Language Conflict And Language Planning:

Language Conflict and Language Planning Ernst H. Jahr, 2011-06-15 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Language Conflict and Language Planning Einar Haugen, 1966 No detailed description available for Language Conflict and Language Planning. Language Conflict and Language Planning Einar Ingvald Haugen, 2000. Conflict and Language Planning in Quebec Richard Y. Bourhis, 1984. This book presents a coherent picture of Quebec's efforts to make French the only official language of Quebec society. This book provides many answers as to why Bill 101 was implemented by the Quebec Government but it raises numerous questions when it comes time to evaluate the impact of the Charter on different sectors of Quebec society. *Language Conflict and National Development* Jyotirindra Das Gupta, 2024-07-26. This is the first systematic study of language conflict in a developing society and of its consequences for the integrational processes of nation building. Jyotirindra Das Gupta maintains that language rivalry does not necessarily impede national integration but can actually contribute to the development of a national community. He explains that the existence of a multiplicity of language groups in a segmented society is not in itself indicative of the prospects for successful integration. Only when language groups mobilize into political interest groups is it possible to determine the pattern of intergroup conflict likely to emerge. The way in which this conflict is handled and resolved depends upon the general political atmosphere and upon the type of institutions available for decision making. In the specific case of India the author finds that because the Indian government has proved capable of meeting the demands of diverse language interests it is supported by the Indian population as a whole for its role in mediating language rivalries. This book therefore offers evidence for the efficacy of democratic procedures for political development and integration. In the course of his analysis Das Gupta discusses the impact of Indian language associations on national politics and on the political community in general, the formulation and implementation of a national language policy and the language policies of nationalist and of separatist groups both before and since Independence. In order to place the Indian experience in a wider context he provides comparative empirical data.

and Language Conflict in Afghanistan and Its Neighbors Harold Schiffman, 2011-12-09 The book was co edited by Brian Spooner Professor of Anthropology at the University of Pennsylvania Language policy in Central Asia Afghanistan and the immediately surrounding neighboring countries has a long and varied history The Iranian revolution of 1978 the collapse of the Soviet Union in 1991 and the ongoing conflict in Afghanistan since 2001 have left the area in a state of flux This volume gives a better picture about what is official and explicit what is not official but implicit or general practice and what the likely future developments might be It is very clear that multilingualism whether it involves Persian Russian or English in addition to other languages not only has long been a part of the scene but will probably continue to be so *Advances in language*

acquisition planning and corpus planning Such a shift is justified for the following reasons First the hegemonic model has a dismal track record of success in Africa and elsewhere Second the hegemonic model exacerbates linguistic conflicts in many countries Consequently policy makers shun it for fear of jeopardizing the fragile social fabric in their respective countries Last a shift away from the hegemonic model is recommended because it is too costly to implement The democratic model is undergirded by the Strategic Game Theory proposed by David Laitin It forecasts a 3 1 language outcome for most African countries This outcome supports the three language formula now called for by the United Nations Development Program UNDP
