Beyond Meaning: A Journey Across Language, Perception and Experience Gaetano Fiorin, Denis Delfitto, 2020-06-17
Natural languages idioms such as English and Cantonese Zulu and Amharic Basque and Nicaraguan Sign Language allow their speakers to convey meaning and transmit meaning to one another But what is meaning exactly What is this thing that words convey and speakers communicate Few questions are as elusive as this Yet few features are as essential to who we are and what we do as human beings as the capacity to convey meaning through language In this book Gaetano Fiorin and Denis Delfitto disclose a notion of linguistic meaning that is structured around three distinct yet interconnected dimensions a linguistic dimension relating meaning to the linguistic forms that convey it a material dimension relating meaning to the material and social conditions of its environment and a psychological dimension relating meaning to the cognitive lives of its users By paying special attention to the puzzle surrounding first person reference the way speakers exploit language to refer to themselves and by capitalizing on a number of recent findings in the cognitive sciences Fiorin and Delfitto develop the original hypothesis that meaningful language shares the same underlying logical and metaphysical structure of sense perception effectively acting as a system of classification and discrimination at the interface between cognitive agents and their ecologies Speech Perception and Linguistic Experience Winifred Strange, 1995 **Sensory Linguistics** Bodo Winter, 2019-04-24 One of the most fundamental capacities of language is the ability to express what speakers see hear feel taste and smell Sensory Linguistics is the interdisciplinary study of how language relates to the senses This book deals with such foundational questions as Which semiotic strategies do speakers use to express sensory perceptions Which perceptions are easier to encode and which are ineffable And what are appropriate methods for studying the sensory aspects of linguistics After a broad overview of the field a detailed quantitative corpus based study of English sensory adjectives and their metaphorical uses is presented This analysis calls age old ideas into question such as the idea that the use of perceptual metaphors is governed by a cognitively motivated hierarchy of the senses Besides making theoretical contributions to cognitive linguistics this research monograph showcases new empirical methods for studying lexical semantics using contemporary statistical methods *The Psychology of Human Thought* Robert J. Sternberg, Edward E. Smith, 1988-02-26
Linguistic Perception and Second Language Acquisition Paola Rocío Escudero Neyra, 2005 Sensory Perceptions in Language, Embodiment and Epistemology Annalisa Baicchi, Rémi Digonnet, Jodi L. Sandford, 2018-07-21 The book illustrates how the human ability to adapt to the environment and interact with it can explain our linguistic representation of the world as constrained by our bodies and sensory perception The different chapters discuss philosophical scientific and linguistic

perspectives on embodiment and body perception highlighting the core mechanisms humans employ to acquire knowledge of reality These processes are based on sensory experience and interaction through communication **Modeling Language, Cognition And Action - Proceedings Of The Ninth Neural Computation And Psychology Workshop** Angelo

Cangelosi, Guido Bugmann, Roman M Borisjuk, 2005-05-19 This volume collects together peer reviewed versions of most of the papers presented at the Ninth Neural Computation and Psychology Workshop NCPW9 held in 2004 at the University of Plymouth England The conference invited submissions on neural computation models of all cognitive and psychological processes The special theme of this year s workshop was Modeling of Language Cognition and Action This topic had the aim to extend the conference appeal from the connectionist psychology community to leaders in neuroscience robotics and cognitive systems design The chapters cover the breadth of research in neural computation and psychology with numerous papers that focus on language modeling this year s special theme The book includes chapters from internationally renowned researchers in the various fields of cognitive psychology such as Art Glenberg and Jonathan Evans as well as computer science and robotics such as Stefan Wermter Stefano Nolfi The proceedings have been selected for coverage in Neuroscience Citation Index Index to Scientific Technical Proceedings ISTP ISI Proceedings Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings Index to Social Sciences Humanities Proceedings ISSHP ISI Proceedings Index to Social Sciences Humanities Proceedings ISSHP CDROM version ISI Proceedings CC Proceedings Engineering Physical Sciences CC Proceedings Biomedical Biological Agricultural Sciences Perception and Cognition in Language and Culture Alexandra

