Cristina Maria Cervone, Nicholas Watson, 2022-08-30 What Kind of a Thing Is a Middle English Lyric considers issues pertaining to a corpus of several hundred short poems written in Middle English between the twelfth and early fifteenth centuries The chapters draw on perspectives from varied disciplines including literary criticism musicology art history and cognitive science Since the early 1900s the poems have been categorized as lyrics the term now used for most kinds of short

poetry yet neither the difficulties nor the promise of this treatment have received enough attention In one way the book argues considering these poems to be lyrics obscures much of what is interesting about them Since the nineteenth century lyrics have been thought of as subjective and best read without reference to cultural context yet nonetheless they are taken to form a distinct literary tradition Since Middle English short poems are often communal and usually spoken sung and or danced this lyric template is not a good fit In another way however the very differences between these poems and the later ones on which current debates about the lyric still focus suggest they have much to offer those debates and vice versa As its title suggests this book thus goes back to the basics asking fundamental questions about what these poems are how they function formally and culturally how they are and are not related to other bodies of short poetry and how they might illuminate and be illuminated by contemporary lyric scholarship Eleven chapters by medievalists and two responses by modernists all in careful conversation with one another reflect on these questions and suggest very different answers The editors introduction synthesizes these answers by suggesting that these poems can most usefully be read as a kind of play in several senses of that word The book ends with eight new Middle English lyrics by seven contemporary poets Concepts in Medieval Literature Elizabeth Solopova, Stuart Lee, 2007-07-20 Key Concepts in Medieval Literature introduces students to the major authors themes and genres of the English Middle Ages These are discussed in concise focused essays accompanied by summaries and recommendations for further reading highlighting the need to see texts in context both The Oxford History of Poetry in English Helen Cooper, Robert R. Edwards, 2023-05-09 The historically and linguistically Oxford History of Poetry in English is designed to offer a fresh multi voiced and comprehensive analysis of poetry from Anglo Saxon culture through contemporary British Irish American and Global culture including English Scottish and Welsh poetry Anglo American colonial and post colonial poetry and poetry in Canada Australia New Zealand the Caribbean India Africa Asia and other international locales The series both synthesizes existing scholarship and presents cutting edge research employing a global team of expert contributors for each of the fourteen volumes This volume occupies both a foundational and a revolutionary place Its opening date 1100 marks the re emergence of a vernacular poetic record in English after the political and cultural disruption of the Norman Conquest By its end date 1400 English poetry had become an established if still evolving literary tradition The period between these dates sees major innovations and developments in language topics poetic forms and means of expression Middle English poetry reflects the influence of multiple contexts history social institutions manuscript production old and new models of versification medieval poetic theory and the other literary languages of England It thus emphasizes the aesthetic imaginative treatment of new and received materials by medieval writers and the formal craft required for their verse Individual chapters treat the representation of national history and mythology contemporary issues and the shared doctrine and learning provided by sacred and secular sources including the Bible Throughout the period lyric and romance figure prominently as genres and poetic modes while some works hover

enticingly on the boundary of genre and discursive forms The volume ends with chapters on the major writers of the late fourteenth century Langland the Gawain poet Chaucer and Gower and with a look forward to the reception of something like a national literary tradition in fifteenth century literary culture
