Tyler Sasser,Emma K. Atwood,2024-02-22 This edited collection considers the task of teaching Shakespeare in general education college courses a task which is often considered obligatory perfunctory and ancillary to a professor s primary goals of research and upper level

Costigan,2010-11-01 Most pre service education students are enthusiastic about the progressive constructivist and student centered theory and practice advocated in many teacher education programs and by the National Council of Teachers of English Yet in actual day to day practice teachers often have trouble thinking of ways in which such student centered and constructivist practices in literacy instruction can be implemented in classrooms which are increasingly driven by high stakes tests increased accountability and mandated and even teacher proof scripted curricula Teaching Authentic Language Arts in a Test Driven Era provides a powerful and much needed counterargument to the assumption that test driven curricula preclude meaningful instruction and authentic student engagement within a Language Arts curriculum Providing teachers with the theoretical stances and pedagogicals tools to develop a Language Arts practice which can be personally rewarding as well as beneficial to students Teaching Authentic Language Arts in a Test Driven Era empowers teachers to be effective even within the confines of a testing and accountability driven curriculum

Shakespeare Quarterly, 2004 *Creative Teaching, Sustainable Learning* Ulrike Sievers, 2017-11-09 There are many books on foreign language teaching this book is different because it focuses on the learner and the learning process It starts from the social nature of interactive learning and locates learning in a community of learners one of whom is the teacher The conditions for lasting learning in the foreign language are the basis for the teaching methods These aim to provide a rich and shared learning context offer individualised support and scaffolding for learning and make the language the medium for learning what learners are interested in as developing persons It makes teachers into reflective researchers of their practice thus ensuring that teaching is an art a craft and a science The best learning occurs when teachers can read the effects of their teaching on the learning behaviour of the pupils and are able to adapt their approach to be inclusive of all learning types The approach carefully developed in this book takes foreign language teaching and learning to a new level Without losing touch with its origins in Waldorf pedagogy it also draws on contemporary learning theory Above all it is an authentic account of the learning journey of a committed and caring teacher **Learning to Teach English and the Language Arts** Peter Smagorinsky, 2020-04-16 Drawing together Smagorinsky's extensive research over a 20 year period *Learning to Teach English and the Language Arts* explores how beginning teachers' pedagogical concepts are shaped by a variety of influences Challenging popular thinking about the binary roles of teacher education programs and school based experiences in the process of learning to teach Smagorinsky illustrates through case studies in the disciplines of English and the Language Arts that teacher education programs and classroom school contexts are not discrete contexts for learning about teaching nor are each of these contexts unified in the messages they offer about teaching He explores the tensions not only between these contexts and others but within them to illustrate the social cultural contextual political and historical complexity of learning to teach Smagorinsky revisits familiar theoretical understandings including Vygotsky's concept development and Lortie's apprenticeship of observation to consider their implications for teachers today and to examine what teacher candidates learn during their teacher education experiences and how that learning shapes their development as teachers **Graduate Study for the Twenty-First Century** Gregory M. Colón Semenza, 2005-10-06 Many graduate students continue to be regarded as apprentices despite the fact that they are expected to design and teach their own classes serve on university committees and conference and publish regularly The Chronicle of Higher Education reports that the attrition rate for American Ph D programmes is at an all time high between 40% and 50% higher for women and minorities Of those who finish only one in three will secure tenure track jobs These statistics highlight waste of millions of dollars by universities and of time and energy by students Rather than teaching graduate students how to be graduate students then the guide prepares them for what they really seek a successful academic career **Teaching Language Arts** Carole Cox, 2008 Engaging readable student friendly and practical this text is built on a strong theoretical and research base and illustrated and clarified with real life examples of children and teachers from today's diverse classrooms Written to reflect cutting edge theory new research

the latest policies the new Common Core State Standards and best practices in the rapidly changing world of language arts instruction Carole Cox's new Seventh Edition continues to guide students as they learn the many skills required to become an effective teacher today Publisher's description
