## **Hyper Architecture Space In The Electronic Age:**

**Hyper Architecture : Spaces in the Electronic Age** Luigi Prestinenza Puglisi, 1999 The messages of our electronic age are becoming increasingly metaphorical and less assertive This metaphorization process affects every aspect of society today as can be seen in design and although more resistant to change in the sphere of architecture A building does not acquire value just because it works is solid spatially stimulating and liveable but because it refers to something else The process of metaphorization concerns most of today's architecture Its basic objective is a new interiorization of the landscape and the relations between man and nature an objective which has been accomplished or nearly In order to make further progress and gain ground we must turn to electronics and above all its center interconnections BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Hyper Architecture** Luigi Prestinenza Puglisi, 1999

**The Practice of Light** Sean Cubitt, 2014-09-05 An account of Western visual technologies since the Renaissance traces a history of the increasing control of light's intrinsic excess Light is the condition of all vision and the visual media are our most important explorations of this condition The history of visual technologies reveals a centuries long project aimed at controlling light In this book Sean Cubitt traces a genealogy of the dominant visual media of the twenty first century digital video film and photography through a history of materials and practices that begins with the inventions of intaglio printing and oil painting Attending to the specificities of inks and pigments cathode ray tubes color film lenses screens and chips Cubitt argues that we have moved from a hierarchical visual culture focused on semantic values to a more democratic but value free numerical commodity Cubitt begins with the invisibility of black then builds from line to surface to volume and space He describes Rembrandt's attempts to achieve pure black by tricking the viewer and the rise of geometry as a governing principle in visual technology seen in Dürer Hogarth and Disney among others He finds the origins of central features of digital imaging in nineteenth century printmaking examines the clash between the physics and psychology of color explores the representation of space in shadows layers and projection discusses modes of temporal order in still photography cinema television and digital video and considers the implications of a political aesthetics of visual technology

**Mathland** Michele Emmer, 2004 The latest book in our successful series IT Revolution in Architecture provides a concise summary of how our perception of the space around us has radically changed in recent years We could even go as far as to say that we ourselves shape the space around us according to how our perceptions of the universe alter and develop and mathematics plays a pivotal role In this book the virtual protagonist of the journey through the concept of space is the square Michele Emmer born in 1945 is Professor of Mathematics at the University La Sapienza in Rome and has authored many books and films on the subject of mathematics and art and culture He was also responsible for exhibitions at the Venetian Biennale and the Cit des Sciences La Villette in Paris **Digital Gehry. Englische Ausgabe.** Bruce Lindsey, 2001 Frank O Gehry born in 1929 founded his own architectural firm in Los Angeles in 1962 and since the building of the Guggenheim

Museum in Bilbao he is undoubtedly among the ranks of international architecture superstars His buildings are complex constructions with curves and distortions skilful plastic shapes which never cease to surprise with their breath taking spatial effects To create these daring designs Gehry makes extensive use of the latest electronic tools physical models are transformed into digital models using software and hardware which has been adapted from the space industry and medical research This book provides a colourful insight into Gehry s design methods and the creative process behind his fantastic buildings Bruce Lindsay studied at the Yale School of Architecture he is now Associate Head at the School of Architecture at Carnegie Mellon University in Pittsburgh USA      **Digital Odyssey** Carmelo Baglivo, Luca Galofaro, IaN+ (Firm), 2003

