Language Rhetoric Rhetoric And The Revolution:

Rhetoric of the Chinese Cultural Revolution Xing Lu, 2020-08-05 A startling look at revolutionary rhetoric and its effects Now known to the Chinese as the ten years of chaos the Chinese Cultural Revolution 1966-76 brought death to thousands of Chinese and persecution to millions In *Rhetoric of the Chinese Cultural Revolution* Xing Lu identifies the rhetorical practices and persuasive effects of the polarizing political language and symbolic practices used by Communist Party leaders to legitimize their use of power and violence to dehumanize people identified as class enemies Lu provides close readings of the movement's primary texts political slogans official propaganda wall posters and the lyrics of mass songs and model operas She also scrutinizes such ritualistic practices as the loyalty dance denunciation rallies political study sessions and criticism and self criticism meetings Lu enriches her rhetorical analyses of these texts with her own story and that of her family as well as with interviews conducted in China and the United States with individuals who experienced the Cultural Revolution during their teenage years In her new preface Lu expresses deep concern about recent nationalism xenophobia divisiveness and violence instigated by the rhetoric of hatred and fear in the United States and across the globe She hopes that by illuminating the way language shapes perception thought and behavior this book will serve as a reminder of past mistakes so that we may avoid repeating them in the future

Rhetoric, Politics and Popularity in Pre-Revolutionary England Markku Peltonen, 2013 This book provides an account of early modern political culture by emphasizing the centrality of humanist rhetoric in it

Portrayals of Revolution Noel Parker, 1990 How did the French try to understand their revolution How have writers of the nineteenth and twentieth centuries portrayed so unprecedented an upheaval Dr Parker examines contemporary representations of the Revolution political rhetoric journals theatre festivals pictures and prints concentrating on two special themes First the creators of these representations were part of an attempt to found anew the social order Second they sought to adapt their forms of culture so as to constitute through them the united community that was to be the agent of this historic new order The second half of the book considers a representative selection of the many histories and theoretical writings on the Revolution from France England and Germany from Barnave and de Staël to the nineteenth century founders of social science and romantic historians such as Michelet to post war comparative political writers and post structuralist marxists influenced by Gramsci and Foucault By bringing together an analysis of contemporary cultural responses to the Revolution and an account of subsequent cultures understanding of it the author reveals the complex interplay between culture and agents of historical change which modern views have often failed to realize

A Revolution in Language Sophia A. Rosenfeld, Sophia Rosenfeld, 2003-08-01 What is the relationship between the ideas of the Enlightenment and the culture and ideology of the French Revolution This book takes up that classic question by concentrating on changing conceptions of language and especially signs during the second half of the eighteenth

century The author traces first the emergence of a new interest in the possibility of gestural communication within the philosophy theater and pedagogy of the last decades of the Old Regime She then explores the varied uses and significance of a variety of semiotic experiments including the development of a sign language for the deaf within the language politics of the Revolution A Revolution in Language shows not only that many key revolutionary thinkers were unusually preoccupied by questions of language but also that prevailing assumptions about words and other signs profoundly shaped revolutionaries efforts to imagine and to institute an ideal polity between 1789 and the start of the new century This book reveals the links between Enlightenment epistemology and the development of modern French political culture *Rhetoric: A Very Short Introduction* Richard Toye, 2013-03-28 Rhetoric is often seen as a synonym for shallow deceptive language and therefore as something negative But if we view rhetoric in more neutral terms as the art of persuasion it is clear that we are all forced to engage with it at some level if only because we are constantly exposed to the rhetoric of others In this Very Short Introduction Richard Toye explores the purpose of rhetoric Rather than presenting a defence of it he considers it as the foundation stone of civil society and an essential part of any democratic process Using wide ranging examples from Ancient Greece medieval Islamic preaching and modern cinema Toye considers why we should all have an appreciation of the art of rhetoric ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable Scientific Institutions and Practice in France and Britain, c.1700-c.1870 Maurice Crosland, 2023-05-31 This second collection of studies by Maurice Crosland has as a first theme the differences in the style and organisation of scientific activity in Britain and France in the 18th and early 19th centuries Science was more closely controlled in France notably by the Paris Academy of Sciences and the work of provincial amateurs much less prominent than in Britain The most dramatic change in any branch of science during this period was in chemistry largely through the work of Lavoisier and his colleagues the focus of several articles here and the dominance of this group caused considerable resentment outside France not least by Joseph Priestley The issue of authority in science emerges again within France under the rule of Napoleon in a study of the exceptional power exercised by the great mathematician Laplace both in theoretical science and in academic politics This exploration of organisation and power is complemented by a comparative study of the practice of early physics and chemistry and their different reliance on laboratories This raises the question of whether chemistry provided a model for later experimental work in other sciences both through the construction of pioneering laboratories and in establishing early schools of research Discourse, Dictators and Democrats Richard D. Anderson, 2016-05-23 Voting hides a familiar puzzle Many people take the trouble to vote even though each voter s prospect of deciding the election is nearly nil Russians vote even when pervasive electoral fraud virtually eliminates even that slim chance The right to vote has commonly been won by

protesters who risked death or injury even though any one protester could have stayed home without lessening the protest's chance of success. Could people vote or protest because they stop considering their own chances and start to think about an identity shared with others? If what they hear or read affects political identity, a shift in political discourse might not just evoke protests and voting but also make the minority that has imposed the dictatorship suddenly lose heart. During the Soviet Union's final years, the cues that set communist discourse apart from standard Russian sharply dwindled. A similar convergence of political discourse with local language has preceded expansion of the right to vote in many states around the globe. Richard D. Anderson Jr. presents a groundbreaking theory of what language use does to politics.

