurdianawati Irwani Abdullah, Akhmad Akbar Susanto, Emad Hamdeh, Glenn E. Perry, Jasmin Zine, Fadel Abdallah, Sherman A. Jackson, Amber Haque, Rosnani Hashim, For forty years AJIS has been a trusted platform for researchers, scholars, and practitioners serving as a conduit for the exchange of ideas, the dissemination of cutting-edge research, and the cultivation of intellectual dialogue. Many of us found this journal a space for ruminating, discussing, and developing our own narratives on our Islamic heritage and what it means in the contemporary world. Especially compared to anti-Islamic biases in other corners of academia, AJIS is a coming home. One constant throughout the past four decades is the journal's commitment to scholarship that documents and explores Islam's rich religious, intellectual, legal, philosophical, and social heritages. The assumption is that these various perspectives have meaningful things to say about the human condition and our place in the world. Debate, discussion, and disagreement all appear in these pages but always grounded in an underlying steadfastness that Islam is a faith tradition that is not obsolete; that Muslims can contribute positively to humanity's betterment. That said, the journal is not a place of religious homilies. This is an academic journal with a double-blind peer review process. Articles that are published thus pass muster in the discipline in which they conduct their research. Let us thank the authors who have entrusted us with their groundbreaking research, pushing the boundaries of knowledge and enriching our understanding of critical issues in our disciplines. Let us thank the journal's editors, editorial boards, diligent reviewers, and committed staff members who have meticulously upheld the journal's reputation for excellence, contributing to its sustained success.

Religious Theories of Personality and Psychotherapy Frank De Piano, Ashe Mukherjee, Scott Mitchel Kamilar, Lynne M. Hagen, Elaine Hartsman, R. Paul Olson, 2012-12-06. Integrate spiritual traditions with psychological healing. In this fascinating volume, clinical practitioners of different religious traditions examine the same clinical case, offering insights, interventions, and explanations of transformation and healing. This practical approach allows them to explore broader issues of personality theory and psychology from the perspectives of various spiritual traditions: Hinduism, Buddhism, Taoism, Judaism, Christianity, and Islam. *Religious Theories of Personality and Psychotherapy* addresses both the practical issues of doing psychotherapy and the deeper need to relate psychology and

theology After providing a thorough introduction to the spiritual tradition each author presents a critical psychological theory of personality and psychotherapy grounded in that tradition The authors address the questions of what it means to be a person what causes human distress and how individuals experience healing Religious Theories of Personality and Psychotherapy offers profound insights into the urgent issues of human suffering and psychological transformation including theories of personality structure and human motivation the nature of experience and processes of change the dialectical relation of theology and psychology convergences and difference among the religious psychologies Marrying theory and practice spirit and psyche Religious Theories of Personality and Psychotherapy offers profound insights and effective interventions Mental health professionals clergy and scholars in religion cross cultural studies personality counseling and psychotherapy will find this breakthrough book a life changing experience and an invaluable resource Journal of Psychology and Judaism ,1994 *Internet Popular Culture and Jewish Values* Lawrence H. Sherlick,Junhao Hong,2008 Are the values of students and their teachers threatened each time they enter the uncharted waters of the Internet s popular culture content The Internet has indeed come of age and as was the case with traditional mass media the Internet has been increasingly examined for its positive and negative effects particularly on children What triggered the present study was a newspaper article that described a ban on computers and the Internet imposed in October 1999 on its followers by the Belz Hasidic an Israeli Ultra Orthodox or Haredi religious sect This edict was also endorsed by 30 leading Ultra Orthodox rabbis from various other religious communities in Israel Explaining that this original prohibition against computers and the Internet was later revised to permit computer use but continue the ban on Internet access the article noted the Belz Hasidic sect determined that computers have proved valuable in teaching the Bible and in running businesses The Internet however was declared out of bounds largely because the information it exposed conflicted with Ultra Orthodox principles rejecting modernity popular culture and especially its proliferation of links to pornographic sites This study examines the convergence of religion elementary education Internet technology and popular culture messages within Jewish elementary school classrooms in Israel This research examines the methods used by Israeli computer coordinators to manage the convergence of Jewish or humanistic values with potentially conflicting Internet generated popular culture messages It asks what values whether Jewish values or human values at the core of the Jewish educator s belief system are important to transmit to their students It questions what types of popular culture messages carried by the Internet conflict with these values More importantly this study surveys how educators and students evaluate these conflicting messages in relation to the values they hold and the manner in which these conflicts are managed This is an important book for those in communication education Jewish studies and sociology of religion **Psychotherapy Relationships that Work : Therapist Contributions and Responsiveness to Patients** John C. Norcross University of Scranton,2002-08-22 This book is the result of the American Psychological Association s Division of Psychotherapy Div 29 Task Force aimed at applying psychological science to the

identification and promulgation of effective psychotherapy Many efforts to improve therapy have focused on codifying evidence based treatments but in doing so have left the psychotherapeutic relationship behind Clinical experience and research findings underscore that the therapeutic relationship accounts for as much of the outcome as particular treatments This volume s 25 chapters identify the elements of effective therapy relationships and methods of customizing psychotherapy to each patient
