Husserl Shorter Works:

Husserl, Shorter Works Edmund Husserl, Peter McCormick, Frederick Elliston, 1981-01-01 **Worldview** David K. Naugle, 2002-07-16 Conceiving of Christianity as a worldview has been one of the most significant events in the church in the last 150 years In this new book David Naugle provides the best discussion yet of the history and contemporary use of worldview as a totalizing approach to faith and life This informative volume first locates the origin of worldview in the writings of Immanuel Kant and surveys the rapid proliferation of its use throughout the English speaking world Naugle then provides the first study ever undertaken of the insights of major Western philosophers on the subject of worldview and offers an original examination of the role this concept has played in the natural and social sciences Finally Naugle gives the concept biblical and theological grounding exploring the unique ways that worldview has been used in the Evangelical Orthodox and Catholic traditions This clear presentation of the concept of worldview will be valuable to a wide range of readers

Historical Dictionary of Husserl's Philosophy John J. Drummond, 2022-03-14 Edmund Husserl is generally regarded as the founding figure of the philosophical movement of phenomenology by which he understands a descriptive science of the essential structures of experiences and of their objects precisely as these are experienced Phenomenology has had a decisive influence on philosophy in the 20th century especially in Europe The movement known as continental philosophy whether practiced in Europe or elsewhere has its roots in phenomenology and in the post Hegelian philosophies of S ren Kierkegaard Friedrich Nietzsche and Karl Marx Historical Dictionary of Husserl s Philosophy Second Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on his key concepts and major writings as well as entries on his most important predecessors contemporaries and successors This book is an excellent resource for students researchers and anyone wanting to know more about Edmund Husserl [Encyclopedia of Contemporary Literary Theory](#) Irene Rima Makaryk, 1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use

Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture

Phenomenological Method: Theory and Practice F. Kersten, 1989-03-31 This book has two parts The first part is chiefly concerned with critically establishing the universally necessary order of the various steps of transcendental phenomenological method the second part provides specific cases of phenomenological analysis that illustrate and test the method established in the first part More than this and perhaps even more important in the long run the phenomenological analyses reported in the second part purport a foundation for drawing phenomenological philosophical conclusions about problems of space perception other minds and time perception The non analytical that is the literary sources of this book are many Principal among them are the writings of Husserl which will be accorded a special methodological function as well as the writings of his students of the Gottingen and Freiburg years Of the latter especially important are the writings and when memory serves the lectures of Dorion Cairns and Aron Gurwitsch Of the former especially significant are the writings of Heinrich Hofmann Wilhelm Schapp and Hedwig Collingwood

Husserl's Constitutive Phenomenology Bob Sandmeyer, 2009-01-11 If Edmund Husserl's true philosophy lay in his unpublished research manuscripts as he argues then it is in these rather than the introductions and fragmentary studies he published during his lifetime that we may possibly find a systematic of his philosophy This work constitutes a study of the full range of Husserl's writings with the special task of uncovering there the systematic presentation or presentations of the transcendental phenomenological problematic Sandmeyer's study contains an overview of Husserl's total set of writings a translation of Husserl correspondence with Georg Misch a translation of a draft outline of the system of phenomenological philosophy produced by Husserl in collaboration with his assistant Eugen Fink and it also closely traces the influence of Wilhelm Dilthey on Husserl's philosophy

Phenomenology 2005. Volume 5: Selected Essays from North America, part 2 Embree, Lester, Nenon, Thomas, 2007-01-01

Phenomenology and Deconstruction, Volume Three Robert Denoon Cumming, 1991 Cumming also shows that conversion is not merely a personal predisposition of Sartre's further manifest in his later conversions to Heidegger and to a version of Marxism Conversion is also philosophical preoccupation illustrated by the conversion to the imaginary whereby Sartre explains how he himself as well as Genet and Flaubert became writers Finally Cumming details how Husserl's phenomenological method contributed both to the shaping of Sartre's style as a literary writer and to his theory of style

