Teachers and Writing with Power Peter Elbow has revolutionized how people think about writing Now in Vernacular Eloquence he makes a vital new contribution to both practice and theory The core idea is simple we can enlist virtues from the language activity most people find easiest speaking for the language activity most people find hardest writing Speech with its spontaneity naturalness of expression and fluidity of thought has many overlooked linguistic and rhetorical merits Through several easy to employ techniques writers can marshal this wisdom of the tongue to produce stronger clearer more natural writing This simple idea it turns out has deep repercussions Our culture of literacy Elbow argues functions as though it were a plot against the spoken voice the human body vernacular language and those without privilege making it harder than necessary to write with comfort or power Giving speech a central role in writing overturns many empty preconceptions It causes readers to think critically about the relationship between speech writing and our notion of literacy Developing the political implications behind Elbow's previous books Vernacular Eloquence makes a compelling case that strengthening **Variation across Speech and Writing** Douglas Biber, 1991-12-19 writing and democratizing it go hand in hand Similarities and differences between speech and writing have been the subject of innumerable studies but until now there has been no attempt to provide a unified linguistic analysis of the whole range of spoken and written registers in English In this widely acclaimed empirical study Douglas Biber uses computational techniques to analyse the linguistic characteristics of twenty three spoken and written genres enabling identification of the basic underlying dimensions of variation in English In Variation Across Speech and Writing six dimensions of variation are identified through a factor analysis on the basis of linguistic co occurence patterns The resulting model of variation provides for the description of the distinctive linguistic characteristics of any spoken or written text andd emonstrates the ways in which the polarization of speech and writing has been misleading and thus enables reconciliation of the contradictory conclusions reached in previous research **Typology** of Writing Systems Susanne R. Borgwaldt, Terry Joyce, 2013-06-15 Typology research is extremely important in both proposing classification frameworks and in promoting the careful investigation and analysis of the core concepts inherent within the classification contrasts employed More exemplary of the latter aspect the present collection of papers on the typology of writing systems address a number of significant linguistic and psycholinguistic issues surrounding the classification of writing systems. The seven contributions within this volume which originally appeared as a special issue of Written Language and Literacy 14 1 2011 cover a wide variety of issues ranging from an overview of writing system typology research comparative graphematics letter shape similarities the morphographic principle tone orthography typology

DR. I KETUT SEKEN, M.A., 2021-02-14 Writing and the Writer Frank Smith, 2013-11-05 Exploring the relationship between the writer and what he she happens to be writing this text by one of the foremost scholars in the field of literacy and cognition is a unique and original examination of writing as a craft and as a cognitive activity. The book is concerned with the physical activity of writing the way the nervous system recruits the muscles to move the pen or manipulate the typewriter It considers the necessary disciplines of writing such as knowledge of the conventions of grammar spelling and punctuation In particular there is a concern with how the skills underlying all these aspects of writing are learned and orchestrated This second edition includes many new insights from the author's significant experience and from recent research providing a framework for thinking about the act of writing in both theoretical and practical ways A completely new chapter on computers and writing is included as well as more about the role of reading in learning to write about learning to write at all ages and about such controversial issues as whether and how genre theory should be taught Written in nontechnical language this text will continue to be accessible and stimulating to a wide range of readers concerned with writing literacy thinking and education Furthermore it has an educational orientation therefore proving relevant and useful to anyone who teaches about writing or endeavors to teach writing The Writing on the Wall William C. Hannas, 2013-03-26 Students in Japan China and Korea are among the world's top performers on standardized math and science tests The nations of East Asia are also leading manufacturers of consumer goods that incorporate scientific breakthroughs in telecommunications optics and transportation Yet there is a startling phenomenon known throughout Asia as the creativity problem While East Asians are able to use science they have not demonstrated the ability to invent radically new systems and paradigms that lead to new technologies In fact the legal and illegal transfer of technology from the West to the East is one of the most contentious international business issues Yet Asians who study and work in the West and depend upon Western languages for their research are among the most creative and talented scientists no less so than their Western counterparts William C Hannas contends that this paradox emerges from the nature of East Asian writing systems which are character based rather than alphabetic Character based orthographies according to the author lack the abstract features of alphabetic writing that model the thought processes necessary for scientific creativity When first learning to read children who are immersed in a character based culture are at a huge disadvantage because such writing systems do not cultivate the ability for abstract thought Despite the overwhelming body of evidence that points to the cognitive side effects the cultural importance of character based writing makes the adoption of an alphabet unlikely in the
