multilingualism sociolinguistics language education teacher education and applied linguistics **Language Education Policies in Multilingual Settings** Laura Gurney, Lakshman Wedikkarage, 2024-05-28 The volume provides grounded and contemporary insight into multilingual education from diverse perspectives stemming from the authors' epistemic, cultural and geographic positioning around the world in different educational milieus and will give both academic and practitioner audiences an up-to-date picture of multilingual education in the early 2020s. Multilingual education policies are continually implemented, re-evaluated and debated around the world from primary to tertiary education. Fundamentally, however, educational policies manifest in classroom practice: the language envisaged in policy becomes the languaging of practice as teachers, learners and stakeholders negotiate educational curricula together. Internal and external forces, from resourcing to the Internet to broader events such as pandemics and changes in government, shape the landscapes in which policies are enacted. The volume is extending the themes of the Multilingual Education Yearbook series in line with current developments in theory, research and practice. As such, this book provides a wealth of information to practitioners, teachers and teacher educators, researchers in applied linguistics and language education, postgraduate students in the field of applied linguistics and policymakers.

Multilingualism in European Language Education Cecilio Lapresta-Rey, Ángel Huguet, 2019-05-09 This book explores how different European education systems manage multilingualism. Each chapter focuses on one of ten diverse settings: Andorra, Asturias, the Basque Country, Catalonia, England, Finland, France, Latvia, the Netherlands and Romania, and considers how its education system is influenced by historical sociolinguistic and legislative and political processes and how languages are handled within the system, stressing the challenges and opportunities in each area of study. The chapters provide the reader with insights around three key aspects: the management of the guarantee of the rights of regional language minorities; the incorporation of the language background inherited by immigrants living in Europe, whether they are European citizens or not; and the need to promote the learning of international languages. Individually, the chapters offer deep insights into a specific education system, and together, the studies allow for a comparison and holistic understanding of multilingualism in European education.
