## **Language Dynamics French Complete For Di:**

**The Semantics of Dynamic Space in French** Michel Aurnague, Dejan Stosic, 2019-07-29 Research on the semantics of spatial markers in French is known mainly through Vandeloise's 1986/1991 work on static prepositions. However, interest in the expression of space in French goes back to the mid 1970s and focused first on verbs denoting changes in space whose syntactic properties were related to specific semantic distinctions such as the opposition between movement and displacement. This volume provides an overview of recent studies on the semantics of dynamic space in French and addresses important questions about motion expression among which goal bias and asymmetry of motion, the status of locative PPs, the expression of manner, fictive or non-actual motion. Descriptive, experimental and formal or computational analyses are presented providing complementary perspectives on the main issue. The volume is intended for researchers and advanced students wishing to learn about both spatial semantics in French and recent debates on the representation of motion events in language and cognition.

[Neglected Aspects of Motion-Event Description](#) Laure Sarda, Benjamin Fagard, 2022-07-15 The idea of this book on Neglected Aspects of Motion Event Description comes from the observation that over the last 30 years much attention has

been devoted to the manner path divide in relation to the distinction between Verb Framed and Satellite Framed languages This mainstream focus has left aside other aspects of motion event descriptions The chapters of this volume take an in depth look at three less studied aspects of motion expression The first part of the book focuses on directional deixis especially in relation to associated motion and visual motion The second part explores variations in Source Goal asymmetries The third part investigates different types of motion event constructions e g with various types of co events Many languages are taken into consideration throughout the 11 chapters which gives the volume a clear typological dimension This book is intended for students and academics interested in motion spatial semantics typological variation and cognitive linguistics **The Lingua**
