Language Impairment And Psychopathology In Infants Children And Adolescents:

Language Impairment and Psychopathology in Infants, Children, and Adolescents Nancy J. Cohen, 2001-06-25

There is a high correlation between language impairment and a range of psychological disorders in children and adolescents. This book describes and discusses this relationship, its etiology and consequences for the child and its treatment.

Language Disorders in Children Joe Beitchman, E. B. Brownlie, 2013-10-10. Language impairment in childhood and youth: presentation, diagnosis, assessment, and empirically validated treatment. As many as half of children and adolescents presenting for mental health services have language impairments often undiagnosed. This book offers a clear and comprehensive description of language impairment emerging in childhood and its implications for clinical practice with children and adolescents. The book is filled with many clinical pearls and examples of the way language impairment impacts on the child's symptom picture and influences treatment. After discussing DSM IV and the planned DSM 5 criteria, it then goes on to provide the reader with an easy-to-follow plan on how to conduct the assessment with the child and parents and the steps to take in initiating treatment. Unique are the recommended modifications to empirically validated treatments for language-impaired children with comorbid anxiety or disruptive behavior disorders. Anyone who works with children and adolescents will benefit from this book.

Differential Diagnosis and Treatment of Children with Speech Disorder Barbara Dodd, 2013-05-30. Paediatric speech and language therapists are challenged by diminished resources and increasingly complex caseloads. The new edition addresses their concerns. Norms for speech development are given, differentiating between the emergence of the ability to produce speech sounds, articulation, and typical developmental error patterns in phonology. The incidence of speech disorders is described for one UK service, providing crucial information for service management. The efficacy of service provision is evaluated to show that differential diagnosis and treatment is effective for children with disordered speech. Exploration of that data provides implications for prioritising case loads. The relationship between speech and language disorders is examined in the context of clinical decisions about what to target in therapy. New chapters provide detailed intervention programmes for subgroups of speech disorder: delayed development, use of atypical error patterns, inconsistent errors, and developmental verbal dyspraxia. The final section of the book deals with special populations: children with cognitive impairment, hearing and auditory processing difficulties. The needs of clinicians working with bilingual populations are discussed, and ways of intervention described. The final chapter examines the relationship between spoken and written disorders of phonology.
