Landmines And Unexploded Ordnance A Resource:

Landmines And Unexploded Ordnance Rae McGrath, 2000-03-20 Describes the resilience of African traditional farming practices in resisting the imposition of Western development schemes by powerful elites *When the Bombs Stopped* Erin Lin, 2024-05-21 How undetonated bombs from a war that ended more than fifty years ago still affect Cambodian farmers and their land Over the course of the Vietnam War the United States dropped 500 000 tons of bombs over Cambodia more than the combined weight of every man woman and child in the country What began as a secret CIA infiltration of Laos eventually expanded into Cambodia and escalated into a nine year war over the Ho Chi Minh trail fought primarily with bombs Fifty years after the last sortie residents of rural Cambodia are still coping with the unexploded ordnance that covers their land In *When the Bombs Stopped* Erin Lin investigates the consequences of the US bombing campaign across postconflict Cambodia Drawing on interviews original econometric analysis and extensive fieldwork Lin upends the usual scholarly perspective on the war and its aftermath presenting the viewpoint of those who suffered the bombing rather than those who dropped the bombs She shows that Cambodian farmers stay at a subsistence level because much of their land is too dangerous to cultivate and yet paradoxically the same bombs that endanger and impoverish farming communities also protect them deterring predatory elites from grabbing and commodifying their land Lin argues that the half century legacy of American bombs has sedimented the war into the layers of contemporary Cambodian society Policies aimed at developing or modernizing Cambodia whether economic liberalization or authoritarian consolidation must be realized in an environment haunted by the violence of the past As the stories Lin captures show the bombing served as a critical juncture in these farming villages marking the place in time where development stopped **Doing Their Bit** Kimberly Brice

O'Donnell, 2019-05-08 The first in depth study of the role of canines in WWII Britain an important but hitherto under represented subject with photos included Society of Army Historical Research The Second World War allowed for the use of an unprecedented number of dogs for military duties both internationally and among the British Armed Forces On the British Home Front civilians responded to calls from the British Army's War Dogs Training School and the Ministry of Aircraft Production Guard Dog Training School by donating their canine pets for military training and employment for the duration As dogs were instructed in roles with the British Army the Royal Air Force and the London Civil Defence Region the distinction between pet and trained working animal became increasingly unclear While civilians and servicemen alike continued to view military dogs as pets many also saw trained canines as human like soldiers doing their bit a depiction promulgated by both the military and the wartime press Yet historians have paid little attention to the subject In the first comprehensive scholarly account of the employment of British military and Civil Defence dogs in the Second World War Kimberly Brice O'Donnell traces the story from the belated establishment of the short lived War Dog School and the Messenger Dog Service of the First World War to the more recent employment of canines in Iraq and Afghanistan With a focus on WWII *Doing their Bit* examines

why and how dogs were trained and employed and how humans shaped and perceived their use Using archival material O Donnell analyzes the performance of guard military police patrol mine detection and rescue dogs in training and on operations by considering the advantages and disadvantages of canines in such roles Military and Civil Defence dogs offered a number of advantages over humans and technological equipment and the experience gained by dog trainers and handlers led to the continued employment of canines in the postwar period While the use of horses and other animals has since diminished World War II marked a turning point in the history of the British military dog ushering in the seemingly permanent training of dogs for police and military roles

Governance, Natural Resources and Post-Conflict

Peacebuilding Carl Bruch, Carroll Muffett, Sandra Nichols, 2016-04-07 When the guns are silenced those who have survived armed conflict need food water shelter the means to earn a living and the promise of safety and a return to civil order Meeting these needs while sustaining peace requires more than simply having governmental structures in place it requires good governance Natural resources are essential to sustaining people and peace in post conflict countries but governance failures often jeopardize such efforts This book examines the theory practice and often surprising realities of post conflict governance natural resource management and peacebuilding in fifty conflict affected countries and territories It includes thirty nine chapters written by more than seventy researchers diplomats military personnel and practitioners from governmental intergovernmental and nongovernmental organizations The book highlights the mutually reinforcing relationship between natural resource management and good governance Natural resource management is crucial to rebuilding governance and the rule of law combating corruption improving transparency and accountability engaging disenfranchised populations and building confidence after conflict At the same time good governance is essential for ensuring that natural resource management can meet immediate needs for post conflict stability and development while simultaneously laying the foundation for a sustainable peace Drawing on analyses of the close relationship between governance and natural resource management the book explores lessons from past conflicts and ongoing reconstruction efforts illustrates how those lessons may be applied to the formulation and implementation of more effective governance initiatives and presents an emerging theoretical and practical framework for policy makers researchers practitioners and students Governance Natural Resources and Post Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post conflict peacebuilding and natural resource management The project has generated six books of case studies and analyses with contributions from practitioners policy makers and researchers Other books in this series address high value resources land water livelihoods and assessing and restoring natural resources

