Language And Conflict A Neglected Relationship

Birgitta Busch, Helen Kelly-Holmes

Language And Conflict A Neglected Relationship:

Language and Conflict Paul Anthony Chilton, Dan Smith, 1997 *Language and Conflict* Sue Wright, 1998 The idea of conflict brings us inexorably to nationalism then to identity and thus to language These three essays on language and conflict are a result of a growing awareness that researchers in discourse analysis and sociolinguistics and in the peace and conflict resolution field have much to say to each other The New Peace Linguistics and the Role of Language in Conflict Andy Curtis, 2022-01-01 The idea of Peace Linguistics PL has been around for decades However the practice of PL has only occurred much more recently only within the last few years since the first creditbearing university level PL course was taught at Brigham Young University Hawaii in 2017 Since then the field of NPL has grown beyond its original goals of using peaceful language and language that avoids or de escalates conflict The New Peace Linguistics NPL focuses on in depth systematic analyses of the spoken and written language of some of the most powerful people in the world such as presidents of the USA as it is they who have the power to start wars or to bring peace As the first book to be published on PL and on NPL this work represents a ground breaking study of the power of language to hurt and harm or to help and give hope The first four chapters of the book which provide the foundation on which the rest of the book is built introduce the concept of Peace Linguistics and the New Peace Linguistics starting with the origins of PL and coming to the present day The remaining Part Two and Part Three chapters present in depth systematic NPL analyses of George W Bush Colin L Powell Barack H Obama Donald J Trump and Joseph R Biden The concluding chapter reiterates the most important distinguishing and recurring features of NPL and looks at where the field may be headed in the future Conflicts, Disputes, and Tensions Between Identity Groups Josué M. González, 2009-11-01 This book is intended for use in professional courses of study and workshops in fields such as education administration public administration sports administration law enforcement allied health and social work human resource management and other fields in which groups from diverse backgrounds participate as employees students or clients The book is an introduction to a vast and complex subject Among the possible objectives that can be pursued with the aid of this book are the following To understand the nature and causes of intergroup conflict including the useful functions it performs for communities and members of identity groups To understand the importance of a historical perspective in the study of intergroup conflict and the danger of adopting ahistorical solutions To learn how group membership influences interactions between and among groups under conditions of stress To understand the causes and persistence of ethnocentric thought and how individuals can minimize or prevent the demonizing effects that may arise from it To become familiar with basic principles of conflict resolution mediation and arbitration To become aware of how the seemingly harmless and benign beliefs and actions of one group may have negative effects on others who do not belong to the same group To explore approaches to dealing with intergroup conflict and the conditions under which these approaches are either useful or inappropriate Discursive Approaches to Sociopolitical Polarization and Conflict Laura

Filardo-Llamas, Esperanza Morales-López, Alan Floyd, 2021-11-17 This collection explores the discursive strategies and linguistic resources underpinning conflict and polarization taking a multidisciplinary approach to examine the ways in which conflict is constructed across a diverse range of contexts The volume is divided into two sections as a means of identifying two different dimensions to conflict construction and bridging the gap between different perspectives through a constructivist framework The first part comprises chapters looking at sociopolitical conflicts across specific geographic contexts across the US Europe and Latin America The second half of the book unpacks sociocultural conflicts those not defined by physical borders but shaped by ideological differences on core values such as on religion gender and the environment Drawing on frameworks across such fields as linguistics critical discourse analysis rhetoric studies and cognitive studies the book offers new insights into the discursive polarization that permeates contemporary communicative interactions and the ways in which a better understanding of conflict and its origins might serve as a mechanism for providing new ways forward This book will be of particular interest to students and scholars in critical discourse analysis linguistics rhetoric studies and peace and conflict studies

CILS Christina Schäffner, 2000 Recent developments particularly globalisation and advances in technology have affected our production and perception of language as reflected in two conflicting forces globalism and tribalism The role of English as an international lingua franca is discussed and conclusions are drawn for the varying activities of translation today and for the rapidly changing job profile of the translator

