Scientific Thinking in Speech and Language Therapy Carmel Lum, 2005-04-11 Speech and language pathologists like all professionals who claim to be scientific in their practice make a

public commitment to operate on the basis of knowledge derived in accordance with sound scientific standards Yet students in communication disorders are given relatively little grounding in the fundamentals of science indeed they often receive implicit encouragement to rely on clinical wisdom This pathbreaking text introduces the principles of critical scientific thinking as they relate to assessing communication problems deciding about alternative approaches to intervention and evaluating outcomes The author provides many illustrative examples to help readers contextualize the ideas Her clear presentation will help not only undergraduate and graduate students but also established professionals reason more effectively about what they are doing and why Though the examples come from speech and language pathology this illuminating and readable book constitutes a valuable resource for all clinical practitioners **School-Age Language**

Promoting the Educational Success of Children and Youth Learning English National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Children, Youth, and

Families, Committee on Fostering School Success for English Learners: Toward New Directions in Policy, Practice, and Research, 2017-08-25 Educating dual language learners DLLs and English learners ELs effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic cognitive and social potential, many ELs who account for more than 9 percent of enrollment in grades K-12 in U.S. schools are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy practice and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

Language Intervention Marc E. Fey, Jennifer Windsor, Steven F. Warren, 1995 This theory to practice transdisciplinary book series addresses the language difficulties associated with communication disorders and developmental disabilities. Grounded in state-of-the-art research yet practical in orientation, the volumes in this series are invaluable resources for professionals and graduate students who work with learners with language delays or communication impairment. Profound changes in legislation, technology, and philosophy have transformed language intervention for preschool and elementary age children with language impairments. This comprehensive book examines the developments of the past decade, analyzes research, and evaluates the efficacy of recent innovations. Chapters provide practical intervention strategies for a variety of language problems and prepare interventionists to meet the demands of the classroom by addressing topics ranging from cultural awareness to the effectiveness of computers in intervention. This resource also expands current norms, outlining innovative approaches, proposing challenging goals, and suggesting specific research. Speech language pathologists and students in speech language pathology, special educators, and reading specialists and researchers and clinicians in child development will turn to this volume for its appraisal of recent changes in language intervention and its recommendations for service delivery.
