*Speech and Language Disorders in Bilinguals* Alfredo Ardila, Eliane Ramos, 2007 During the last years a significant number of papers books and monographs devoted to speech and language impairments in bilingual children have been published Different aspects and questions have been approached and today we have a relatively good understanding of the specific characteristics of the speech and language difficulties potentially observed in bilingual and multilingual children This interest has been significantly resulted from the potential developmental and educational consequences of bilingualism Our understanding of the communication disorders in adult populations is notoriously more limited even though over 50% of

the adult population can speak at least another language in addition to his/her native language. That simply means that over 50% of the communication disorders observed in adults are bilingual speech and language disorders: bilingual aphasia, bilingual dementia, bilingual stuttering, etc. This book was written with the specific purpose of filling this gap. The major purpose of this book has been to integrate the state of the art on the different aspects of the communication disorders observed in adult bilinguals. The book is organized in such a way that an integrated perspective of bilingualism is presented from the normal conditions to the pathology, from the clinical descriptions to the rehabilitation issues, from the biological factors to the cultural variables.

*Introduction to Neurogenic Communication Disorders* Hunter Manasco, 2014. Hunter Manasco introduces students to common adult communication disorders and associated neuroanatomy and neurophysiology. These illustrative patient profiles provide actual case examples of symptoms, deficits, and pathological behaviors. As well as in-text features including Authors' Note vignettes and Clinical Note practical insights underscore the very human element of communication disorders.