Managing Multilingualism in a European Nation-state Sally Boyd, Leena Marjatta Huss, 2001 This text analyzes recent shifts in Swedish language policy Special focus is given to the complex relationships of the Swedish language to both English and to indigenous and immigrant minority languages in Sweden Key issues addressed include the current debate concerning Sweden's official majority and minority languages the position of immigrant and indigenous languages in the Swedish school system the influence of the spread of English on the use of Swedish particularly in writing and the role of Swedish within the European Union The contributions synthesize research on the status of languages currently used in Sweden as well as policy initiatives and taken together the papers accurately present the many sides of the complex debate taking place there While this book focuses on one country's struggle for multilingualism the issues presented here are highly relevant and accessible to all readers interested in linguistic rights and language policy

Transforming Violent Conflict Oliver

Ramsbotham, 2010-01-25 This book investigates intractable conflicts and their main verbal manifestation radical disagreement and explores what can be done when conflict resolution fails The book identifies agonistic dialogue dialogue between enemies as the key to linguistic intractability It suggests how agonistic dialogue can best be studied explored understood and managed even in the most severe political conflicts when negotiation mediation problem solving dialogue for mutual understanding and discourse ethics are unsuccessful This approach of viewing radical disagreement as the central topic of analysis and conflict management is a new innovation in this field and also supplements and enhances existing

communicative transformational techniques It also has wider implications for cognate fields such as applied ethics democratic theory cultural studies and the philosophy of difference This book will be of great interest to students of conflict resolution peace and conflict studies ethnic conflict and International Relations in general Oliver Ramsbotham is Emeritus Professor of Conflict Resolution at the University of Bradford UK Chair of the Oxford Research Group President of the Conflict Research Society and co author of Conflict Resolution in Contemporary Conflict *Language, Discourse and Borders in the Yugoslav Successor States* Birgitta Busch, Helen Kelly-Holmes, 2004-01-01 Do languages cause borders or do borders cause languages This volume in the Current Issues in Language and Society series attempts to situate the debate on language policies in Southeastern Europe within the larger debate in social sciences and humanities on the issues of borders and the formation of national identities **The Role of Discourse Analysis for Translation and in Translator Training** Christina Schäffner, 2002-01-01 It has been widely recognised that an in depth textual analysis of a source text is relevant for translation This book discusses the role of Discourse Analysis for translation and translator training One particular model of discourse analysis is presented in detail and its application in the context of translator training is critically examined

Discourse and Crisis Antoon De Rycker, Zuraidah Mohd Don, 2013-12-15 Discourse and Crisis Critical perspectives brings together an exciting collection of studies into crisis as text and context as unfolding process and unresolved problem Crisis is viewed as a complex phenomenon that in its prevalence disruptiveness and appearance of inevitability is both socially produced and discursively constituted The book offers multiple critical perspectives in depth linguistically informed analyses of the discourses of power and collaboration implicated in crisis construal and recovery detailed examination of the critical role that language plays during the crisis life cycle and further problematization of the semiotic material complexity of crisis and its usefulness as an analytical concept The research focus is on the discursive and interactive mediation of crisis in organizational political and media texts The volume contains contributions from across the world offering a polyphonic overview of discourse and crisis research This impressive volume will be useful to researchers and academics working on the intersection of crisis language and communication It is also of interest to practitioners in organizational management politics and policy and media *Minority Language Broadcasting* Helen Kelly-Holmes, 2001 This volume examines the historical context current state of and future prospects for broadcasting in minority languages taking Irish and Breton as case studies Practitioners and academics from a variety of disciplines come together to identify and debate the key issues that will mean success or failure for minority language broadcasting in the new millennium *What We Remember* Mariana Achugar, 2008-10-16 This interdisciplinary monograph explores the discursive manifestations of the conflict over how to remember and interpret the actions of the military during the last dictatorship in Uruguay 1973 1985 Through the exploration of the discursive ways in which this powerful group represents past events and participants we can trace the ideological struggle over how to reconstruct a traumatic past By looking at memory as a social and discursive practice the

