Abstract

The present study investigates the factors that influenced the English language learning/acquisition of nine multilingual university students who majored in English. Using the qualitative descriptive design and Sim's categories of English language learning factors, the participants narrated their formal and informal English language experiences through a summative diary and informal interview. In general, the results show the same set of key categories that are found in previous studies i.e., motivation, beliefs, autonomy, anxiety, language learning strategies, and instructional materials, activities, and facilities. However, the collection of specific narrations paints a different picture of these multilingual participants' English language learning experiences. Based on the results, recommendations are given to enhance the teaching and learning of English in multilingual and multicultural settings and the context of the present study. It is advised to use multilingual and multicultural approaches that assist English learning and acquisition both within and outside of the classroom.

Introduction

The factors influencing the acquisition and successful learning of English have been given considerable attention for instructional and business purposes. However, work in this area has continued to thrive to better comprehend the second and foreign language learners' experiences in using a second or third language successfully. Prominent work in this field advanced the view that language acquisition/learning success is an assembly of all the factors that provide linguistic input (Krashen, 1981) and at the same time carry information for the children to figure out linguistic parameters specific to a language (Chomsky, 1986). This means that

using a language competently is not only a result of the formal language program in schools but also a reflection of the vibrant display of language learning opportunities in informal settings outside the classroom (Castello, 2015; Matic, 2011).

In the case of the child's first language, Lee and Heinz (2016) explained that acquiring it appears relatively effortless. Among second or foreign language learners, however, some individuals enjoy greater success than others, and this is attributed to several factors. Yuefang (2019) categorized these factors into internal (age, attitude, personality, motivation, and first language proficiency) and

Language Experiences For All Students:

Language Experiences for All Students Nancy Hansen-Krening, 1982 Language Teachers' Stories from their Professional Knowledge Landscapes Lesley Harbon, Robyn Moloney, 2017-06-23

Language Teachers Professional Knowledge Landscapes is a collection of fourteen narratives from teachers of different languages at different school levels in different contexts across Australia. This volume brings together not simply language teacher stories but also more political stories of the problems associated with school programs and contexts. Highlighted through these stories are some of the major political issues in schools that impact language teachers' work and their students' success in sustained language study. The book is conceptually framed by the work of Clandinin and Connelly (1996) and their notion of levels of stories told by teachers about their classrooms: the secret, the sacred, and the cover stories. The term professional knowledge landscape is used to indicate how teachers can critically situate their work and thereby understand it better. The collection includes the stories of two outstanding primary language educators and a story of mixed success in a rural program in teaching the local Aboriginal language Ngarrabul. There are stories of frustration with policy failures, particularly in supporting the learning of Asian languages. Many of the teacher narrators ask the confronting question: What blocks language learning in Australia? They offer the strategies which they have developed that they see making a difference. Other narratives offer autoethnographic tracking of careers, for example as a teacher of Latin and Classics, Japanese, French, Spanish, Russian, and of teachers' ongoing vigour and creativity in advocacy. A number of teachers examine their own identity story for the intercultural learning which they then offer and extend in student learning. Consistently expressed is the need for teachers to take up individual responsibility while still being strongly supported by their professional community. It is us who make the difference, one teacher concludes. Supported by a strong Foreword by Canadian scholar F. Michael Connelly, this ground-breaking collection of narratives represents a form of social research in providing critical illustrations of the issues needing attention for national language education enhancement. It is the only extended inquiry into language teaching in the context of an active policy initiative environment and the first volume to address the language education landscape through the voices of active language teachers.

The Language Experience Approach to Literacy for Children Learning English Pamela J. T. Winsor, 2009-10-20. The instructional framework presented in this book is intended to help teachers provide all young children, but especially English language learners, with rich, meaningful, and interactive literacy instruction. Referred to as LEALE, the instruction is grounded in the traditional Language Experience Approach (LEA). It has been expanded to encompass principles and practices of research-based early literacy instruction as understood and presented in current professional literature. The approach is presented in an attractive

easily understood style that invites both beginning and experienced teachers to engage their students in literacy The LEALE instructional framework presented here grew out of the many happy hours that the author spent working with children and their teachers over the years Included are pictures and examples of classroom materials chart stories and journals from children in Belize Central America and children in urban centres in Alberta Canada **Literacy for All Students** Rebecca

provide for the care and the education of young children bear a great responsibility for their health development and learning. Despite the fact that they share the same objective to nurture young children and secure their future success, the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children. *CliffsNotes TExES: Generalist EC-6* American BookWorks Corporation, 2010-08-20. Teachers are intuitively aware of the connection between academic vocabulary and reading comprehension. Unfortunately, despite what we know about active instruction of vocabulary that will be retained by our students, teachers often assign vocabulary but rarely teach it well. The results are akin to a salesman who says about his product, "I sold it, but they didn't buy it." Greenwood provides teachers with the hows and whys of effective vocabulary instruction through the use of visual organizers, user-friendly appendixes, classroom vignettes, and simple, clear language encouraging professionals to truly engage their pupils. **Assessing Study Abroad** Victor Savicki, Elizabeth Brewer, 2023-07-03.