Teaching in an Age of Ideology John von Heyking, Lee Trepanier, 2013 This volume explores the role of some of the most prominent twentieth century philosophers and political thinkers as teachers It examines how these teachers conveyed truth to their students against the ideological influences found in the university and society Philosophers from Edmund Husserl and Hannah Arendt to political thinkers like Eric Voegelin and Leo Strauss and their students such as Ellis Sandoz Stanley Rosen and Harvey Mansfield are in this volume as teachers who analyze

denounce and attempt to transcend ideology for a more authentic way of thinking What the reader will discover is that teaching is not merely a matter of holding concepts together but a way of existing or living in the world The thinkers in this volume represent this form of teaching as the philosophical search for truth in a world deformed by ideology Essays on Husserl's Logic and Philosophy of Mathematics Stefania Centrone, 2017-09-07 Essays on Husserl's Logic and Philosophy of Mathematics sets out to fill up a lacuna in the present research on Husserl by presenting a precise account of Husserl's work in the field of logic of the philosophy of logic and of the philosophy of mathematics The aim is to provide an in depth reconstruction and analysis of the discussion between Husserl and his most important interlocutors and to clarify pivotal ideas of Husserl's by considering their reception and elaboration by some of his disciples and followers such as Oskar Becker and Jacob Klein as well as their influence on some of the most significant logicians and mathematicians of the past century such as Luitzen E J Brouwer Rudolf Carnap Kurt G del and Hermann Weyl Most of the papers consider Husserl and another scholar e g Leibniz Kant Bolzano Brentano Cantor Frege and trace out and contextualize lines of influence points of contact and points of disagreement Each essay is written by an expert of the field and the volume includes contributions both from the analytical tradition and from the phenomenological one **The Ethics of Husserl's Phenomenology** Joaquim Siles i Borràs, 2010-02-11 The Ethics of Husserl's Phenomenology aims to relocate the question of ethics at the very heart of Husserl's phenomenology This is based on the idea that Husserl's phenomenology is an epistemological inquiry ultimately motivated by an ethical demand that pervades his writing from the publication of Logical Investigations 1900 1901 up to The Crisis of European Sciences and Transcendental Phenomenology 1935 Joaquim Siles Borràs traces the ethical concepts apparent throughout Husserl's main body of work and argues that Husserl's phenomenology of consciousness experience and meaning is ultimately motivated by an ethical demand by means of which Husserl aims to re define philosophy and re found science with the aim of making philosophy and science capable of dealing with the most pressing questions concerning the meaningfulness of human existence **Husserl's Transcendental Phenomenology** Andrea Staiti, 2014-11-06 This book is the first study of Husserl that connects his phenomenology to the underappreciated work of Neo Kantians and life philosophers **Why Do We Go to the Zoo?** Erik A. Garrett, 2013-12-05 Despite hundreds of millions of visitors each year zoos have remained outside of the realm of philosophical analysis This lack of theoretical examination is interesting considering the paradoxical position within which a zoo is situated being a space of animal confinement as well as a site that provides valuable tools for species conservation public education and entertainment Why Do We Go to the Zoo argues that the zoo is a legitimate space of academic inquiry The modes of communication taking place at the zoo that keep drawing us back time and time again beg for a careful investigation In this book the meaning of the zoo as communicative space is explored This book relies on the phenomenological method from Edmund Husserl and a rhetorical approach to examine the interaction between people and animals in the zoo space Phenomenology the philosophy of examining the engaged everyday

lived experience is a natural method to use in the project Despite its rich history and tradition it is interesting that there are very few books explaining how to do phenomenology Why Do We Go to the Zoo provides a detailed account of how to actually conduct a phenomenological analysis The author spent thousands of hours in zoos watching people and animals interact as well as talking with people both formally and informally This book asks readers to bracket their preconceptions of what goes on in the zoo and instead to explore the meaning of powerful zoo experiences while reminding us of the troubled history of zoos

The Ethics of Earth Art Amanda Boetzkes,2013-11-30 Since its inception in the 1960s the earth art movement has sought to make visible the elusive presence of nature Though most often associated with monumental land based sculptures earth art encompasses a wide range of media from sculpture body art performances and installations to photographic interventions public protest art and community projects In The Ethics of Earth Art Amanda Boetzkes analyzes the development of the earth art movement arguing that such diverse artists as Robert Smithson Ana Mendieta James Turrell Jackie Brookner Olafur Eliasson Basia Irland and Ichi Ikeda are connected through their elucidation of the earth as a domain of ethical concern Boetzkes contends that in basing their works relationship to the natural world on receptivity rather than representation earth artists take an ethical stance that counters both the instrumental view that seeks to master nature and the Romantic view that posits a return to a mythical state of unencumbered continuity with nature By incorporating receptive surfaces into their work film footage of glaring sunlight an aperture in a chamber that opens to the sky or a porous armature on which vegetation grows earth artists articulate the dilemma of representation that nature presents Revealing the fundamental difference between the human world and the earth Boetzkes shows that earth art mediates the sensations of nature while allowing nature itself to remain irreducible to human signification *Husserl's Crisis of the European Sciences and Transcendental Phenomenology* Dermot Moran,2012-08-23 This volume explains Husserl's diagnosis of threats to the West and his hope for a phenomenological response to renew humanity **The Routledge Companion to**

