Landscape And Power In Vienna:

Landscape and Power in Vienna Robert Louis Rotenberg, 1995 Each of the groups that has held political power in Vienna over the past three centuries has left its mark on the city's history institutions and architecture In *Landscape and Power in Vienna* Robert Rotenberg shows how such groups monarchists and republicans fascists and socialists also influenced another equally vital aspect of urban identity in this central European metropolis the landscape Working as both a historian and an ethnographer Rotenberg examines the relationship among human experience landscape design and the ideas that design was meant to represent Understanding this relationship Rotenberg explains makes it possible to examine a Viennese garden today and deduce the ideology of those who planted it From Gardens of Order and Gardens of Liberty to Gardens of Reaction and Gardens of Renewal the chapters of *Landscape and Power in Vienna* show how leaders and citizens shared ideas about landscape emerge in the kinds of gardens they produce Landscape itself is a language Rotenberg concludes People learn the meanings of landscape in a city from the landscape itself *Green Landscapes in the European City, 1750–2010* Peter Clark, Marjaana Niemi, Catharina Nolin, 2016-12-08 Green space is a fundamental concept for understanding modern and contemporary urban society shedding light not only on the ecological development of cities but also societal relations urban governance and planning processes Closely linked to issues of environmental change changing perceptions of nature urban well being and social integration as well as city economic competitiveness and branding it is an important element both in the internationalisation of European cities and the forging of their distinctive communal identities Building upon recent research on the history of green landscapes in the city in Europe and North America this volume mirrors the burgeoning global attention to urban green space developments from city policy makers and planners architects climatologists ecologists geographers and other social scientists Taking case studies from Paris London Berlin Helsinki and other leading centres the volume examines when why and how green landscapes evolved in major cities and the extent to which they have been shaped by shared external forces as well as by distinctive and specific local needs Quantifying green space trends in this way raises important issues of classification and categorisation of the different varieties of urban green space While urban parks have received considerable coverage many other smaller less prestigious spaces have been largely ignored This volume argues that green landscapes can only be properly understood when the full range of spaces from parks to recreation grounds housing areas allotments and domestic gardens is taken into account Adopting a broader approach to urban green space helps put European developments during the 19th and 20th centuries into a global perspective **Entire of Itself?** Milica Prokic, Pavla Šimková, 2024-03-15 The study of islands is booming Small wonder islands have played a key role in the history of continents have been crucial locales of state making have served dictatorships as sites of prison systems and have acted as frontiers and stepping stones of empires However the role that island environments have played in creating and shaping these histories has so far received little attention To understand why an island became a penal colony

an atomic test site or a tourist destination we need to take a close look at its environmental peculiarities its physical shape its geology its climate its flora and fauna and its position vis vis other places And to more deeply comprehend an island s place in history we must consider the changing ways in which it was perceived used valued or dismissed protected or mistreated over time Through fourteen stories of islands and archipelagos from around the globe Entire of Itself Towards an Environmental History of Islands showcases islands as dynamic entities that both shape history and are shaped by it Covering time periods from antiquity to the present day Entire of Itself attempts a group portrait of this exceptional category of places in the context of environmental history Exploring the intertwined temporal material and identity layers of island environments and their transformations in response to human endeavours of conservation exploitation and experimentation the contributions in this volume challenge the traditional center periphery perspective and instead take an island centred approach delving into both the islands own stories and their role in larger historical developments *Power, Affect, and Identity in the Linguistic Landscape* Xiaofang Yao,2024-12-13 Uncovering the complexity of linguistic diversity and semiotic creativity this book examines the issues of power affect and identity in both physical and digital linguistic landscapes Based on fieldwork with various Chinese communities in Australia the book offers unique insights into the uses of languages semiotic resources and material objects in public spaces and discusses the motives and ideologies that underline these linguistic and semiotic practices Each chapter frames the sociolinguistic issue emerging from the linguistic landscape under investigation and shows readers how the personal trajectories of individuals the availability of semiotic resources and the historicity of spaces collectively shape the meanings of publicly displayed language items in offline and online spaces Supported by a wealth of interviews media and archival data the book not only advances readers understanding of how linguistic landscape is structured by various historical political and sociocultural factors but also enables them to reimagine the linguistic landscape through the lens of emerging digital methods This book is an ideal resource for researchers advanced undergraduates and graduate students of applied linguistics and sociolinguistics who are interested in the latest advances in linguistic landscape research within virtual and material contexts Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **Historical Geography** ,1998 **Encyclopedia of Urban Studies** Ray Hutchison,2010 An encyclopedia about various topics relating to urban studies *Landscape mosaics* Council of Europe,2022-12-01 Landscape protection management and planning entail rights and responsibilities for everyone The Council of Europe Landscape Convention aims to promote the protection management and planning of landscapes and to organise international co operation in this field It applies to the entire territory of the contracting parties and covers natural rural urban and peri urban areas It concerns landscapes considered outstanding as well as everyday or degraded areas This publication presents thoughts and proposals for the implementation of the convention and addresses a mosaic of key issues

