W. S. Cleveland, 2018-02-07 Excerpt from *Landscape Architecture As Applied to the Wants of the West With an Essay on Forest Planting on the Great Plains* The term Landscape Architecture is objectionable as being only figuratively expressive of the art it is used to designate I make use of it under protest as the readiest means of making myself understood in the absence of a more appropriate term If the art is ever developed to the extent I believe to be within its legitimate limits it will achieve for itself a name worthy of its position Until it does so it is idle to attempt to exalt it in the world's estimation by giving it a high sounding title My object in these few pages is simply to show that by whatever name it may be called the subdivision and arrangement of land for the occupation of civilized men is an art demanding the exercise of ingenuity Judgment and taste and

one which nearly concerns the interests of real estate proprietors and the welfare and happiness of all future occupants About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Landscape Architecture, as Applied to the Wants of the West* H W S 1814-1900 Cleveland,2016-05-08 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant
