under the guidance of a teacher to review the holy books of their people Having become part of this world the author is able to provide first hand observation of the workings of the study circle Heilman s study moves beyond the merely descriptive into an analysis of the nature and meaning of activity he observed To explain the character and appeal of the study groups he employs three concepts drama fellowship and religion Inherent to the life of the study circle are various sorts of drama social dramas playing out social relationships cultural performances reenacting the Jewish world view and interactional dramas and word plays involving the intricacies of the recitation and translation process This book will be of interest to anthropologists and those interested in the academic study of religion

Hermeneutics and the Problem of Translating Traditional Arabic Texts Alsayed M. Aly Ismail, 2017-08-21 This book focuses on the problematic issues arising when translating and interpreting classical Arabic texts which represent a challenging business for many scholars especially with regards to religious texts Additionally the reception of these interpretations and translations not only informs the perception of Muslims and their awareness of the outside world but also impacts the vision and perception of non Muslims of Islam and the Muslim world Consequently this book reconsiders the concepts of understanding and interpretation and their nexus in the mechanism of translation and proposes a novel hermeneutic method of translating interpreting and understanding traditional and classical Arab texts Handling the issues of understanding from a hermeneutical perspective is shown here to remove the possibility of translation and interpretation rendering a distorted translated text Drawing on the powerful interpretive theories of Hans Georg Gadamer and Martin Heidegger the hermeneutic method of translation starts from a premise that the meaning of a classical text cannot be deduced solely by linguistic analysis of its words but requires in depth investigation of the invisible contextual elements that control and shape its meaning Traditional texts are seen in this model as travelling texts whose meaning is transformed across time and space The hermeneutic method of translation allows the translator to identify those elements from the real world that informed a classical text at the time of its writing so that it can be adapted and made relevant to its contemporary context Traditional texts can enlighten our minds and cultivate our souls religious texts can elevate our behavior and thinking and help refine our confused contemporary lives When texts become isolated from their world they lose this lofty goal of enlightenment and elevation