related to its future It forms part of a process of reflection on major themes concerning the living environment Nature and the City Michael J. Rawson,2005 **Landscapes and Landforms of Austria** Christine Embleton-Hamann,2022-05-20 This book intends to identify and publicize the unique features of Austrian geomorphology In a country which stretches from the core of the European Alps to the Hungarian plain there is huge variety of landforms and landscapes This book reveals that variety Part 1 sets the context of the Austrian landscape as a whole Part 2 is the core of the volume and comprises a careful selection of the most outstanding landscapes in Austria Each of the chapters results from detailed research conducted by an author over many years Austria s landscapes are especially attractive because of the great variety of topographic slopes geologic foundations and the special landscape legacy from the Quaternary period Glacial and Karst landscapes dominate but there are superb examples of granite weathering landscapes and geologically recent volcanism The book is lavishly illustrated with about 350 color images and is securely based on scientific scholarship Power and Architecture Michael Minkenberg,2014-06-01 Capital cities have been the seat of political power and central stage for their state s political conflicts and rituals throughout the ages In the modern era they provide symbols for and confer meaning to the state thereby contributing to the invention of the nation Capitals capture the imagination of natives visitors and outsiders alike yet also express the outcomes of power struggles within the political systems in which they operate This volume addresses the reciprocal relationships between identity regime formation urban planning and public architecture in the Western world It examines the role of urban design and architecture in expressing or hiding ideological beliefs and political agenda Case studies include old capitals such as Rome Vienna Berlin and Warsaw new ones such as Washington DC Ottawa Canberra Ankara Bonn and Bras lia and the European capital Brussels Each case reflects the authors different disciplinary backgrounds in architecture history political science and urban studies demonstrating the value of an interdisciplinary approach to studying cities *Defining Landscape Democracy* Shelley Egoz,Karsten Jørgensen,Deni Ruggeri,2018-06-29 This stimulating book explores theories conceptual frameworks and cultural approaches with the purpose of uncovering a cross cultural understanding of landscape democracy a concept at the intersection of landscape democracy and spatial justice The authors of *Defining Landscape Democracy* address a number of questions that are critical to the contemporary discourse on the right to landscape Why is democracy relevant to landscape How do we democratise landscape How might we achieve landscape and spatial justice **Cultural Landscapes of Post-Socialist Cities** Mariusz Czepczynski,2016-04-22 The cultural landscapes of Central European cities reflect over half a century of socialism and are marked by the Marxists vision of a utopian landscape Architecture urban planning and the visual arts were considered to be powerful means of expressing the people s power However since the velvet revolutions of 1989 this urban scenery has been radically transformed by new forces and trends infused by the free market democracy and liberalization This has led to landscape cleansing and recycling as these former communist nations used new architectural functional and social forms to

transform their urban spaces their meanings and uses Comparing case studies from different post socialist cities this book examines the culturally conditional variations between local powers and structures despite the similarities in the general processes and systems It considers the contemporary cultural landscapes of these post socialist cities as a dynamic fusion of the old communist forms and new free market meanings features and democratic practices of global influences and local icons The book assesses whether these urban spaces clearly reflect the social cultural and political conditions and aspirations of these transitional countries and so a critical analysis of them provides important insights