Phenomenology Sebastian Luft,Soren Overgaard,2013-07-03 Phenomenology was one of the twentieth century's major philosophical movements and continues to be a vibrant and widely studied subject today The Routledge Companion to Phenomenology is an outstanding guide and reference source to the key philosophers topics and themes in this exciting subject and essential reading for any student or scholar of phenomenology Comprising over fifty chapters by a team of international contributors the Companion is divided into five clear parts main figures in the phenomenological movement from Brentano to Derrida main topics in phenomenology phenomenological contributions to philosophy phenomenological intersections historical postscript Close attention is paid to the core topics in phenomenology such as intentionality perception subjectivity the self the body being and phenomenological method An important feature of the Companion is its examination of how phenomenology has contributed to central disciplines in philosophy such as metaphysics philosophy of mind moral philosophy aesthetics and philosophy of religion as well as disciplines beyond philosophy such as race cognitive

Organizational and Social Perspectives on Information

Technology Richard Baskerville, Jan Stage, Janice I. DeGross, 2013-03-14 The articles in this book constitute the proceedings papers from the IFIP WG 8.2 Working Conference IS2000 The Social and Organizational Perspective on Research and Practice in Information Technology held June 10-12 2000 in Aalborg Denmark The focus of the conference and therefore this book is on the basic aim of the working group namely the investigation of the interrelationships among four major components information systems IS information technology IT organizations and society This basic social and organizational perspective on research and practice in information technology may have evolved substantially since the founding of the group for example increasing the emphasis on IS development The plan for the conference was partially rooted in the early WG 8.2 traditions in which working conferences were substantially composed of invited papers For IS2000 roughly half of the paper presentations were planned to be invited the remaining half were planned to be double blind refereed in response to a Call For Papers Invited papers were single blind reviewed in order to provide the authors with pre publication feedback and comments along with the opportunity to revise their papers prior to its final incorporation in this book *Space, Time, and Other*, 2016-05-23 This book by the late Fred Kersten known to many as the translator of Edmund Husserl's *Ideas I* takes up the challenge of Husserl's phenomenology as the will to return to the matters themselves providing extensive methodological reflections before proceeding to a series of painstaking phenomenological analyses based on a number of evocative examples such as the indeterminate mass of the hillside that looms up before me as I walk toward it in the dark

Husserl's Legacy in Phenomenological Philosophies Anna-Teresa Tymieniecka, 1991-10-31 In this third volume of a monumental four book survey of Phenomenology world wide fifty years after the death of its chief founder Edmund Husserl we have a collection of studies which in the first place consider Husserl's legacy in the postmodern world The extent of our indebtedness to the Master is shown in explorations of the archeology of knowledge hermeneutics and critical studies of language by Ales Bello P Pefialver P Million V Martinez Guzman H Rodriguez Pifero Y Vlaisavlevich and others There follow calls for renewing the critique of reason by C Schrag F Bosio and J Lerin Riera and discussion by D Laskey K G6rniak Kocikowska M R Barral Y Park and N Delle Site on A T Tymieniecka's phenomenology of life which proposes a total reorientation of phenomenology by introducing a conception of the human condition in which the human creative act is the Archimedean point for philosophy Introduction to Phenomenology Dermot Moran, 2002-06-01 Introduction to

Phenomenology is an outstanding and comprehensive guide to phenomenology Dermot Moran lucidly examines the contributions of phenomenology's nine seminal thinkers Brentano Husserl Heidegger Gadamer Arendt Levinas Sartre Merleau Ponty and Derrida Written in a clear and engaging style Introduction to Phenomenology charts the course of the phenomenological movement from its origins in Husserl to its transformation by Derrida It describes the thought of Heidegger and Sartre phenomenology's most famous thinkers and introduces and assesses the distinctive use of

phenomonology by some of its lesser known exponents such as Levinas Arendt and Gadamer Throughout the book the enormous influence of phenomenology on the course of twentieth century philosophy is thoroughly explored This is an indispensable introduction for all unfamiliar with this much talked about but little understood school of thought Technical terms are explained throughout and jargon is avoided Introduction to Phenomenology will be of interest to all students seeking a reliable introduction to a key movement in European thought
