Hyper-architecture and the Hyper-real Maurizio Forte, 2006 *Architecture Tamed*, 2016-01-08 The traditional veneration of architecture for its monumental and enduring qualities seems to be changing Architects and other designers are moving away from seeking permanence towards a more open creative use of what time has to offer This is revealed in new approaches to historic preservation the proliferation of temporary structures concerns regarding sustainability and the employment of time efficient processes Architecture Tamed explores the role of ideas about time in the design inclinations and choices of contemporary designers of the environment Contributors consider how the new can be incorporated into the old how designing for the very short term has significant advantages how what is temporary can be re used and how the design of materials buildings and landscapes can improve sustainability and enhance experiences of time passing Many designers have replaced the ideal of timelessness and the view of time as a series of singular static moments with an enriched and more nuanced perspective treating time as a source of inspiration to be embraced not a condition to be defended against Contributors include Juhani Pallasmaa Brian McGrath Federica Goffi Jill Stoner Richard Garber and Eric Parry Designers featured include Agence Ter Shigeru Ban BanG Studio Diller Scofidio Renfro EMF Landscape Architects Gluck GRO Architects Interboro Partners Toyo Ito Kengo Kuma Enric Miralles Eric Parry Architects Carlo Scarpa Taylor Cullity Lethlean UNStudio and Peter Zumthor Rendering Kyle May, Julia van den Hout, 2012-01-01 As information is distributed and consumed at an increasingly rapid pace one of the most effective or at least pervasive ways to communicate architectural ideas is through renderings Typically a perspectival image that can be understood without any knowledge of architectural drawing conventions the rendering derives power from its accessibility to a wide audience hence its crucial role in design competitions client presentations press releases and other such public forums While these architectural visualizations are certainly nothing new advances in software and hardware have enabled renderings to be made faster and more realistic than ever before This presents both an opportunity and a challenge On the one hand design concepts can now be tested and conveyed with an unprecedented degree of visual accuracy Conversely whether through omission extreme dramatization or even intentional fakery architects now have the ability to realistically depict the impossible Furthermore both clients and public are beginning to expect photorealistic imagery even at the earliest stages of a project when supposed realism can oftentimes belie the fundamentally speculative nature of design Given the importance of these images in mediating between architects and the people they ultimately serve CLOG will critically assess the state of renderings today CONTRIBUTORS Michael Abrahamson Bertrand Benoit Rachel Berger Jon Brouchoud Eric de Broche des Combes Ilana Cohen Margot Connor Victoria Easton Scott Farrar Kurt W Forster Kevin Frank Fabrizio Gallanti Pablo Gallego Picard Donald P Greenberg Trond Greve Andersen Benjamin Halpern Kevin Hayes John Hill Julia van den Hout Incorporated Alfie Koetter Laptop LTL Architects Nancy Lin Carl Lostritto Thomas Lozada The Functionality Andrew Lyon Mansilla Y Tunon

Touching Architecture Anthony Brand, 2022-12-30 This book is about perception emotion and affect in architecture how and why we feel the way that we do and the ways in which our surroundings and bodies contribute to this Our experience of architecture is an embodied one with all our senses acting in concert as we move through time and space The book picks up where much of the critique of architectural aestheticism at the end of the twentieth century left off illustrating the limitations and potential consequences of attending to architecture as the visually biased practice which has steadily become the status quo within both industry and education It draws upon interdisciplinary research to elucidate the reasons why this is counter productive to the creation of meaningful places and to articulate the embodied richness of our touching encounters A felt phenomenology is introduced as a more than visual alternative capable of sustaining our physical emotional and psychological well being By recognising the reciprocal and participatory relationship that exists between atmospheric affect and our phenomenological bodies we begin to appreciate the manifold ways in which we touch and are touched by our built environment As such Touching Architecture will appeal to those with an interest in architectural history and theory as well as those interested in the topic of atmospheres affect and embodied perception

approached as sites of revelation around scale time materiality deviance and breakages With humour and guile she tells the story of what systems have come to mean how they have been sold to us and the real world consequences of the power that flows through them Systems Ultra goes beyond narratives of technological exceptionalism to explore how we experience the complex systems which influence our lives how to understand them more clearly and perhaps how to change them Out There: Experimental architecture ,2008 **Body, Space, and Place in Collective and Collaborative Drawing** Helen Gørrill,Jill Journeaux,Sara Reed,2020-01-15 Building on the success of the first volume in this series of research on collective and collaborative drawing this book s key themes are linked through the concepts of body space and place The location of the body in art has always been central but the exploration of it here in relation to place and space uncovers a wide range of exciting and different contexts relationships and materials Space is examined through the practice and theorisation of drawing through the ongoing artistic practices of the authors and the writings of Berger and Derrida in relation to making viewing and understanding the drawing process Place is examined through unique approaches to considering drawing through multiple consecutive and site specific places through place as a changing and temporal site and through the idea of the non place The contributors in this volume include academics artists dancers researchers designers and architects from across the globe *The Architecture Co-laboratory* Kas Oosterhuis,Lukas Feireiss,2006 Publicatie n a v de conferentie gehouden op 1 april 2006 op de faculteit Bouwkunde van de TU Delft over de huidige en toekomstige veranderingen rond de digitaal ontworpen architectuur en designpraktijk Visioning Technologies Graham Cairns,2016-12-08 Visioning Technologies brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight understood to include orthographic projection perspective drawing telescopic devices photography film and computer visualization amongst others Each chapter deals with its own area and historical period of expertise organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today Paradoxically it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world Vernacular Architecture: Towards a Sustainable Future C.