Aikhenvald, Anne Storch, 2013-01-23 Every language has a way of talking about seeing hearing smelling tasting and touching This can be done through lexical means and through grammatical evidentials The studies presented here focus on the experssions of perception and cognition in languages of Africa Oceania and South America **Language Perceptions and Practices in Multilingual Universities** Maria Kuteeva, Kathrin Kaufhold, Niina Hynninen, 2020-04-03 This edited book examines language perceptions and practices in multilingual university contexts in the aftermath of recent theoretical developments questioning the conceptualization of language as a static entity drawing on case studies from different Northern European contexts in order to explore the effects of phenomena including internationalization widening participation and migration patterns on language attitudes and ideologies The book provides cutting edge perspectives on language uses in Northern European universities by drawing attention to the multiplicity of language practices alongside the prominence of English in international study programmes and research publication It will be of interest to students and scholars of multilingualism sociolinguistics applied linguistics and education as well as language policymakers bfiqo

Harmony Effects Across Language and Perception Gaetano Fiorin, Denis Delfitto, 2021-09-08 This book argues that perception and higher cognition are closer to each other than the Cartesian tradition maintains The research combines results from cognitive neuroscience the philosophy of perception and natural language syntax to demonstrate that all systems

of cognition draw from a common set of computational and conceptual resources

Language Experience in Second Language Speech Learning Ocke-Schwen Bohn, Murray J. Munro, 2007-01-01 Deals with the language experience in second language speech learning

Seeing and Saying Berit Brogaard, 2018-06-15 Imagine you are sitting at Starbucks glancing at the blue coffee mug in front of you The mug is blue on the outside white on the inside It's large for a mug And it's nearly full of freshly made coffee In the envisaged case you see all those aspects of the scene in front of you but it remains a question of ferocious debate whether the visual experience that makes up your seeing is a direct perceptual relation between you and your environment or a psychology state that has a content that represents the mug If your experience involves an external perceptual relation to an external mind independent object it is unlike familiar mental states such as belief and desire states which are widely considered psychological states with a representational content that stands between you and the external world Your belief that the coffee mug in front of you is blue has a content that represents the coffee mug as being blue Your desire that the coffee in the mug is still hot has a content that represents a state of affairs that may or may not in fact obtain namely the state of affairs that the coffee in the mug is still hot In this book Brit Brogaard defends the view that visual experience is like belief in having a representational content Her defense differs from most previous defenses of this view in that it begins by looking at the language of ordinary speech She provides a linguistic analysis of what we say when we say that things look a certain way or that the world appears to us to be a certain way She then argues that this analysis can be used to argue for the view that visual experience has a representation content that mediates between you and the world when you visually perceive

Language Frederick J. Newmeyer, 1988 Linguistics The Cambridge Survey is a comprehensive introduction to current research in all branches of the field of linguistics from syntactic theory to ethnography of speaking from signed language to the mental lexicon from language acquisition to discourse analysis Each chapter has been written by a specialist particularly distinguished in his or her field who has accepted the challenge of reviewing the current issues and future prospects in sufficient depth for the scholar and with sufficient clarity for the student Each volume can be read independently and has a particular focus Volume I covers the internal structure of the language faculty itself while Volume II considers the evidence for and the implications of a generativist approach to language Psycholinguistics and neurolinguistics are covered in Volume III and Volume IV concentrates on sociolinguistics and the allied fields of anthropological linguistics and discourse and conversation analysis Several of the chapters in the work concentrate on the interface between different aspects of linguistic theory or the boundaries between linguistic theory and other disciplines Thus in both its scope and in its approach the Survey is a unique and fundamental reference work It undoubtedly fulfills the editor's aims of providing a wealth of information insight and ideas that will excite and challenge all readers with an interest in linguistics

The Routledge Handbook of Second Language Acquisition and Listening Elvis Wagner, Aaron Olaf Batty, Evelina Galaczi, 2024-07-29 The Routledge Handbook of Second Language Acquisition and Listening offers a state of the art