Humanitarian Disarmament Treasa Dunworth, 2020-08-06 The humanitarian framing of disarmament is not a novel development but rather represents a re emergence of a much older and long standing sensibility of humanitarianism in disarmament The Book rejects the big bang theory that presents the Anti Personnel Landmines Convention 1997 and its successors the Convention on Cluster Munitions

2008 and the Treaty on the Prohibition of Nuclear Weapons 2017 as a paradigm shift from an older traditional state centric approach towards a more progressive humanitarian approach It shows how humanitarian disarmament has a long and complex history which includes these treaties This book argues that the attempt to locate the birth of humanitarian disarmament in these treaties is part of the attempt to cleanse humanitarian disarmament of politics presenting humanitarianism as a morally superior discourse in disarmament However humanitarianism carries its own blind spots and has its own hegemonic leanings It may be silencing other potentially more transformative discourses

Foreign Aid and Landmine Clearance Matthew Breay Bolton, 2010-01-30 In the decade since the signing of the Ottawa Treaty which banned the production and use of anti personnel mines governments have spent over 3 billion on clearing up and mitigating the security threat of mines cluster munitions and other unexploded ordnance in the world s current and former war zones However this flow of cash into regions dominated by violent social structures raises numerous political issues Through detailed archival and field research this book explores the politics behind the allocation and implementation of foreign aid by the US and Norway for demining in Afghanistan Bosnia and Sudan It is an essential resource for practitioners and policymakers working in the field of landmine clearance and for students and researchers of Development Studies and post war reconstruction

Assessing and Restoring Natural Resources In Post-Conflict Peacebuilding David Jensen, Stephen Lonergan, 2013-02-15 When a country emerges from violent conflict the management of the environment and natural resources has important implications for short term peacebuilding and long term stability particularly if natural resources were a factor in the conflict play a major role in the national economy or broadly support livelihoods Only recently however have the assessment harnessing and restoration of the natural resource base become essential components of postconflict peacebuilding This book by thirty five authors examines the experiences of more than twenty countries and territories in assessing post conflict environmental damage and natural resource degradation and their implications for human health livelihoods and security The book also illustrates how an understanding of both the risks and opportunities associated with natural resources can help decision makers manage natural resources in ways that create jobs sustain livelihoods and contribute to economic recovery and reconciliation without creating new grievances or significant environmental degradation Finally the book offers lessons from the remediation of environmental hot spots restoration of damaged ecosystems and reconstruction of the environmental services and infrastructure necessary for a sustainable peace Assessing and Restoring Natural Resources in Post Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post conflict peacebuilding and natural resource management The project has generated six books of case studies and analyses with contributions by practitioners policy makers and researchers Other books address highvalue resources land water livelihoods and governance

Postcolonial Literature and Challenges for the New Millennium Lucienne Loh, Malcolm Sen, 2017-10-02 This volume brings together an international range of postcolonial scholars to explore four distinct themes which are inherently interconnected within the globalised landscape of the early 21st century China Islamic fundamentalism civil war and environmentalism Through close reading a range of literary texts by writers drawn from across the globe these essays seek to emphasise the importance of literary aesthetics in situating the theoretical underpinnings and political motivations of postcolonial studies in the new millennium Colonial legacies especially in terms of structuring exploitative capitalist relations between countries and regions are shown to persist in postcolonial nations in the form of global civil wars and systemic environmental waste Chinese authoritarianism and the Indian picturesque represent less familiar forms of neo colonialism These essays not only engage with established writers such as Salman Rushdie and Anita Desai they also critically reflect on work by Nadeem Aslam Mai Couto Romesh Gunesekara Bei Dao and Ma Jian This book was originally published as a special issue of Textual Practice The Devil's Gardens Lydia Monin, 2011-12-31 The image I have is a kid on a country lane on a Saturday afternoon herding his family cattle meaning no harm to anybody and putting one step wrong It s one thing to die in combat it s one thing to die defending land but it s another thing to die tending cattle on a Saturday afternoon and we want a world where that doesn t happen Michael Ignatieff During the twentieth century a landmine plague raged across the globe It began on the battlefields of two world wars it gathered momentum in Korea and Vietnam and then spread like wildfire throughout the developing world The Devil s Gardens is the definitive story of the landmine It is the story of the development and proliferation of a weapon of terror It is also the story of suffering and devastation and a worldwide crusade to put an end to the curse of landmines forever The issues surrounding landmines and their continued use are controversial Drawing on a wide range of

distinguished interviewees and the authors first hand experiences in severely mine affected countries *The Devil s Gardens* look at all sides of the landmine story *The Logic of Humanitarian Arms Control and Disarmament* Nik Hynek,Anzhelika Solovyeva,2020-11-10 This novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes These regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect In International Relations regime analysis has been dominated by several generations of regime theory theorization As this book makes clear not only has the IR Regime Theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes but it too heuristically suffered from its rigid pegging to general IR Theory It is not surprising then that the evolution of IR Regime Theory has largely been mirroring the evolution of IR Theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory The commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes It provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of IR Regime Theory In doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of IR based on conventional grand mid range theorization

