The Oxford Handbook of Language Contact Anthony P. Vernacular Universals and Language Contacts Markku Filppula, Juhani Klemola, Heli Paulasto, 2009-01-13 In this book contributors have been brought together to discuss the role of two major factors shaping the grammars of different varieties of English and of other languages all over the world so called vernacular universals and contact induced change Rather than assuming a general typological perspective the studies in this volume focus on putative universal vernacular features significant phonological or morpho syntactic parallels found in non standard varieties of English English based Creoles and also varieties of other languages all of which represent widely differing sociolinguistic and historical backgrounds These universals are then set against the other major explanatory factor contact induced change by which we understand both the possibility of dialect contact or dialect diffusion and language contact including superstratal substratal and adstratal influences *Language and Linguistic Contact in Ancient Sicily* Olga Tribulato, 2012-11-29 Within the field of ancient bilingualism Sicily represents a unique terrain for analysis as a result of its incredibly rich linguistic history in which colonial languages belonging to branches as diverse as Italic Oscan and Latin Greek and Semitic Phoenician interacted with the languages of the natives the elusive Sicel Sicanian and Elymian The result of this ancient melting pot was a culture characterised by postcolonial features such as ethnic hybridity multilingualism and artistic and literary experimentation While Greek soon emerged as the leading language dominating official communication and literature epigraphic sources and indirect evidence show that the minority languages held their ground down to the fifth century BCE and in some cases beyond The first two parts of the volume discuss these languages and their interaction with Greek while the third part focuses on the sociolinguistic revolution brought about by the arrival of the Romans *Language Contact in Europe* Bridget Drinka, 2017-02-16 This comprehensive new work provides extensive evidence for the essential role of language contact as a primary trigger for change Unique in breadth it traces the spread of the periphrastic perfect across Europe over the last 2

500 years illustrating at each stage the micro responses of speakers and communities to macro historical pressures Among the key forces claimed to be responsible for normative innovations in both eastern and western Europe is roofing the superstratal influence of Greek and Latin on languages under the influence of Greek Orthodoxy and Roman Catholicism respectively The author provides a new interpretation of the notion of sprachbund presenting the model of a three dimensional stratified convergence zone and applies this model to her analysis of the have and be perfects within the Charlemagne sprachbund The book also tackles broader theoretical issues for example demonstrating that the perfect tense should not be viewed as a universal category
