Language, Agency, and Politics in a Constructed World Francois Debrix, 2015-05-20 Language matters in international relations Constructivists have contributed the insight that global politics is shaped by the way agents narrate history and produce discourses about themselves and about the world This insight has induced a profound reexamination of assumptions in the study of international relations The contributors to this volume examine Part I the critical linguistic discursive techniques of postmodernists and constructivists and apply them Part II to international relations *Language, Agency, and Politics in a Constructed World* François Debrix, 2003-05-29 Language matters in international relations Constructivists have contributed the insight that global politics is shaped by the way agents narrate history and produce discourses about themselves and about the world This insight has induced a profound reexamination of assumptions in the study of international relations The contributors to this volume examine Part I the critical linguistic discursive techniques of postmodernists and constructivists and apply them Part II to international relations *Routledge Handbook of International Relations in the Middle East* Shahram Akbarzadeh, 2019-03-26 This handbook examines the regional and international dynamics of the Middle East It challenges the state society dichotomy to make sense of decision making and behavior by ruling regimes The 33 chapter authors include the world's leading scholars of the Middle East and International Relations IR in order to make sense of the region This synthesis of area studies expertise and IR theory provides a unique and rigorous account of the region's current dynamics which have reached a crisis point since the beginning of the Arab Spring The Middle East has been characterized by volatility for more than a century Although the region attracts significant scholarly interest IR theory has rarely been used as a tool to understand events The constructivist approach in IR highlights the significance of state identity shaped by history and culture in making sense of international relations The authors of this volume consider how IR theory can elucidate the patterns and principles that shape the region in order to provide a rigorous account of the contemporary challenges of the Middle East The Routledge Handbook of International Relations in the Middle East provides comprehensive coverage of International Relations issues in the region Thus it offers key resources for researchers and students interested in International Relations and the Middle East A Poststructuralist Discourse Theory of Global Politics Dirk Nabers, 2015-10-07 This book develops a discourse theory of crisis and change in global politics Crisis is conceptualized as structural dislocation resting on difference and incompleteness Change is seen as the continuous but ultimately futile effort to gain a full identity The incompleteness and contingent character of the social represents the most important condition for democratic politics to become possible and for a theory of crisis and change to become conceivable In this new understanding crisis loses its everyday meaning of a periodically occurring event Instead crisis becomes an omnipresent feature of the social fabric It represents the absence of ground of social foundation and it rests within the subject as well as within the social whole *The Oxford Handbook of International Political Sociology* Stacie E.

Goddard, George Lawson, Ole Jacob Sending, 2025-04-09 This handbook provides an in depth analysis of the theoretical agendas analytical tools and substantive contributions offered by International Political Sociology It explores the range of insights available to those who use sociological theory to engage various facets of world politics from colonialism to globalization Structured around three defining commitments relationalism intersubjectivity and historicism the book outlines what is distinct about IPS where it came from and where it can go next Engaging a wide range of debates in International Relations and related fields of enquiry the volume includes contributions on seminal concepts in the social sciences including power order rule resistance and agency alongside discussion of a range of important issue areas from climate change to revolutions Taken as a whole the handbook is a seminal point of reference for understanding many of the key dynamics that shape contemporary world politics The Oxford Handbooks of International Relations is a twelve volume set of reference books offering authoritative and innovative engagements with the principal sub fields of International Relations The series as a whole is under the General Editorship of Christian Reus Smit of the University of Melbourne and Duncan Snidal of the University of Oxford with each volume edited by specialists in the field The series both surveys the broad terrain of International Relations scholarship and reshapes it pushing each sub field in challenging new directions Following the example of Reus Smit and Snidal s original Oxford Handbook of International Relations each volume is organized around a strong central thematic by scholars drawn from different perspectives reading its sub field in an entirely new way and pushing scholarship in challenging new directions