The SAGE Encyclopedia of War: Social Science Perspectives Paul Joseph, 2016-06-15. Traditional explorations of war look through the lens of history and military science, focusing on big events, big battles, and big generals. By contrast, The SAGE Encyclopedia of War: Social Science Perspective views war through the lens of the social sciences, looking at the causes, processes, and effects of war, and drawing from a vast group of fields such as communication and mass media, economics, political science, and law, psychology, and sociology. Key features include: More than 650 entries organized in an A to Z format; authored and signed by key academics in the field; Entries conclude with cross references and further readings, aiding the researcher further in their research journeys; An alternative Reader's Guide table of contents groups articles by disciplinary areas and by broad themes; A helpful Resource Guide directing researchers to classic books, journals, and electronic resources for more in depth study. This important and distinctive work will be a key reference for all researchers in the fields of political science, international relations, and sociology.

WAR AND THE WORLD Dr. LI, JIN WEI, 2024-07-24. War has long been a defining feature of human history, shaping societies, economies, and the lives of individuals in profound and lasting ways. It is a complex and multifaceted phenomenon encompassing not only armed conflict between nations but also internal conflicts, civil wars, and insurgencies. The impact of war extends far beyond the battlefield, affecting every aspect of human existence and leaving a lasting imprint on generations to come. At its core, war represents a breakdown of diplomacy and a resort to violence as a means to resolve or resolving conflicts. It arises from various causes, from territorial disputes and ideological differences to competition for resources and power. Throughout history, wars have been fought for land, religion, independence, political ideologies, and countless other motivations. Regardless of the reasons behind them, the consequences of war are far reaching and profound. One of the most devastating impacts of war is the loss of human life. Countless soldiers and civilians have perished on the battlefield, leaving behind grieving families and shattered communities. Unfathomable suffering caused by violence, displacement, and the destruction of people's homes and livelihoods is a common feature of the horrors of war. The cost to survivors, physical and mental health, is tremendous, and they frequently deal with trauma, impairments, and lasting psychological scars. Beyond the immediate casualties, war can also have long term consequences on societies and economies. Infrastructure is decimated, leaving communities without access to essential healthcare, education, and clean water. Economic systems collapse as resources are diverted to support military efforts, leading to poverty, unemployment, and widespread instability. The displacement of populations and the disruption of social structures further exacerbate these challenges.

creating a cycle of hardship and dependency that can persist for generations Moreover the impact of war extends beyond borders with neighbouring countries often being drawn into the conflict or experiencing its ripple effects The global community also feels the repercussions of war through the displacement of refugees the strain on humanitarian resources and the potential for international tensions and escalations In an interconnected world no country is truly isolated from the consequences of war underscoring the urgent need for diplomacy conflict resolution and the prevention of armed conflicts Understanding the impact of war requires examining both its immediate and long term effects It necessitates a comprehensive analysis of armed conflict s social economic political and psychological dimensions We can gain insights into war s causes dynamics and consequences through historical studies firsthand accounts and scholarly research Such knowledge can help inform policies and strategies to mitigate the impact of war promote peace and foster reconciliation in the aftermath of conflict In exploring the impact of war we will delve into various aspects ranging from the human cost and humanitarian consequences to the economic aftermath and the challenges of post war reconstruction We will examine case studies from different historical periods and geographical regions shedding light on the diverse experiences and lessons learned from conflicts worldwide By grappling with the complexities of war we aim to foster a deeper understanding of its effects and contribute to the ongoing discourse on peacebuilding and conflict resolution Federal Register ,2007-12

Activating Psychosocial Local Resources in Territories Affected by War and Terrorism E. Baloch-Kaloianov,A. Mikus-Kos,2009-08-25 In this publication the necessity of activation and building local resources needed for recovery and development is highlighted at the level of individuals social systems and structures social networks civil society and at the level of the community in general This combined approach is a solid basis for the efficiency and effectiveness of programs and assures sustainability of outcomes Mental health and psychosocial functioning of the population in post conflict times are of crucial importance for the individual and community recovery and development of social capital and for the social and political stability That is an important reason why mental health and psychosocial programs financed by foreign donors are run in areas affected by war The bulk of psychosocial activities are aimed at helping people overcome experienced traumas and losses and to cope with post conflict difficult circumstances Programs aiming to strengthen the mental health and psychosocial functioning of the population are typically directed towards the groups that are either more easy to access through the school system such as children and youth or to severely affected and vulnerable groups such as veterans survivors of torture and family losses Additional reasons for targeting the children and youth are that their developmental stage makes them particularly receptive for positive and negative influences they are the future of every society This publication will contribute to reducing the gap between declared principles of local capacity building and mobilization of local resources and the reality of psychosocial interventions and consequently to a more efficient use of international funds
