Xavier Vila Moreno, 2012-11-09 Too small to be big but also too big to be really small medium sized language communities MSLCs face their own challenges in a rapidly globalising world where multilingualism and mobility seem to be eroding the old securities that the monolingual nation states provided The questions to be answered are numerous What are the main areas in which the position of these languages is actually threatened How do these societies manage their diversity both old and new Has state machinery really become as irrelevant in terms of language policy as their portrayals often suggest This book explores the responses to these and other challenges by seven relatively successful MSLCs so that their lessons can be applied more generally to other languages striving for long term survival *Community Languages* Michael G. Clyne, 1991 Without even considering the 150 Aboriginal languages still spoken Australia has an unparalleled mix of languages other than English in common usage languages often described by the term community Drawing on census data and other statistics this book addresses the current situation of community languages in Australia analysing which are spoken by whom and whereabouts It focuses on three main issues how languages other than English are maintained in an English speaking environment how the structure of the languages themselves changes over time and how the government has responded to such ethnolinguistic diversity At a time of unprecedented awareness of these languages within society and a realisation of the importance of multilingualism in

business this book makes a significant contribution to understanding the role of community languages in shaping the future of Australian society

Geographies of Knowledge and Imagination in 19th Century

Philological Research on Northern Europe Joachim Grage,Thomas Mohnike,2017-08-21 Comparative philology was one of the most prolific fields of knowledge in the humanities during the 19th century Based on the discovery of the Indo European language family it seemed to admit the reconstruction of a common history of European languages and even

mythologies literatures and people However it also represented a way to establish geographies of belonging and difference in the context of 19th century nation building and identity politics In spite of a widely acknowledged consensus about the principles and methods of comparative philology the results depended on local conditions and practices If Scandinavians were considered to be Germanic or not for example was up to identity politics that differed in Berlin Strasbourg Copenhagen and Paris The contributors here elaborate these dynamics through analyses of the changing and conflicting versions of imaginative geographies that the actors of comparative philology evoked by using Scandinavian literatures and cultures They also show how these seemingly delocalized scientific models depended on ever different local needs and practices Through this the book represents the first distinctly transnational dynamic geography and history of the philological knowledge of the North not only as a history of a scientific discourse but also as a result of doing and performing scientific work
