## **Language Acquisition Program For The Severely Retarded:**

**Language Acquisition Program for the Severely Retarded [by] Louise R. Kent** Louise R. Kent, 1974

**Curriculum Guide for Deaf-Blind and Severely Multi-Handicapped Students** School District of Philadelphia 1984, 1985 Provides informal assessment extensive developmental activities and supplemental resources in four areas Designed for children whose handicapping conditions are so multiple and severe they cannot usually benefit from existing approaches that assume the presence of one or more alternate learning channels Curriculum Guide for Deaf Blind and Severely Multi Handicapped Students meets the need of those individuals with multiple sensory mental orthopedic neurological and behavior handicapping conditions The four components of the complete program cover Communication Skills 23 levels of Communication Development from the Unresponsive Child through the Beginning of Pivot Open Syntax Techniques of Daily Living Personal Hygiene Eating and Drinking Orientation and Mobility Perceptual Development Gross and Fine Motor Development Body Image Development Cognitive Development Interaction with Adults Peers and Environment Assessment and Travel Skills Sensory Stimulation Tactile Stimulation Gustatory Stimulation Olfactory Stimulation Verbal Stimulation and Auditory Stimulation *Language Acquisition Program for the Severely Retarded Or Multiply Impaired* Louise Kent-Udolf, 1974 *Biological and Behavioral Determinants of Language Development* Norman A. Krasnegor, Duane M. Rumbaugh, Richard L. Schiefelbusch, Michael Studdert-Kennedy, Esther Thelen, 2014-02-25 This book presents a current interdisciplinary perspective on language requisites from both a biological comparative perspective and from a developmental learning perspective Perspectives regarding language and language acquisition are advanced by scientists of various backgrounds speech hearing developmental psychology comparative psychology and language intervention This unique volume searches for a rational interface between findings and perspectives generated by language studies with humans and with chimpanzees Intended to render a reconsideration as to the essence of language and the requisites to its acquisition it also provides readers with perspectives defined by various revisionists who hold that language might be other than the consequence of a mutation unique to humans and might fundamentally not be limited to speech

**Language Acquisition Program for the Retarded Or Multiply Impaired** Louise Kent-Udolf, 1974 An extremely practical program for the language clinician or special educator which is designed for individual oral administration with hearing sighted severely retarded children **Language Acquisition** Jill G. De Villiers, Peter A. De Villiers, 1978 The study of language acquisition has become a center of scientific inquiry into the nature of the human mind The result is a windfall of new information about language about learning and about children themselves In *Language Acquisition* Jill and Peter de Villiers provide a lively introduction to this fast growing field Their book deals centrally with the way the child acquires the sounds meanings and syntax of his language and the way he learns to use his language to communicate with others In discussing these issues the de Villiers provide a clear and insightful treatment of the classic questions about language

acquisition Does the child show a genetic predisposition for speech or grammar or semantics which makes him uniquely able to learn human language What kinds of learning are involved in acquiring language and what kinds of experience with a language are necessary to support such learning Is there a critical period during the child's development which is optimal for language acquisition And what kind of psychological disabilities underlie the failure to acquire language

*Autism* Michael Rutter, Eric Schopler, 2012-12-06 This volume aims to provide the reader with an up to date account of knowledge research education and clinical practice in the field of autism from an international perspective The emphasis throughout is on the growing points of knowledge and on the new developments in practice We have tried to keep a balance between the need for rigorous research and systematic evaluation and the importance of expressing new ideas and concepts so that they may influence thinking at a stage when questions are being formulated and fresh approaches to treatment are being developed The book had its origins in the 1976 International Symposium on Autism held in St Gallen Switzerland but it is not in any sense a proceedings of that meeting Most papers have been extensively rewritten to provide a fuller coverage of the topic and also to take account of the issues raised at the meeting Discussion dialogues have been revised and re structured to stand as self contained chapters Many significant contributions to the conference have not been included in order to maintain the balance of a definitive review however a few extra chapters have been added to fill crucial gaps 0 We hope the result is a vivid picture of the current state of the art As editors we have been most impressed by the advances since the 1970 international conference in London
