Mills, 1977

*Auditory Prostheses* Fan-Gang Zeng, Arthur N. Popper, Richard R. Fay, 2011-09-15 Cochlear implants are currently the standard treatment for profound sensorineural hearing loss In the last decade advances in auditory science and technology have not only greatly expanded the utility of electric stimulation to other parts of the auditory nervous system in addition to the cochlea but have also demonstrated drastic changes in the brain in responses to electric stimulation including changes in language development and music perception Volume 20 of SHAR focused on basic science and technology underlying the cochlear implant However due to the newness of the ideas and technology the volume did not cover any emerging applications such as bilateral cochlear implants combined acoustic electric stimulation and other types of auditory prostheses nor did it review brain plasticity in responses to electric stimulation and its perceptual and language consequences This

proposed volume takes off from Volume 20 and expands the examination of implants into new and highly exciting areas This edited book starts with an overview and introduction by Dr Fan Gang Zeng Chapters 2-9 cover technological development and the advances in treating the full spectrum of ear disorders in the last ten years Chapters 10-15 discuss brain responses to electric stimulation and their perceptual impact This volume is particularly exciting because there have been quantum leap from the traditional technology discussed in Volume 20 Thus this volume is timely and will be of real importance to the SHAR audience

Language and Power. The Implications of Language for Peace and Development Birgit Brock-Utne, Gunnar Garbo, 2009-09-15 Language is a tool used to express thoughts to hide thoughts or to hide lack of thoughts It is often a means of domination The question is who has the power to define the world around us This book demonstrates how language is being manipulated to form the minds of listeners or readers Innocent words may be used to conceal a reality which people would have reacted to had the phenomena been described in a straightforward manner The nice and innocent concept cost sharing which leads our thoughts to communal sharing and solidarity may actually imply privatization The false belief that the best way to learn a foreign language is to have it as a language of instruction actually becomes a strategy for stupidification of African pupils In this book 33 independent experts from 16 countries in the North and the South show how language may be used to legitimize war making promote Northern interests in the field of development and retain colonial speech as languages of instruction languages of the courts and in politics The book has been edited by two Norwegians Birgit Brock Utne is a professor at the University of Oslo and a consultant in education and development From 1987 until 1992 she was a professor at the University of Dar es Salaam Gunnar Garbo author and journalist and former member of the Norwegian Parliament was the Norwegian Ambassador to Tanzania from 1987 to 1992
