- Is (isn't) present singular
- Are (aren't) present plural
- Was (wasn't) past tense
- Were (weren't) past tense
- Was (wasn't) past tense, plural

How To Calculate MLU

- Count morphemes in each utterance
- Divide number of total morphemes by number of utterances
- Compare MLU to chart

Counted Morphemes Examples

41. "I going to chess level at game!"
I I going to chess level at game! = 10 morphemes
42. "My brown foot!"
My brown foot! = 4 morphemes
43. "They going to do good!"
They going to do good! = 6 morphemes
44. "Go home!"
Go home! = 3 morphemes
45. "Is she it?"
Is she it? = 4 morphemes

MLU = 10 morphemes / 4 utterances = 2.5

MLU = # of Morphemes / # of Utterances

The Verbal Games of

Pre-school Children Susan Grohs Iwamura, 2022-11-21 Originally published in 1980 The Verbal Games of Pre school Children

states that in the course of acquiring language every child recognizes that verbal interaction is a powerful tool which can be used to interpret and manipulate the world During the last previous two decades developments in the study of both language acquisition and linguistic theory had begun to illustrate that the acquisition of a first language involves considerably more than the mere learning of grammatical structure This view of learning had led researchers gradually to see children as more than grammarians devising grammatical constructs The tendency at the time was to see the child as an active partner in what are essentially games of communication and invention during which the rules of usage as well as the rules of grammar are discovered This study is based on extensive and detailed observation of the verbal interaction of two pre school children and as such offers far reaching ideas and conclusions concerning the manner in which all children determine the role of language in their lives whilst simultaneously learning how to piece it together

Mental Capital and Wellbeing Cary L. Cooper, Usha Goswami, Barbara J. Sahakian, 2009-08-18 This major new reference

presents The Foresight Mental Capital and Wellbeing Project a UK Government project in the Government Office for Science

It offers a comprehensive exploration of how mental capital and wellbeing operate over the lifespan how experiences in the

family in school at work and following retirement augment or reduce mental capital and wellbeing and the impact that this has

for the individual and for the welfare and economic progress of the nation Mental Capital and Wellbeing comprises a series

of scientific reviews written by leading international scientists and social scientists in the field The reviews undertake

systematic analyses of the evidence base surrounding five key themes on which they propose future policies will have to be

based An internationally renowned team of Editors introduce each theme and draw together conclusions in terms of both policy and practice

Section 1 Mental Capital and Wellbeing Through Life Mental capital refers to the totality of an individual's cognitive and emotional resources including their cognitive capability, flexibility and efficiency of learning, emotional intelligence and resilience in the face of stress. The extent of an individual's resources reflects his or her basic endowment, e.g. genes and early biological programming, motivation and experiences, e.g. education, which take place throughout the life course. This section presents the very latest on the science of mental capital throughout life.

Section 2 Learning Through Life provides a coherent overview of a fast moving and complex field of policy and practice. Educational attainment has a considerable impact on physical and mental wellbeing both directly and indirectly by enabling people better to achieve their goals. The ability to continue learning throughout the lifespan is critical to a successful and rewarding life in contemporary societies.

Section 3 Mental Health and Ill Health draws together the most recent evidence about positive mental health as well as a range of mental disorders to consider their importance to the population and economy in terms of prevalence and disability and the wider burden on society.

Section 4 Wellbeing and Work It is estimated that 13 million working days are lost through stress each year costing the economy over 3.7 billion per annum. This theme explores those drivers that influence the nature and structure of work and the impact this has on employee wellbeing.

Section 5 Learning Difficulties This theme provides a cutting edge picture of how recent insights from genetics, cognitive and neuroscience improve our understanding of learning difficulties such as dyslexia, dyscalculia and attention deficit hyperactivity disorder. Reviews focus on how current research can contribute to early diagnosis and improved intervention.

Universals 2 Teilband **Political Transition in Cambodia 1991-99** David Roberts,2016-04-29 This book illustrates the limits to the 1990s UNTAC peacekeeping intervention in Cambodia and raises a critical challenge to the assumptions underpinning key tenets of the Liberal Project as a mechanism for resolving complex severe struggles for elite political power in developing countries The book highlights the limitations of externally imposed power sharing In the case of Cambodia the imagined effect was a coalition that would share power democratically However this approach was appropriate only for resolving the superpower conflict that had created Cambodia's war Rather than bringing long term peace to Cambodia Roberts argues it created the temporary illusion of a democratic system that in fact recreated the military conflict and housed it in a superficial coalition The book challenges assumptions regarding the inevitability of the globalization of liberalism as a means of ordering non western societies It explains the failure of democratic transition in terms of the impropriety and weakness of the plan which preceded it and in terms of the elite's traditional reliance on absolutism and resistance to the concept of Opposition
