Meaning and Change of Meaning Gustaf Stern, 1964

Ways of Meaning Mark de Bretton Platts, 1997 The philosophy of language is not an isolated philosophical discipline of merely technical interest to other philosophers Rather as Mark Platts shows the philosophy of language can help to solve traditional problems in other areas of philosophy such as metaphysics epistemology and ethics Ways of Meaning provides a clear comprehensive introduction to such issues at the forefront of philosophy Assuming only minimum knowledge of elementary formal logic the book shows how taking truth as the central notion in the theory of meaning can clarify the relations between language reality and knowledge and thus illuminate the nature of each This second edition of the book contains a new chapter on the notions of natural kind words and natural kinds Unlike other discussions of the subject this one places the semantic issues involved in the context of questions about the relations between knowing subjects and known objects The author has also added a bibliography of further readings published since the first

edition appeared in 1979 *Language, Meaning, Interpretation* Guttorm Fløistad, 2005-12-07 Philosophy of logic and language and of meaning and communication are central to this volume The discussion of these issues involves analytical approaches including semantics and semiotics philosophy of science mathematical logic phenomenology hermeneutics and some aspects of philosophical anthropology and aesthetics Philosophy of the Absolute also belongs to this broad repertoire of philosophical problems and disciplines A number of problems and viewpoints derive from the metaphysical system any relativistic view on ethical values for instance makes sense in relation to some absolute Metaphysical system building may have come to an end but after all it belongs to philosophy to remind us of our past **Language as Social Semiotic**

Michael Alexander Kirkwood Halliday, 1978 **Language - Meaning - Social Construction**, 2016-09-12 This uniquely interdisciplinary collection of essays derives in part from a two day international conference held at Heriot Watt University in November 1999 and conceived as a critical forum for the discussion of the concept of interaction The collection satisfies a continuing need for interdisciplinary and multi disciplinary research in the humanities and stems from an awareness of the growing currency of interactionist theories in several fields and the need to make a critical contribution to such theories and related concepts such as intersubjectivity and dialogism Rather than advancing an apologetic view of interaction as something given the contributors carefully consider and challenge commonly held epistemological and theoretical assumptions relating to the interaction concept Interaction if it is to be a meaningful concept must be seen in terms of its modes e g linguistic media based units language logic communication objectives understanding consensus stability and fields of operation face to face interaction translation social codification This collection is intended to offer a provisional response to the question posed by one of its contributors What does it mean today that communication as the mechanism of social coordination has itself become complex It means that erstwhile certainties of meaning transmission stability duality or dichotomy identity and difference can be challenged and theoretically modelled in new contexts Interdisciplinarity is one means by which to illuminate this complexity from several sides in the pursuit of theoretical blind spots in the field of critical communication studies The book will be of particular interest to researchers and students in communication theory linguistics translation studies logic social psychology discourse studies European Studies philosophy and semiotics

Beyond Meaning: A Journey Across Language, Perception and Experience Gaetano Fiorin, Denis Delfitto, 2020-06-17 Natural languages idioms such as English and Cantonese Zulu and Amharic Basque and Nicaraguan Sign Language allow their speakers to convey meaning and transmit meaning to one another But what is meaning exactly What is this thing that words convey and speakers communicate Few questions are as elusive as this Yet few features are as essential to who we are and what we do as human beings as the capacity to convey meaning through language In this book Gaetano Fiorin and Denis Delfitto disclose a notion of linguistic meaning that is structured around three distinct yet interconnected dimensions a linguistic dimension relating meaning to the linguistic forms that convey it a material dimension relating meaning to the

material and social conditions of its environment and a psychological dimension relating meaning to the cognitive lives of its users By paying special attention to the puzzle surrounding first person reference the way speakers exploit language to refer to themselves and by capitalizing on a number of recent findings in the cognitive sciences Fiorin and Delfitto develop the original hypothesis that meaningful language shares the same underlying logical and metaphysical structure of sense perception effectively acting as a system of classification and discrimination at the interface between cognitive agents and their ecologies

The Language of Word Meaning Pierrette Bouillon, Federica Busa, 2001-01-15 This volume is a collection of original contributions from outstanding scholars in linguistics philosophy and computational linguistics exploring the relation between word meaning and human linguistic creativity The papers present different aspects surrounding the question of what is word meaning a problem that has been the centre of heated debate in all those disciplines that directly or indirectly are concerned with the study of language and of human cognition The discussions are centred around a view of the mental lexicon as outlined in the Generative Lexicon theory Pustejovsky 1995 which proposes a unified model for defining word meaning The individual contributors present their evidence for a generative approach as well as critical perspectives which provides for a volume where word meaning is not viewed only from a particular angle or from a particular concern but from a wide variety of topics each introduced and explained by the editors

Language, Meaning and the Law Christopher Hutton, 2009-01-19 Language Meaning and the Law offers an accessible critical guide to debates about linguistic meaning and interpretation in relation to legal language Law is an ideal domain for considering fundamental questions relating to how we assign meanings to words understand and comment on texts and deal with socially and ideologically significant questions of interpretation The book argues that theoretical issues of concern to linguists philosophers literary theorists and others are illuminated by the demands of the legal context since law is driven by the need for practical solutions and for determinate outcomes based on explicit reasoning Topics covered include the relationship of linguistics to legal theory indeterminacy and statutory interpretation the theory and practice of using dictionaries in law defamation and language in the public sphere and the distinction between perjury and deception This book does not assume specialist knowledge of the field and is designed as a self contained advanced introduction to a fascinating area of study The reader will gain an overall insight into issues and debates about meaning and interpretation as well as an understanding of how these questions are shaped by the legal context