Following on from the successful book *Natural Born CADesigners* Young American Architects this book takes a look at the most recent architectonic developments in the Mediterranean countries where architects have up to now been strongly influenced by the archaeologically significant environment and their classical architectural inheritance How do young architects in Italy France Spain and Greece react to the new digital age The electronic tools give them the chance to free themselves from the burden of tradition to explore fascinating opportunities in their architecture This book provides a colourful and concise overview of their work using previously unpublished material The team IAN was formed in 1997 in Rome by Carmelo Baglivo Luca Galofaro and Stefania Manna Maria Luisa Palumbo works at the McLuhan Programm in Culture and Technology      *New Scapes* Paola Gregory, 2003-04-01 Since the famous competition for the Park La Villette in Paris where the participants included Bernard Tschumi Peter Eisenman and Gilles Deleuze the relationship between building and landscape has been dramatically transformed Concepts such as metamorphosis and interaction layers and fields are becoming as much a part of architectonic discourse as the practical designs and the realization Author Paola Gregory examines this interplay between buildings and landscapes present in today s architecture scene illustrating her analysis with exciting examples including the ecological landscapes of James Wines and Greg Lynn the virtual environments of Marcos Novak and Nox buildings by Jean Nouvel and Toyo Ito which actively incorporate passers by and surroundings by means of new media      **The Cambridge Introduction to Scenography** Joslin McKinney, Philip Butterworth, 2009-11-19

Scenography the manipulation and orchestration of the performance environment is an increasingly popular and key area in performance studies This book introduces the reader to the purpose identity and scope of scenography and its theories and concepts Settings and structures light projected images sound costumes and props are considered in relation to performing bodies text space and the role of the audience Concentrating on scenographic developments in the twentieth century the Introduction examines how these continue to evolve in the twenty first century Scenographic principles are clearly explained through practical examples and their theoretical context Although acknowledging the many different ways in which design shapes the creation of scenography the book is not exclusively concerned with the role of the theatre designer In order to map out the wider territory and potential of scenography the theories of pioneering scenographers are discussed alongside

the work of directors writers and visual artists      **A Performance Cosmology** Judie Christie, Richard Gough, Daniel Peter Watt, 2013-03-07 Exploring thirty years of work by The Centre for Performance Research CPR A Performance Cosmology explores the future challenges of performance and theatre through a diverse and fascinating series of interviews testimonies and perspectives from leading international theatre practitioners and academics Contributors include Philip Auslander Rustom Bharucha Tim Etchells Jane Goodall Guillermo Gomez Pena Jon McKenzie Claire MacDonald Susan Melrose Alphonso Lingis Richard Schechner Rebecca Schneider Edward Scheer and Freddie Rokem A Performance Cosmology is structured as a travelogue through a matrix of strategic imaginary interdisciplinary field stations This innovative framework enables readings which disrupt linearity and afford different forms of thematic engagement The resulting volume opens entirely new vistas on the old new and as yet unimagined worlds of performance      *Behind the Scenes* Francesco De Luca, Marco Nardini, 2002-09-26 Information technology has brought about a radical change in architectural design The sketches and plans of yesterday have been transformed by CAD In this book the authors cast a glance behind the scenes to provide a systematic overview of the tools and technical processes which are now an integral part of today s design methods The most important digital tools are presented the principal steps are analysed and the essential concepts are explained The theoretical information is vividly illustrated by a selection of examples from the world of architecture A concise and accessible introduction to electronic designing this book makes the subject easily comprehensible to all who are new to the field and for those who already involved in digital designing it is a useful recapitulation and orientation      *The Architecture of Intelligence* Derrick De Kerckhove, 2001 A refreshingly unconventional look at architecture and the World Wide Web Using Vitruvius classical text De Architectura as a starting point De Kerckhove begins a journey into the exciting world of the Internet On the one hand he explores the architecture of this revolutionary medium on the other he considers the wide ranging opportunities which the IT world offers for architectonic design revealing how this new medium for communication is as much based on tradition as on innovation Derrick de Kerckhove is the Director of the McLuhan Institute and Professor at the University of Toronto His research into the effects of innovative technology on human communication of new media on traditional culture have gained worldwide recognition      *Natural Born Caadesigners* Christian Pongratz, Maria Rita Perbellini, 2000 In the USA the generation of 30 40 year old architects has a number of remarkable achievements to show for itself Although this generation encompasses a broad spectrum of architectural genres it is clear that there is one common factor which differentiates them from the previous generation they were literally born with the computer This book reports on how this new tool has influenced and affected the quality of designing looking at the most interesting protagonists of the electronic generation together with their most important projects The authors live in New York and are themselves active in this field      Virtual Terragni Mirko Galli, Claudia Mühlhoff, 2000 Traditionally architectural models were static creations but now through CAAD models can be created which are dynamic and easily manipulated This book shows how the electronic

