Hyper Realistic Computer Generated Architectural Renderings:

Hyper-realistic Oscar Riera Ojeda, Lucas Hugo Guerra, 1996 This fully illustrated book explores how architectural leaders are using CAD and rendering software to create ever more dynamic forms and more complex building interrelationships It uses detailed computer models fly through animations and full sound videos complete with interviews with architects renders and computer artists The interactive CD takes users on an exquisite 3 D journey through each project

Hyper-Realistic Lucas H. Guerra, Oscar Riera Ojeda, 1996 *Rendering* Kyle May, Julia van den Hout, 2012-01-01 As information is distributed and consumed at an increasingly rapid pace one of the most effective or at least pervasive ways to communicate architectural ideas is through renderings Typically a perspectival image that can be understood without any knowledge of architectural drawing conventions the rendering derives power from its accessibility to a wide audience hence its crucial role in design competitions client presentations press releases and other such public forums While these architectural visualizations are certainly nothing new advances in software and hardware have enabled renderings to be made faster and more realistic than ever before This presents both an opportunity and a challenge On the one hand design concepts can now be tested and conveyed with an unprecedented degree of visual accuracy Conversely whether through omission extreme dramatization or even intentional fakery architects now have the ability to realistically depict the impossible Furthermore both clients and public are beginning to expect photorealistic imagery even at the earliest stages of a project when supposed realism can oftentimes belie the fundamentally speculative nature of design Given the importance of these images in mediating between architects and the people they ultimately serve CLOG will critically assess the state of renderings today

Touching Architecture Anthony Brand, 2022-12-30 This book is about perception emotion and affect in architecture how and why we feel the way that we do and the ways in which our surroundings and bodies contribute to this Our experience of architecture is an embodied one with all our senses acting in concert as we move through time and space The book picks up where much of the critique of architectural aestheticism at the end of the twentieth century left off illustrating the limitations and potential consequences of attending to architecture as the visually biased practice which has steadily become the status quo within both industry and education It draws upon interdisciplinary research to elucidate the reasons why this is counter productive to the creation of meaningful places and to articulate the embodied richness of our touching encounters A felt phenomenology is introduced as a more than visual alternative capable of sustaining our physical emotional and psychological well being By recognising the reciprocal and participatory relationship that exists between atmospheric affect and our phenomenological bodies we begin to appreciate the manifold ways in which we touch and are touched by our built environment As such Touching Architecture will appeal to those with an interest in architectural history and theory as well as those interested in the topic of atmospheres affect and embodied perception *Systems Ultra* Georgina Voss, 2024-01-30 A TOOLBOX FOR COMPREHENDING AND CHANGING THE WORLD *Systems Ultra* explores how we experience complex systems the mesh of things people and ideas interacting to produce their own patterns and behaviours What does it mean when a car which runs on code drives dangerously What does massmarket graphics software tell us about the workplace politics of architects And in these human made systems which phenomena are designed and which are emergent In a world of networked technologies global supply chains and supranational regulations there are growing calls for a new kind of literacy around systems and their ramifications At the same time we are often told these systems are impossible to fully comprehend and are far beyond our control Drawing on field research and artistic practice around the industrial settings of ports air traffic control architectural software payment platforms in adult entertainment and car crash testing Georgina Voss argues that complex systems can be approached as sites of revelation around scale time

materiality deviance and breakages With humour and guile she tells the story of what systems have come to mean how they have been sold to us and the real world consequences of the power that flows through them Systems Ultra goes beyond narratives of technological exceptionalism to explore how we experience the complex systems which influence our lives how to understand them more clearly and perhaps how to change them □□□□ ,2006-04 **Rendering in SketchUp** Daniel Tal,2013-03-25 The sure way for design professionals to learn SketchUp modeling and rendering techniques Rendering In SketchUp provides instructions for creating 3D photoreal graphics for SketchUp models using integrated rendering programs The book serves as a beginner rendering manual and reference guide to further develop rendering skills With an emphasis on step by step process SketchUp users learn a universal approach to rendering varied SketchUp projects including architecture interiors and site design models The book focuses on tasks and principles at the core of photorealistic rendering including Rendering process Learn a step by step process focused on workflow within SketchUp s familiar workspace Universal method Understand how the process can be used to work with a variety of different integrated rendering programs including Shaderlight SU Podium and Twilight Render These programs are easy to learn and function in SketchUp Textures and materials Discover how to obtain apply and edit texture images representing surfaces Component details Learn how to acquire and organize model details to allow for rich expressive settings while maintaining computer and SketchUp performance Exterior and simulated lighting Learn to set exterior lighting with the SketchUp s Shadow menu or illuminate a scene with simulated lights lamps and bulbs Render settings Use specific settings for various rendering programs to quickly set texture character image quality and graphic output Computer specifications Find out how computers produce renders and the type of computer hardware required to streamline the process Photoshop post processing Learn how to further refine rendered images in Photoshop Free online chapters The book reviews specific settings for SketchUp and the rendering plug in Shaderlight Given the ever changing nature of technology free online accompanying chapters detail settings for additional integrated rendering programs including SU Podium Twilight Render and more Interiors ,1996-10 **Choice** ,1998 **Construction Index** ,1997 **Architecture Timed** ,2016-01-08 The traditional veneration of architecture for its monumental and enduring qualities seems to be changing Architects and other designers are moving away from seeking permanence towards a more open creative use of what time has to offer This is revealed in new approaches to historic preservation the proliferation of temporary structures concerns regarding sustainability and the employment of time efficient processes Architecture Timed explores the role of ideas about time in the design inclinations and choices of contemporary designers of the environment Contributors consider how the new can be incorporated into the old how designing for the very short term has significant advantages how what is temporary can be re used and how the design of materials buildings and landscapes can improve sustainability and enhance experiences of time passing Many designers have replaced the ideal of timelessness and the view of time as a series of singular static moments with an