**The Conduct of Inquiry in International Relations , Popular Representations of Development** David Lewis, Dennis Rodgers, Michael Woolcock, 2014-01-23 Although the academic study of development is well established as is also its policy implementation less considered are the broader more popular understandings of development that often shape agendas and priorities particularly in representative democracies Through its accessible and provocative chapters Popular Representations of Development introduces the idea that while the issue of development defined broadly as problems of poverty and social deprivation and the various agencies and processes seeking to address these is normally one that is discussed by social scientists and policy makers it also has a wider popular dimension Development is something that can be understood through studying literature films and other non conventional forms of representation It is also a public issue one that has historically been associated with musical movements such as Live Aid and increasingly features in newer media such as blogs and social networking The book connects the effort to build a more holistic understanding of development issues with an exploration of the diverse public sphere in which popular engagement with development takes place This book gives students of development studies media studies and geography as well as students in the humanities engaging with global development issues a variety of perspectives from different disciplines to open up this new field for discussion

**Securitization and the Iraq War** Faye Donnelly, 2013-08-15 This book critiques the conceptualization of security found in mainstream and critical theoretical debates and applies this to the empirical case

of the 2003 Iraq War The Iraq War represents one of the most puzzling complex and controversial events in the post Cold War era The manner in which the Bush administration finally decided to hold Saddam Hussein accountable through military intervention provoked a worldwide outcry due to the narratives they constructed to justify the pre emptive use of force and enhanced interrogation techniques Responding to constructivist and post structuralist scholars calls for a turn to discourse and aligning its argument with critical security studies particularly the Copenhagen School CS this book conceptualizes language as a pivotal mechanism of power Adopting a Wittgensteinian approach it moves away from thinking about the nexus between security and language from a single action or speech act to a series of actions or interactions To illustrate this new approach the author examines two cases in particular the UN inspectors finding that there was no credible evidence that Iraq possessed weapons of mass destruction WMD in early 2003 and the Abu Ghraib scandal in 2004 Both events show that the boundaries and relations between securitized rules and environments are not pre given but produced in a particular language game This book will be of much interest to students of critical security studies US foreign policy and IR in general

**An Ontological Rethinking of Identity in International Studies** Yong-Soo Eun,2023-05-05 This book shows that identity studies in the discipline of International Relations IR generally cohere around two discrete understandings of being substantialism and correlationism and that their analytical theoretical and epistemological orientations are split along those lines This binary opposition makes it difficult for identity scholarship to meet the internal validity standard of coherence while unnecessarily narrowing the theoretical lenses of constructivism in IR The author argues that the best way to step outside that binary is to re ground identity in ontology of immanence The book shows that immanent ontological thinking enables us to have a pluralist epistemology and methodology for the study of identity including both positivist and interpretivist orientations without yielding a logically inconsistent alignment *Ordering International Politics* Janice Bially Mattern,2005-09-01 How do states sustain international order during crises Drawing on the political philosophy of Lyotard and through an empirical examination of the Anglo American international order during the 1956 Suez Crisis Bially Mattern demonstrates that states can and do use representational force a forceful but non physical form of power exercised through language to stabilize international identity and in turn international order *The Politics of Constructing the International Criminal Court* M. Struett,2008-05-12 This book examines the political process that led to the establishment of the International Criminal Court in 2002 It accounts for the main features of the court including its strong independent prosecutor by analyzing the discourse surrounding the ICC negotiations and particularly highlights the role of human rights NGOs **Strategies for Research in Constructivist International Relations** Audie Klotz,Cecelia M. Lynch,2014-12-18 Constructivism s basic premise that individuals and groups are shaped by their world but can also change it may seem intuitively true Yet this process oriented approach can be more difficult to apply than structural or rational choice frameworks Based on their own experiences and exemplars from the IR literature well known authors Audie Klotz and

