Language as Calculus vs. Language as Universal Medium Maren Kusch, 1989-06-30 I first became interested in Husserl and Heidegger as long ago as 1980 when as an undergraduate at the Freie Universität Berlin I studied the books by Professor Ernst Tugendhat Tugendhat's attempt to bring together analytical and continental philosophy has never ceased to fascinate me and even though in more recent years other influences have perhaps been stronger I should like to look upon the present study as still being indebted to Tugendhat's initial incentive It was my good fortune that for personal reasons I had to continue my academic training from 1981 onwards in Finland Even though Finland is a stronghold of analytical philosophy it also has a tradition of combining continental and Anglosaxon philosophical thought Since I had already admired this line of work in Tugendhat it is hardly surprising that once in Finland I soon became impressed by Professor Jaakko Hintikka's studies on Husserl and intentionality and by Professor Georg Henrik von Wright's analytical hermeneutics While the latter influence has at least in part led to a book on the history of hermeneutics the former influence has led to the present work My indebtedness to Professor Hintikka is enormous Not only is the research reported here based on his suggestions but Hintikka has also commented extensively on different versions of the manuscript helped me to make important contacts found a publisher for me and last but not least was a never failing source of encouragement

Proto-Phenomenology, Language Acquisition, Orality and Literacy Lawrence J. Hatab, 2019-10-25 Through his innovative study of language noted Heidegger scholar Lawrence Hatab offers a proto phenomenological account of the lived world the first world of factual life where pre reflective immediate disclosiveness precedes and makes possible representational models of language Common distinctions between mind and world fact and value cognition and affect miss the meaning laden dimension of embodied practical existence where language and life are a matter of dwelling in speech In this second volume Hatab supplements and fortifies his initial analysis by offering a detailed treatment of child development and language acquisition which exhibit a proto phenomenological world in the making He then takes up an in depth study of the differences between oral and written language particularly in the ancient Greek world and how the history of alphabetic literacy shows why Western philosophy came to emphasize objective representational models of cognition and language which conceal and pass over the presentational domain of dwelling in speech Such a study offers significant new angles on the nature of philosophy and language Critical Reflection and the Foreign Language Classroom Terry Osborn, 2005-03-01 This book introduces pre service and in service foreign language teachers to the basic concepts of critical educational study

as applied to the sociological position occupied by foreign language education in the United States Although contemporary foreign language teachers typically know about second language acquisition and instructional methodology they are not prepared to understand issues of power in relation to for example language variety language status and education The author addresses issues such as the supposed failure of foreign language education the educational filter role played by language classes the concept of foreignness as seen in national standards language curricula and textbooks and the implications of these issues in terms of power relationships and cultural mediation both in and out of the classroom The reader is encouraged to analyze the forms of cultural struggle which can be found within the foreign language classrooms of the United States including the likely impact those struggles have on members of the dominant and subordinate cultures Teachers are led through the development of skills in critical reflection and pedagogical application geared to social justice

The Ironic Apocalypse in the Novels of Leopoldo Marechal Norman Cheadle, 2000 A fresh look at the Argentine novelist Marechal emphasises his subversive approach in his novels to the Peronist politics of his time Leopoldo Marechal has become a chosen precursor of many contemporary Argentine writers cineastes and intellectuals and so his novels universally recognized but rarely studied demand treatment from a contemporary critical sensibility This study departs from the line of criticism that reads Marechal as a Christian apologist arguing instead that Marechal's metaphysical novels are really metafictional ludic exercises informed by ironic scepticism Ad n Buenosayres 1948 inverts the Christian Platonist narrative of redemption through the Logos in *El Banquete de Severo Arc ngelo* 1965 Marechal tongue firmly in cheek leads his readers on a metaphysical wild goose chase and in *Megaf n o la guerra* 1970 he finally lays apocalypticism to rest The close readings of his novels presented in this book help to lay the theoretical groundwork underpinning Marechal's reinscription in contemporary Argentine culture *The Oxford Handbook of Southeast Asian Englishes* Andrew J.
