large comparative case studies of four distinctive states across Europe and India in a simple descriptive mode makes the reading of this book enjoyable. The domains of administration, legislation, healthcare and social welfare are undoubtedly novel ways to deal within the concept of language policy in a wider sense. The author uses discourse analysis to bring out the relationship between intention, explanation and interpretation of a phenomenon like language policy and its implementation. The social diversity as expressed in linguistic mapping is well captured in the novel idea of categories of differentiation both as a normative methodological tool and its historical empirical manifestation. **Law, Language and the Courtroom** Stanislaw Gozdz Roszkowski, Gianluca Pontrandolfo, 2021-11-25. This book explores the language of judges. It is concerned with understanding how language works in judicial contexts. Using a range of disciplinary and methodological perspectives, it looks in detail at the ways in which judicial discourse is argued, constructed, interpreted and perceived. Focusing on four central themes: constructing judicial discourse and judicial identities, judicial argumentation and evaluative language, judicial interpretation and clarity in judicial discourse, the book's ultimate goal is to provide a comprehensive and in-depth analysis of current critical issues of the role of language in judicial settings. Contributors include legal linguists, lawyers, legal scholars, legal practitioners, legal translators and anthropologists who explore patterns of linguistic organisation and use in judicial institutions and analyse language as an instrument for understanding both the judicial decision-making process and its outcome. The book will be an invaluable resource for scholars in legal linguistics and those specialising in judicial argumentation and reasoning and forensic linguists interested in the use of language in judicial settings.

**Language, Power, and Pedagogy** Jim Cummins, 2000-01-01. As linguistic diversity increases in countries around the world, policy makers and educators are faced with complex and conflictual issues regarding appropriate ways of educating a multilingual school population. This volume reviews the research and theory relating to instruction and assessment of bilingual pupils, focusing not only on issues of language learning and teaching but also the ways in which power relations in the wider society affect patterns of teacher-pupil interaction in the classroom.

**Linguistic Evidence** William M. O'Barr, 2014-05-19. With the permission of a North Carolina court, more than 150 hours of courtroom speech were recorded for this study. These tapes provided a rich archive for a variety of different types of inquiry, including the ethnography of courtroom speech and social psychological experiments focused on effects of different modes of presenting information in courts of law. Four sets of linguistic variables and related experimental studies have constituted a major portion of the research: 1) powerful versus powerless speech, 2) hypercorrect versus formal speech, 3) narrative versus fragmented testimony, and 4) simultaneous speech by witnesses and lawyers. All four sets of studies focus on the central question of importance of form over content of testimony.