Cecelia Lynch lay out concepts and tools for anyone seeking to apply the constructivist approach in research. Written in jargon free prose and relevant across the social sciences this book is essential for anyone trying to sort out appropriate methods for empirical research. *Constructing Human Rights in the Age of Globalization* Mahmood Monshipouri, Neil Englehart, Andrew J. Nathan, Kavita Philip, 2015-06-01 Both human rights and globalization are powerful ideas and processes capable of transforming the world in profound ways. Notwithstanding their universal claims however the processes are constructed and they draw their power from the specific cultural and political contexts in which they are constructed. Far from bringing about a harmonious cosmopolitan order they have stimulated conflict and opposition. In the context of globalization as the idea of human rights has become universal its meaning has become one more terrain of struggle among groups with their own interests and goals. Part I of this volume looks at political and cultural struggles to control the human rights regime that is the power to construct the universal claims that will prevail in a territory with respect to property the state the environment and women. Part II examines the dynamics and counterdynamics of transnational networks in their interactions with local actors in Iran China and Hong Kong. Part III looks at the prospects for fruitful human rights dialogue between competing universalisms that by definition are intolerant of contradiction and averse to compromise. **Making Sense, Making Worlds** Nicholas Onuf, 2013-05-07 Nicholas Onuf is a leading scholar in international relations and introduced constructivism to international relations coining the term constructivism in his book *World of Our Making* 1989. He was featured as one of twelve scholars featured in Iver B Neumann and Ole W ver eds *The Future of International Relations* Masters in the Making 1996 and featured in Martin Griffiths Steven C Roach and M Scott Solomon *Fifty Key Thinkers in International Relations* 2nd ed 2009. This powerful collection of essays clarifies Onuf's approach to international relations and makes a decisive contribution to the debates in IR concerning theory. It embeds the theoretical project in the wider horizon of how we understand ourselves and the world. Onuf updates earlier themes and his general constructivist approach and develops some newer lines of research such as the work on metaphors and the re grounding in much more Aristotle than before. A complement to the author's groundbreaking book of 1989 *World of Our Making* this tightly argued book draws extensively from philosophy and social theory to advance constructivism in International Relations. *Making Sense Making Worlds* will be vital reading for students and scholars of international relations international relations theory social theory and law. *Constructing Sovereignty between Politics and Law* Tanja Aalberts, 2012-08-06 This book explores the interplay between sovereignty politics and law through different conceptualizations of sovereignty. Despite developments such as European integration globalization and state failure sovereignty proves to be a resilient institution in contemporary international politics. This book investigates both the continuity and change of sovereignty through an examination of the different ways it is understood: sovereignty as an institution as identity as a language game and as subjectivity. In this illuminating book Aalberts examines sovereign statehood as a political legal concept an institutional product of modern

international society and seeks an interdisciplinary approach that combines international relations and international law This book traces the consequences of this origin for the conceptualization of sovereign statehood in modern academic discourse drawing on key jurisprudence and international treaties and provides a new framework to consider the international significance of sovereignty As an innovative approach to a critical institution Constructing Sovereignty between Politics and Law will be of interest to students and scholars of international relations international relations theory and international law

**The Emergence of Brazil to the Global Stage** Francine Rossone de Paula, 2018-03-13 How do discourses about Brazil's emergence as a global actor at the beginning of the twenty first century reinforce particular temporal and spatial formations that enable the perpetuation of international hierarchies This volume argues that while the phenomenon of emergence was celebrated as the conquest of more authority for Brazil on the global stage especially as Brazil was presented as a leader of developing countries discourses about Brazil as an actor who was finally arriving at its promised future as a global player were also perpetuating a spatiotemporal structure that continues to reward some societies and individuals at the expense of many others Brazil's success or failure has depended from the beginning on how well it would perform its predetermined role as a newly relevant or emergent global player Power and empowerment have been conceptualized in a way that discursively inhibits any form of escape from the temporal and spatial confines of a world order marked by geopolitical and geoeconomic competition The book can be seen as an initial step towards an exploration of alternative forms of thinking doing and being temporally and spatially that are not limited to the competition among states for geopolitical status in the international system This work will be of great interest to students and scholars of critical international relations international politics and Latin American studies

*Climate Change and Philosophy* Ruth Irwin, 2011-10-20 Climate Change and Philosophy presents ten original essays by an international team of expert contributors exploring the important contribution philosophical inquiry can make to contemporary debates to do with climate change and the global environment Examining this hugely topical issue through the

lens of environmental philosophy political theory philosophy of technology philosophy of education and feminist theory these essays interrogate some of the presumptions that inform modernity and our interaction with natural processes The book asks fundamental questions about human nature and more importantly the concept of nature itself The conceptual frameworks presented here contribute to an understanding of the processes of change of social transformation and the means of adapting to the constraints that problems such as climate change pose The book proposes a way of beginning the important task of rethinking the relationship between humanity and the natural environment Through enquiry into the basic philosophical principles that inform modern society each author asserts that reflection informs change and that change is both required and possible in the context of the environmental crisis facing us today