medium can be used to critically reconstruct unbuilt projects looking in particular at projects by the famous Italian rationalist Giuseppe Terragni Four villas and several monument buildings are visually represented their structures and functions examined and assessed using CAAD *Digital Design* Paolo Martegani, Riccardo Montenegro, 2000-09-01 The era of digitalisation is bringing about radical changes We are surrounded by objects which are causing our relationship with the world around us to become increasingly intangible and virtual Even the work of the designer is changing coupled with the traditional principles of aesthetics and practicality concepts such as communication multimedia virtuality are now important tools of the trade Today's designers are confronted with a variety of complex demands and the computer offers an extremely flexible and creative way of meeting them This book examines the many developments and changes which the digital age has effected in the field of design **Image, Time and Motion** Andreas Treske, Ufuk Önen, Bestem Büyüm, I. Alev De?im, 2011

**New Wombs** Maria Luisa Palumbo, 2000-08-01 A sense of harmony and proportion has traditionally been achieved in architectural compositions by using the dimensions of the human body as the starting point Modern technology now enables us to go beyond these physical dimensions into a virtual world and this poses a challenge to architecture as we usually perceive it Interactive flexible and intelligent models are being called for Whilst technology is taking us into the realms of virtual reality architecture on the other hand is becoming more corporeal Postorganic is the term being used to express this merging of the body and architecture brought about by electronic media A radical change in perspective is blurring the distinction between the organic and mechanic and the artificial logic of the computer and the natural logic of man are fusing together New Flatness Alicia Imperiale, 2000-08-01 In recent architecture theory and practise there has been a tendency to refer to exteriors as a skin concealing an interior as opposed to the traditional and more physical concepts of surface flatness and depth The computer now enables the architect to call his design into life free from the rigid material form and view it as a flexible and interactive creation In this book the concepts of flatness and surface tension are examined in the light of virtual design and built reality A selection of projects are presented to show how the architects regard space and surfaces in modern architectural practice in a digital age *Aesthetics of Total Serialism* Markus Bandur, 2001 Total serialism as a concept has progressed beyond the twelve tone technique of composers Schoenberg and Webern and since the 1950s it has been constantly developed Today it refers to far more than just a technical process for composing rather it offers one possibility of creatively integrating knowledge on man and nature into works of art On all levels of artificial man made creations from musical compositions to architectonic designs it allows properties and dimensions to be systematically organised with criteria such as mass and proportions playing decisive roles Markus Bandur born in 1960 studied science of music philosophy and history and now teaches at the universities of Freiburg i Br Berne and Kassel **Hyperbodies** Kas Oosterhuis, 2003 Hyperbodies are buildings and environments which can continuously change shape and content The mutations of such buildings depend on the input coming from their user as well as from the surroundings This interaction

between user and building is determined by a data flow which the hyperbody uses and converts into a hypersurface structure which then alters our perception of space in and around the hyperbody The architect programs this interaction and can thereby define the specific character of the building In this book the author provides a concise overview of this latest digital tool Kaas Oosterhuis is Professor at the Technical University Delft and is a well known Dutch architect

**Critical Digital Studies** Arthur Kroker, Marilouise Kroker, 2008-01-01 Since its initial publication Critical Digital Studies has proven an indispensable guide to understanding digitally mediated culture Bringing together the leading scholars in this growing field internationally renowned scholars Arthur and Marilouise Kroker present an innovative and interdisciplinary survey of the relationship between humanity and technology The reader offers a study of our digital future a means of understanding the world with new analytic tools and means of communication that are defining the twenty first century The second edition includes new essays on the impact of social networking technologies and new media A new section New Digital Media presents important new articles on topics including hacktivism in the age of digital power and the relationship between gaming and capitalism The extraordinary range and depth of the first edition has been maintained in this new edition Critical Digital Studies will continue to provide the leading edge to readers wanting to understand the complex intersection of digital culture and human knowledge
