Multilingual Europe, Multilingual Europeans, 2015-06-29. Multilingualism is a crucial if often unrecognized marker of new European identities. In this collection of essays, we observe how a plurilingual and pluricultural political entity practices and theorizes multilingualism. We ask which types of multilingualism are defined, encouraged or discouraged at the level of official policies but also at the level of communities. We look at speakers of hegemonic or minority languages at travellers and long-term migrants or their children and analyse how their conversations are represented in official documents, visual art, cinema, literature, and popular culture. The volume is divided into two parts that focus respectively on Multilingual Europe and Multilingual Europeans. The first series of chapters explore the extent to which multilingualism is treated as both a challenge and an asset by the European Union; examine which factors contribute to the proliferation of languages; globalisation; the enlargement of the European Union; and EU language policies. The second part of the volume concentrates on the ways in which cultural productions represent the linguistic practices of Europeans in a way that emphasizes the impossibility to separate language from culture, nationality, but also class, ethnicity, or gender. The chapters suggest that each form of plurilingualism needs to be carefully analysed rather than celebrated or condemned.

Cantonese as Written Language Don Snow, 2004-10-01 Cantonese is the only dialect of Chinese which has developed a widely known and used written form It has played a role in publishing in the Guangdong region since the late Ming dynasty when various types of verses using Cantonese were published as mu yu shu wooden fish books In the early twentieth century

these dialect texts were joined by Cantonese opera scripts published as popular reading material. However, it was only after the end of the Second World War that written Cantonese came to be widely used in popular newspapers and magazines, advertising and in the private communications. Cantonese as Written Language examines this development in the broader context of diglossia and also of the patterns by which spoken vernaculars have developed written forms in other societies. Based on primary source research including interviews with publishers and writers who played an important role in the growth of written Cantonese, the author argues that this move of Cantonese into the realm of written language is closely associated with Hong Kong's distinct local culture and identity. The growth of the written vernacular also reflects the territory's evolving cultural distinctiveness from mainland China, first as a British colony and now as a Special Administrative Region of China.

Language and Superdiversity Karel Arnaut, Jan Blommaert, Ben Rampton, Massimiliano Spotti, 2015-12-22

A first synthesis of work done in sociolinguistic superdiversity, this volume offers a substantial introduction to the field and the issues and state of the art research papers organized around three themes: Sketching the paradigm, Sociolinguistic complexity, Policing complexity. The focus is to show how complexity rather than plurality can serve as a lens through which an equally vast range of topics, sites and issues can be tied together. Superdiversity captures the acceleration and intensification of processes of social mixing and fragmentation since the early 1990s as an outcome of two different but related processes: new post-Cold War migration flows and the advent and spread of the Internet and mobile technologies. The confluence of these forces have created entirely new sociolinguistic environments, leading to research in the past decade that has brought a mixture of new empirical terrain: extreme diversity in language and literacy resources, complex repertoires and practices of participants in interaction and conceptual challenges. *Language and Superdiversity* is a landmark volume bringing together the work of the scholars and researchers who spearhead the development of the sociolinguistics of superdiversity.