Revolutionary Change and Democratic Religion Celucien L. Joseph, 2020-04-15 In Revolutionary Change and Democratic Religion, Celucien Joseph provides a fresh and careful reexamination of Haiti's intellectual history by focusing on the ideas and writings of five prominent thinkers and public intellectuals: Toussaint Louverture, Joseph Antenor Firmin, Jacques Roumain, Dantes Bellegarde,

and Jean Price Mars The book articulates a twofold argument First of all Haiti has produced a strong intellectual tradition from the revolutionary era to the postcolonial present and that Haitian thought is not homogeneous and monolithic Joseph puts forth the idea that the general interweaving themes of rhetoric the race concept race vindication universal emancipation religious pluralism secular humanism the particular and the universal and cosmopolitanism are representative of Haiti's intellectual tradition Secondly the book also contends that Haitian intellectuals have produced a religious discourse in the twentieth century that could be phrased religious metissage The religious ideas of these thinkers have been shaped by various forces ideologies religious traditions and philosophical schools In the same way the religious experience of the Haitian people should be understood in terms of conflicting heterodox and pluralistic manifestations of religious piety as the people in Haiti reacted to the crisis of slavery Western colonialism and imperialism and the arrogance of race in modernity in their striving to reposition themselves within the framework of universal and human metanarratives The book departs from the dominant contemporary Vodou scholarship that is often characteristic of North American and Western studies on the religious life of the Haitian people and Haitian thinkers

Contesting Cultural Rhetorics Margaret J. Marshall, 1995 Taken together these texts reveal the complicated public discussion of education in the 1890s a period of transformation in culture schooling and the organization of knowledge Moreover they reveal the rhetorical structure of many of the questions Americans ask about education today who should be educated by whom for what purposes using what methods or materials What of the past should we pass on to the future and how Contesting Cultural Rhetorics will be useful to readers interested in the history of education and nineteenth century popular culture as well as those involved in current debates on education and public policy

The Sentimental Theater of the French Revolution Cecilia Feilla, 2016-03-03 Smoothly blending performance theory literary analysis and historical insights Cecilia Feilla explores the mutually dependent discourses of feeling and politics and their impact on the theatre and theatre audiences during the French Revolution Remarkably the most frequently performed and popular plays from 1789 to 1799 were not the political action pieces that have been the subject of much literary and historical criticism but rather sentimental dramas and comedies

many of which originated on the stages of the Old Regime Feilla suggests that theatre provided an important bridge from affective communities of sentimentality to active political communities of the nation arguing that the performance of virtue on stage served to foster the passage from private emotion to public virtue and allowed groups such as women children and the poor who were excluded from direct political participation to imagine a new and inclusive social and political structure Providing close readings of texts by among others Denis Diderot Collot d Herbois and Voltaire Feilla maps the ways in which continuities and innovations in the theatre from 1760 to 1800 set the stage for the nineteenth century Her book revitalizes and enriches our understanding of the significance of sentimental drama showing that it was central to the way that drama both shaped and was shaped by political culture *The SAGE Glossary of the Social and Behavioral Sciences* Larry E. A. Smith,2008-04-24 A unique comparative account of the roots of Communist revolution in Russia and China Steve Smith examines the changing social identities of peasants who settled in St Petersburg from the 1880s to 1917 and in Shanghai from the 1900s to the 1940s Russia and China though very different societies were both dynastic empires with backward agrarian economies that suddenly experienced the impact of capitalist modernity This book argues that far more happened to these migrants than simply being transformed from peasants into workers It explores the migrants identification with their native homes how they acquired new understandings of themselves as individuals and new gender and national identities It asks how these identity transformations fed into the wider political social and cultural processes that culminated in the revolutionary crises in Russia and China and how the Communist regimes that emerged viewed these transformations in the working classes they claimed to represent **Walking and Talking Feminist Rhetorics** Lindal Buchanan,Kathleen J. Medieval Renaissance and eighteenth through twentieth century periods within the history of rhetoric The Present State of Scholarship in the History of Rhetoric doesn't simply update but rather recasts study in the history of rhetoric The authors experienced and well known scholars in their respective fields redefine existing strands of rhetorical study within the periods expand the scope of rhetorical engagement and include additional figures and their works The globalization and expansion of rhetoric are demonstrated in each of these parts and seen clearly in the inclusion of more female rhetors discussions of historical and contemporary electronic resources and examinations of rhetorical practices falling outside the academy and the traditional canon New to this edition is a cumulative review of twentieth century rhetoric along with a thematic index designed to facilitate interdisciplinary or specialized study and scholarly research across the traditional historical periods As programs incorporating rhetorical studies continue to expand at the university level students and researchers are in need of up to date bibliographical resources No other work matches the scope and approach of The Present State of Scholarship in the History of Rhetoric which carries scholarship on rhetoric into the twenty first century
