EU Law Stories Fernanda Nicola, Bill Davies, 2017-05-29 Through an interdisciplinary analysis of the rulings of the Court of Justice of the European Union this book offers thick descriptions contextual histories and critical narratives engaging with leading or minor personalities involved behind the scenes of each case The contributions depart from the notion that EU law and its history should be narrated in a linear and incremental way to show instead that law evolves in a contingent and not determinate manner The book shows that the effects of judge made law remain relatively indeterminate and each case can be retold through different contextual narratives and shows the commitment of the European legal elites to the experience of legal reasoning The idea to cluster the stories around prominent cases is not to be fully comprehensive but to re focus the scholarship and teaching of EU law by moving beyond the black letter and unravel the lawyering techniques to achieve policy results

Language and Social Change in Central Europe Patrick Stevenson, 2010-07-31 This book explores the dynamics of language and social change in central Europe in the context of the end of the Cold War and eastern expansion of the European Union One outcome of the profound social transformations in central Europe since the Second World War has been the reshaping of the relationship between particular languages and linguistic varieties especially between national languages and regional or ethnic minority languages Previous studies have investigated these transformed relationships from the macro perspective of language policies while others have taken more fine grained approaches to individual experiences with language Combining these two perspectives for the first time and focusing on the German language which has a uniquely complex and problematic history in the region the authors offer an understanding of the complex constellation of language politics in central Europe Stevenson and Carl s analysis draws on a range of theoretical conceptual and analytical approaches language ideologies language policy positioning theory discourse analysis narrative analysis and life histories and a wide range of data sources from European and national language policies to individual language biographies The authors demonstrate how the relationship between German and other languages has played a crucial role in the politics of language and processes of identity formation in the recent history of central Europe

linguistics **A Story of Us** Lesley Newson, Peter Richerson, 2021-02-19 It's time for a story of human evolution that goes beyond describing ape men and talks about what women and children were doing. In a few decades a torrent of new evidence and ideas about human evolution has allowed scientists to piece together a more detailed understanding of what went on thousands and even millions of years ago. We now know much more about the problems our ancestors faced, the solutions they found, and the trade-offs they made. The drama of their experiences led to the humans we are today, an animal that relies on a complex culture. We are a species that can and does rapidly evolve cultural solutions as we face new problems, but the intricacies of our cultures mean that this often creates new challenges. Our species' unique capacity for culture began to evolve millions of years ago, but it only really took off in the last few hundred thousand years. This capacity allowed our ancestors to survive and raise their difficult children during times of extreme climate chaos. Understanding how this has evolved can help us understand the cultural change and diversity that we experience today. Lesley Newson and Peter Richerson, a husband and wife team based at the University of California, Davis, began their careers with training in biology. The two have spent years together and individually researching and collaborating with scholars from a wide range of disciplines to produce a deep history of humankind. In *A Story of Us*, they present this rich narrative and explain how the evolution of our genes relates to the evolution of our cultures. Newson and Richerson take readers through seven stages of human evolution, beginning seven million years ago with the apes that were the ancestors of humans and today's chimps and bonobos. The story ends in the present day and offers a glimpse into the future. **Common European Framework of**

Reference for Languages: Learning, Teaching, assessment Council of Europe, 2020-05-05 The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains an explanation of the key aspects of the CEFR for teaching and learning, a complete set of updated CEFR descriptors that replaces the 2001 set with modality inclusive and gender neutral descriptors, added detail on listening and reading, a new Pre A1 level plus enriched description at A1 and C levels, a replacement scale for phonological competence, new scales for mediation, online interaction, and plurilingual/pluricultural competence, new scales for sign language competence, a short report on the four-year development, validation, and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to promote and support the learning and teaching of modern languages, enhance intercultural dialogue, and thus mutual understanding, social cohesion, and democracy, protect linguistic and cultural diversity in Europe, and promote the right to quality education for all. **The Discourse of Europe** Sharon Millar, John Wilson, 2007-10-25 In this volume we approach the question of what it is to be European by considering the way in which citizens talk about their everyday lives as

they are perceived against the background of Europe and European issues Hence the volume will offer insights into the rarely glimpsed micro political world of ordinary talk and explore the way in which such talk in social interaction and other spheres might help us understand what Europe means to a range of its citizens Using a range of broadly discursive approaches we will touch on inter alia issues of identity youth borders ethnicity local politics and minority languages In the end we suggest it is a common sense view of pragmatic utility that centres what it is to be European and this is something which is continually fluid and shifting within ever changing social historical and political circumstances

England's Stages, 1590-1620 Marianne Montgomery, 2016-04-22 Though representations of alien languages on the early modern stage have usually been read as mocking xenophobic or at the very least extremely anxious listening closely to these languages in the drama of Shakespeare and his contemporaries Marianne Montgomery discerns a more complex reality She argues instead that the drama of the early modern period holds up linguistic variety as a source of strength and offers playgoers a cosmopolitan engagement with the foreign that while still sometimes anxious complicates easy national distinctions The study surveys six of the European languages heard on London s commercial stages during the three decades between 1590 and 1620 Welsh French Dutch Spanish Irish and Latin and the distinct sets of cultural issues that they made audible Exploring issues of culture and performance raised by representations of European languages on the stage this book joins and advances two critical conversations on early modern drama It both works to recover English relations with alien cultures in the period by looking at how such encounters were staged and treats sound and performance as essential to understanding what Europe s languages meant in the theater Europe s Languages on England s Stages 1590 1620

contributes to our emerging sense of how local identities and global knowledge in early modern England were necessarily shaped by encounters with nearby lands particularly encounters staged for aural consumption

Into the Heart of European Poetry John Taylor, 2017-07-05. John Taylor's brilliant new book examines the work of many of the major poets who have deeply marked modern and contemporary European literature. Venturing far and wide from the France in which he has lived since the late 1970s, the polyglot writer-critic not only delves into the more widely translated literatures of Italy, Greece, Germany, and Austria but also discovers impressive and overlooked work in Slovenia, Bosnia, Hungary, Finland, Norway, and the Netherlands. In this book, that ranges over nearly all of Europe, including Russia. While providing this stimulating and far-ranging critical panorama, Taylor brings to light key themes of European writing: the depth of everyday life, the quest of the thing in itself, metaphysical aspiration and anxiety, the dialectics of negativity and affirmation, subjectivity and self-effacement, and uprootedness as a category that is as ontological as it is geographical, historical, political, or cultural. The book pays careful attention to the intersection of writing and history or politics, as several poets featured here have faced the Second World War, the Holocaust, Communism, the fall of Communism, or the war in the former Yugoslavia. Taylor gives the work of renowned, upcoming, and still little-known poets a thorough look, all the while scrutinizing recent translations of their verse. He highlights several poets who are also masters of the prose poem. He includes a few novelists who have fashioned a

particularly original kind of poetic prose that stylistic category that has proved so difficult for critics to define Into the Heart of European Poetry should be of immediate interest to any reader curious about the aesthetic and philosophical ideas underlying major trends of contemporary European writing In a day and age when much too little is translated and thus known about foreign literature and when Europeans themselves are pondering the common denominators of their own culture this book is a
