Language Lives:

The Social Life of Language Gillian Sankoff, 2016-11-11 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press s distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas Mikhail Bakhtin Gary Saul Morson, Caryl Emerson, 1990 Books about thinkers require a kind of unity that their thought may not possess This cautionary statement is especially applicable to Mikhail Bakhtin whose intellectual development displays a diversity of insights that cannot be easily integrated or accurately described in terms of a single overriding concern Indeed in a career spanning some sixty years he experienced both dramatic and gradual changes in his thinking returned to abandoned insights that he then developed in unexpected ways and worked through new ideas only loosely related to his earlier concerns Small wonder then that Bakhtin should have speculated on the relations among received notions of biography unity innovation and the creative process Unity with respect not only to individuals but also to art culture and the world generally is usually understood as conformity to an underlying structure or an overarching scheme Bakhtin believed that this idea of unity contradicts the possibility of true creativity For if everything conforms to a preexisting pattern then genuine development is reduced to mere discovery to a mere uncovering of something that in a strong sense is already there And yet Bakhtin accepted that some concept of unity was essential Without it the world ceases to make sense and creativity again disappears this time replaced by the purely aleatory There would again be no possibility of anything meaningfully new The grim truth of these two extremes was expressed well by Borges an inescapable labyrinth could consist of an infinite number of turns or of no turns at all Bakhtin attempted to rethink the concept of unity in order to allow for the possibility of genuine creativity The goal in his words was a nonmonologic unity in which real change or surprisingness is an essential component of the creative process As it happens such change was characteristic of Bakhtin s own thought which seems to have developed by continually diverging from his initial intentions Although it would not necessarily follow that the development of Bakhtin s thought corresponded to his ideas about unity and creativity we believe that in this case his ideas on nonmonologic unity are useful in understanding his own thought as well as that of other thinkers whose careers are comparably varied and productive

The Prosthetic Tongue Katie Chenoweth, 2019-10-04 Of all the cultural revolutions brought about by the development of printing technology during the sixteenth century perhaps the most remarkable but least understood is the purported rise of European vernacular languages It is generally accepted that the invention of printing constitutes an event in the history of language that has profoundly shaped modernity and yet the exact nature of this transformation the mechanics of the event has remained curiously unexamined In *The Prosthetic Tongue* Katie Chenoweth explores the relationship between printing and the vernacular as it took shape in sixteenth century France and charts the technological reinvention of French across a range of

domains from typography orthography and grammar to politics pedagogy and poetics Under François I the king known in his own time as the Father of Letters both printing and vernacular language emerged as major cultural and political forces Beginning in 1529 French underwent a remarkable transformation as printers and writers began to reimagine their mother tongue as mechanically reproducible The first accent marks appeared in French texts the first French grammar books and dictionaries were published phonetic spelling reforms were debated modern Roman typefaces replaced gothic scripts and French was codified as a legal idiom This was Chenoweth argues a veritable new media moment in which the print medium served as the underlying material apparatus and conceptual framework for a revolutionary reinvention of the vernacular Rather than tell the story of the origin of the modern French language however she seeks to destabilize this very notion of origin by situating the cultural formation of French in a scene of media technology and reproducibility No less than the paper book issuing from sixteenth century printing presses the modern French language is a product of the age of mechanical reproduction

Lakota Texts Regina Pustet, 2021-04 Lakota Texts is a treasure trove of stories told in the original language by modern Lakota women who make their home in Denver Colorado Sometimes witty often moving and invariably engaging and fascinating these stories are both autobiographical and cultural The stories present personal experiences along with lessons the women have learned or were taught about Lakota history culture and legends The women share aspects of their own lives including such rituals as powwows the sweatlodge and rites of puberty The women also include details of the older Lakota world and its customs revered myths more recent stories and jokes In addition to the valuable light Lakota Texts sheds on the lives of modern Lakota women these stories also represent a significant contribution to American Indian linguistics Regina Pustet has meticulously transcribed and translated the stories in a detailed interlinear format that makes the texts a rich