analysis identifies particular semiotic practices and linguistic patterns deployed in the construction of memory The discursive description of what is remembered how it is remembered and who remembers serves to explain how the institution s construction of the past is transformed and maintained to respond to outside criticism and create an institutional identity as a lawful state apparatus This book should interest discourse analysts historians sociologists and researchers in the field of transitional justice Translation and Circulation of Migration Literature Stephanie Schwerter,Katrina Brannon,2022-07-22 In the field of Translation Studies no book length work in English has yet been dedicated to the translation and circulation of migration literature The authors of this volume seek to contribute to filling this gap through a detailed study of texts belonging to a variety of literary genres and engaging with the phenomenon of migration in different parts of the world Not only will the challenges met by translators be discussed but the different ways in which the translated texts travel from one cultural sphere to another will also be explored The focus lies on the themes migration and politics migration and society as well as the experience of migration in words music and images *Community and Communication* Sue Wright,2000-01-01 This book considers the issue of language in the European Union Without a community of communication the EU must remain a trading association run in an autocratic way by bilingual patrician technocrats with a community of communication the European Union could develop democratic structures and legitimacy and give meaning to its policies of free movement How to achieve that community of communication is the biggest challenge facing Europe today **Tracing Language Movement in Africa** Ericka A. Albaugh,Kathryn M. de Luna,2018-01-10 The great diversity of ethnicities and languages in Africa encourages a vision of Africa as a fragmented continent with language maps only perpetuating this vision by drawing discrete language groups In reality however most people can communicate with most others within and across linguistic boundaries even if not in languages taught or learned in schools Many disciplines have looked carefully at language movement and change on the continent but their lack of interaction has prevented the emergence of a cohesive picture of African languages Tracing Language Movement in Africa gathers eighteen scholars together to offer a truly multidisciplinary representation of language in Africa combining insights from history archaeology religion linguistics political science and philosophy The resulting volume illuminates commonalities and distinctions in these disciplines understanding of language change and movement in Africa The volume is empirical aiming to represent language more accurately on the continent as well as theoretical It identifies the theories that each discipline uses to make sense of language movement in Africa in plain terms and highlights the themes that cut across all disciplines how scholars use data understand boundaries represent change and conceptualize power The volume is organized to reflect differing conceptions of language that arise from its discipline specific contributions that is tendencies to study changes that consolidate language or those that splinter it viewing languages as whole or in part Each contribution includes a short explanation of a discipline s theoretical and methodological approaches to language movement and change to ensure that the chapters are accessible to non specialists

followed by an illustrative empirical case study This volume will inspire multidisciplinary conversations around the study of language change in Africa opening new interdisciplinary dialogue and spurring scholars to adapt the questions data and method of other disciplines to the problems that animate their own fields *Language Policy and Language Planning* Sue Wright, 2016-04-08 This revised second edition is a comprehensive overview of why we speak the languages that we do It covers language learning imposed by political and economic agendas as well as language choices entered into willingly for reasons of social mobility economic advantage and group identity Language, Democracy, and Devolution in Catalonia Sue Wright, 1999 The issue of human rights becomes very complex when applied to language Individual rights have little meaning in this domain People do not ask for the right to speak to themselves they ask for the right to use their language within their group Where populations are heterogenous such rights are difficult to ensure Language can be a powerful means of inclusion and exclusion and this is particularly true in democratic societies where debate is central to the process This book looks at these fundamental questions in the context of Catalonia **Language, Politics, and Society** Sue Wright, Linda Hantrais, Jolyon Howorth, 2000 The thirteen essays in this volume are dedicated to Professor Dennis Ager on his retirement Their range is eloquent testimony to the catholicity and openness of Professor Ager's approach to what was originally called Area Studies They celebrate the diversity over which he presided as head of the French department and head of the faculty of Modern Languages at Aston University in the period 1971-1998 **Comparative Kurdish Politics in the Middle East** Emel Elif Tugdar, Serhun Al, 2017-09-12 This edited volume introduces the political social and economic intra Kurdish dynamics in the Middle East by comparatively analyzing the main actors their ideas and political interests As an ethnic group and a nation in the making Kurds are not homogeneous and united but rather the Kurdish Middle East is home to various competing political groups leaderships ideologies and interests Although many existing studies focus on the Kurds and their relations with the nation states that they populate few studies analyze the Kurdish Middle East within its own debates conflicts and interests from a comparative perspective across Iran Iraq Turkey and Syria This book analyzes the intra Kurdish dynamics with historically grounded theoretically informed and conceptually relevant scholarship that prioritizes comparative politics over international relations