source of information about modern Lakota language itself This Complicated Form of Life Newton Garver,1994 Far from overthrowing or stepping outside that tradition Wittgenstein builds on it draws from it and contributes brilliantly to the fruition of certain elements in it In This Complicated Form of Life Garver analyzes from several angles Wittgenstein's relationship to Kant and to what Finch has called Wittgenstein's completion of Kant's revolt against the Cartesian hegemony of epistemology in philosophy **Entangled** Marilyn Sigman,2018-02-15 Chronicling her quest for wildness and home in Alaska naturalist Marilyn Sigman writes lyrically about the history of natural abundance and human notions of wealth from seals to shellfish to sea otters to herring halibut and salmon in Alaska's iconic Kachemak Bay Kachemak Bay is a place where people and the living resources they depend on have ebbed and flowed for thousands of years The forces of the earth are dynamic here they can change in an instant shaking the ground beneath your feet or overturning kayaks in a rushing wave Glaciers have advanced and receded over centuries The climate like the ocean has shifted from warmer to colder and back again in a matter of decades The ocean food web has been shuffled from bottom to top again and again In Entangled Sigman contemplates the patterns of people staying and leaving of settlement and displacement nesting her own journey to Kachemak Bay within diasporas of her Jewish ancestors and of ancient peoples from Asia to the southern coast of Alaska Along the way she weaves in scientific facts about the region as well as the stories told by Alaska's indigenous peoples It is a rhapsodic introduction to this stunning region and a siren call to protect the land's natural resources in the face of a warming changing world Forms of Life Martin Price,1983-01-01 The novel contains imagined lives that achieve a kind of meaning and intensity our own lives do not Out of the novelist's moral imagination the breadth and depth of his awareness of human motivations tensions and complexities emerge fictional persons through whom we learn to read ourselves This eloquent book exploring fictional lives in crucial moments of choice and change stresses both their difference from and their deep connections with life Martin Price writes here about ways in which character has been conceived and presented in the novels of the nineteenth and early twentieth centuries Beginning with chapters that cogently argue the artistic value of character Price then deals with the different forms character has taken in individual novels His first discussions center on authors Jane Austen Stendhal Charles Dickens George Eliot and Leo Tolstoy who define individuals by their adherence or opposition to social norms The next chapters deal with novelists for whom the moral world is largely internalized The characters of Henry James Joseph Conrad D H Lawrence and E M Forster live in society and act upon it but the authors are particularly concerned with the confusions terrors and heroism that lie within consciousness The last chapter uses novels about the artist by James Joyce Virginia Woolf and Thomas Mann in order to apprehend the process by which experience is transformed into art Avoiding both formalistic and moralistic extremes this new book by a distinguished critic helps us recover a fuller sense of literary form and the forms of life from which it emerges **Viet Nam** Hữu Ngọc,2016-08-15 During his twenty year tenure as a columnist for Việt Nam News H N i s English language newspaper H u Ng c charmed and invigorated an

international readership hungry for straightforward but elegant entrees into understanding Vietnamese culture The essays were originally collected in the massive *Wandering through Vietnamese Culture With Viet Nam Tradition and Change* Ohio University Press presents a selection from these many treasures which are perfectly suited to students of Vietnamese culture and travelers seeking an introduction to the country's rich history culture and daily life With extraordinary linguistic ability and a prodigious memory H u Ng c is among Vi t Nam s keenest observers of and writers about traditional Vietnamese culture and recent history The author s central theme that all tradition is change through acculturation twines through each of the book s ten sections which contain H u Ng c s ideas on Vietnamese religion literature history exemplary figures and more Taken on its own each brief essay is an engaging discussion of key elements of Vietnamese culture and the history of an issue confronting Vi t Nam today

The Fragility of Philosophy of Medicine Lucien Karhausen,2023-09-20 This book about philosophy of medicine bestows a bottom up and not a top down approach It starts from clinical medicine and epidemiology analyzing their interrelations with philosophical instruments The book criticizes the constant search for generalities and the essentialism that too often characterizes this discipline which results in philosophers of medicine dialoguing with each other without direct contact with medical science In the light of Ludwig Wittgenstein s philosophy this book proposes an approach to the philosophy of medicine based on the quorum of language what Wittgenstein calls family resemblances In this way the author establishes a philosophy of medicine that is closely related to the medical clinic and to public health and as such avoids armchair philosophy Don t think but look wrote Wittgenstein

Living Beings Penelope Dransart,2020-06-03 *Living Beings* examines the vital characteristics of social interactions between living beings including humans other animals and trees Many discussions of such relationships highlight the exceptional qualities of the human members of the category insisting for instance on their religious beliefs or creativity In contrast the international case studies in this volume dissect views based on hierarchical oppositions between human and other living beings Although human practices may sometimes appear to exist in a realm beyond nature they are nevertheless subject to the pull of natural forces These forces may be brought into prominence through a consideration of the interactions between human beings and other inhabitants of the natural world The interplay in this book between social anthropologists philosophers and artists cuts across species divisions to examine the experiential dimensions of interspecies engagements In ethnographically and or historically contextualized chapters contributors examine the juxtaposition of human and other living beings in the light of themes such as wildlife safaris violence difference mimicry simulation spiritual renewal dress and language
